PARIS, THURSDAY, SEPTEMBER 29, 1988

ESTABLISHED 1887

OLYMPIC CASO PODIUM

The Game: No Quarrel, and No Contest There was no disputed three seconds Wednesday, as there had been in Munich 16 years before. This time the

Soviet Union, without doubt, beat the United States in basketball, 82-76 — and for the first time since basketball became an Olympic sport in 1936, the Americans were not in the final.

Afield, Some Not So Golden Moments

As expected, Sergei Bubka of the Soviet Union won a gold in his first Olympics to lead a Soviet sweep in the pole vault. What was unexpected was that Bubka was lucky to clear an lower height and almost didn't win a medal at all. Later, he stormed off without trying for a world record because of the commotion in the stadium. Carl Lewis of the United States got a shock, too, when teammate and friend Joe DeLoach sped past him to an Olympic record in the 200-meters. Then Jurgen Hingsen of West Germany, the former decathlon world record holder, walked out after being disqualified in the opening 100-meter race of his event.

They Took the 'Demonstration' Seriously It was only the final of a "demonstration" sport, but they played it like the last game of the World Series, one-handed Jim Abbott pitching the United States to a 5-3 victory over Japan and the baseball gold medal. In tennis, the upsets continued with Miloslav Mecir of Czechoslovakia ousting the top-seeded Stefan Edberg in the men's singles semifinals.

Lifter Disqualified, Hungarians Leave

With silver medalist Andor Szanyi becoming the eighth athlete, and fourth weight lifter, to fail a drug test at these Games, Hungary sent its weight lifting team home

He Was Down and Out, Not Discouraged Jerrick Tenai, 20, the Solomon Islands' lone Olympic archer, learned to shoot only three months ago and arrived in Seoul with what he admitted was a pretty primitive bow. A South Korean bow-making company took pity, gave him with an expensive, high-tech bow and taught him how to use it. Wednesday, Tenai finished last in the men's individual open round competition and was eliminated. Then he said, "I'll practice for four years and I might be back at the next Olympics." Olympic report, Pages 15, 16 and 17.

Johnson Tied to 3 Medications

Compiled by Our Staff From Dispatches SEOUL - Ben Johnson acknowledged taking three types of medication, including some containing partly restricted drugs, before his 100-meter race Saturday, a doctor in the drug control office at the Olympics said Wednesday.

But the doctor, Lee In Joon, said that the use of these drugs for therapentic purposes was permitted and that Johnson "never told me he had taken any anabolic steroids." .

The Canadian sprinter, who test-Federatioo from international and field at the Seoul Games.

He was also barred for life from competing for Canada. Dr. Lee said that while Johnson

was being tested on Saturday, about 90 minutes after his world record dash of 9.79 seconds, he admitted that he had taken drugs. "It was three kinds of drugs," Dr. Lee said Johnson told him.

"One was injection. Two were Dr. Lee said that the drugs Johnson mentioned, "if used properly, as a therapeutic, that's fine with us.

Mr. Gorbachev, with the reported approval of the Politburo, has planned deep cuts in the party bureaucracy in Moscow and at the regional level, a key step toward limiting the party's role in the management of nearly all aspects of

Although the reorganization plan was approved in general at the special party conference in June and endorsed by the Central Committee in July, the decision threatens powerful interests in the party and may have provoked strong tesistance. More than any other decision

promoted by Mr. Gorbachev, the move to eliminate nearly half the Central Committee departments and trim the administrative operations of local party organizations cuts to core issues of power and privilege. Some Western diplomats have

predicted that Mr. Gorbachev would encounter serious problems by pushing his campaign to reshape the country in the party itself.

If the administrative cutbacks he has proposed are carried out, hundreds of high-powered party offi-cials in Moscow would have to be reassigned to oew jobs, along with thousands of regional and local party hureaucrats.

The upheaval would deprive reional and local party leaders, the barons of the Soviet system and the largest voting block in the Central See SOVIET, Page 5

Confident NASA Ready For a Launching Today

By John Noble Wilford New York Tunes Service

CAPE CANAVERAL, Florida With the future of the nation's civilian space program hanging in the balance, the space shuttle Discovery was readied Wednesday to carry U.S. astronauts into orbit for the first time since the Challenger disaster 32 months ago.

Liftoff of the Discovery and its crew of five experienced astronauts was scheduled for 9:59 A.M. Thursday, barring mecbanical trouble in the final hours of the countdown or bad weather.

If trouble develops and it can be corrected in a hurry, the launching could be delayed as long as two and a half hours and still get off Thursday. If occessary, subsequent launching attempts could be made on any one of the following six days, until onboard batteries would have to be recharged.

Officials of the National Aero-nautics and Space Administration said Wednesday night preparations were proceeding smoothly and with rigorous caution. The weather forecast was generally favorable, with scattered clouds and I I-knot winds predicted. "This flight is the key, vital ele-

space program," said Dale D. My-ers, NASA's deputy administrator, at a news conference. "We've been working for two and a half years to put the shuttle

ment in the overall future of our

back in business," Mr. Myers said. "It's really the beginning of the future of our space program."
Rear Admiral Richard H. Truly

the associate administrator for space flight, said confidently: "The space shuttle is ready to fly. The payload is ready to fly. The U.S. is ready to go."

Admiral Truly, a former astro-

naut who took over leadership of the staggering shuttle program after the accident, was referring to the inertial upper stage, a solid-fuel rocket attached to the shuttle's principal payload, which is an advanced \$100-million communications satellite that is to be deployed on the first day of the planned fourday mission.

Concern about the condition of the payload rocket was raised at a management review meeting Tuesday. A similar rocket at the manufacturer was found to have a small cut in an O-ring that acts as a seal.

Arnold D. Aldrich, director of the shuttle program, said an investigation determined that it was highly unlikely" that the same cut would exist in the rocket that is now locked into place in the Discovery's cargo bay. Even if it did he said, tests of the damaged Oring showed that it would easily withstand the pressures of the rocket firing.

Admiral Truly said he had talked to the crew members and they were "in great shape, all ready to go." Heading the crew is Captain Frederick H. Hauck of the navy, the mission commander, who has flown in space twice before. The other crewmen are Colonel Rich-

ard O. Covey of the air force, Lieutenant Colonel David C. Hilmers of the Marine Corps, John M. Lounge and George D. Nelson. The astronauts have been in training for the flight since January

1987, which was a year after the Challenger exploded 73 seconds after liftoff, killing all seven crew members. Ao investigatioo determined that a flawed seal in one of the two

booster rockets leaked hot gases and set off the catastrophic explosion. Cold weather on launching morning also was believed to have contributed to the seal's weakness. Since then, more than 600 modifications have been made in the

SEOUL STUDENTS PROTEST — As riot police advanced, students at Korea University fled Wednesday after a demonstration by about 200 of them. The students, throwing firebombs and waving sticks, sought a leader's release. No injuries or arrests were reported.

In Libya's Discreet Hotel Kabir, Revolution Is the Inn Thing

By Jennifer Parmelee Washington Post Service

TRIPOLI - Visitors could be forgiven for thinking that Tripoli's main hotel, El Kabir, is not the hub of the universe. But from a revolutionary's point of view, perhaps it is.

The spacious seafront hotel, with its after another — from Ecuador, Austria, preen-and-white facade of Islamic arches, Burkina Faso, the Philippines, wherever has become a home away from home for every sort of "liberation movement," thanks to Colonel Moammar Gadhafi's well-financed vision of himself as leader of the world's oppressed.

Abrahamson Quits SDI Post; Move May Signal Policy Shift

By Michael R. Gordon
New York Times Service

WASHINGTON — In a surprise announcement, the Pentagon said Tuesday that Lieutenant General James A. Abrahamson of the air force had resigned as director of the research program to develop a space-based anti-missile defense.

The resignation, which takes effect at the end of January, may sisnal an important turning point in the program to conduct research and testing on systems to defend against missile attack.

In his letter of resignation, the general said that his departure as head of the Strategie Defense Initiative, or SDI, would help the next administration take a fresh look at the the missile shield project.

General Abrahamson wrote that the anti-missile program had made "unprecedented progress," hut added that "a new administration will undoubtedly have different ideas or approaches to SDL"

"Therefore, I reluctantly have concluded that the program will best be served by allowing oew leadership to represent oew policy and direction," be said.

Howard, rebuffed any suggestions that the general was leaving because of unhappiness with the pro-

The general has been an ardent advocate of efforts to develop a space-based missile defense system and has oot endorsed proposals for a gradual approach toward defense systems that have been under review at the Pentagon. Many analysts say budgetary constraints are likely to significantly limit the scope of a space-based program, regardless of who is elected presi-

Congress and the administration are ocaring an agreement that would essentially freeze the current level of spending. The spending level for the Pentagon and the Energy Department would be \$4.1 hil-

The letter of resignation was dated July 26, but was made public only on Tuesday by the Peniagon. There was no explanation for the delay. The Pentagon has cominated Lieutenant General George L. Monahan Jr. of the air force, principal deputy assistant for acquisition, as a successor.

General Monahan, 54, has a

Missile Attack Kills 35 In Kabul, Tass Reports

Compiled by Our Staff From Dispatches Afghan guerrillas killed 35 people and wounded more than 150 in violatioos of a UN-oegotiated agreement. Half of the Soviet troops pulled out by Aug. 15.

Tass said that "one of the rockets were fired into the Afghan capital, Tass said.

The attack, apparently the largest ever by the insurgents, was denounced by Tass as a "crime against the Afghan people." The United States has urged Af-

ghan resistance forces to refrain from attacks on Soviet troops that might slow Soviet withdrawal from Afghanistan, the State Department

spokeswoman said oo Wednesday. The spokeswoman, Phyllis E. Oakley, said the department was aware of intensified rocketing of Kabul and had "counseled the resistance that it is oot in their interest to launch actions which might delay the withdrawal of Soviet forces in Afghanistan."

Attacks on urban centers in Afghanistan have increased since the Soviet Union began withdrawing Mikhail S. Gorbachev, urged that its more than 100,000 troops from both the United States and Paki-

MOSCOW - A missile fired by Nations in New York on Tuesday.

Tass said that "one of the rockets exploded oear a hns stop in the center of the city, killing 35 and wounding another 156 civilians." It said seven people were wounded in other parts of Kabul.

Mr. Shevardnadze said at the United Nations that the Soviet Union has oot yet begun the second stage of the withdrawal.

"Let's wait and see," he said. "It is oecessary to stop the violations that take place. It is the most important thing.

In a speech to the General Assembly, he asked the five permanent members of the Security Council to discuss violations of the withdrawal agreement with Afghanistan and Pakistan.

That phrase is common diplomatic parlance to describe activi-

ties viewed as espionage.
On Sept. 22, Britain expelled Czechoslovakia's assistant military attachė, Major Bedrieb Kramar, the air attache, Major Vlastimil

Netolicky, and Pavel Moudry, a member of the commercial section. The British said the expulsions were a signal that while Britain seeks better relations with Czechoslovakia, it will not tolerate "the

sort of activities" in which Prague's three diplomats engaged.
In relaying word of Czechoslovakia's action, CTK used almost identical language.

The Czechoslovak side told Britain that the activities of the two Britons contradicted "the interest in constructive relations between Czechoslovakia and Britain and is an obstacle to their further development," CTK said.

In London, a Foreign Office spokesman denied that the ex-pelled Britons were spies. He said the move was "definitely a retaliation" for the British expulsion of the three Czechoslovaks on Sept.

'We have said we want to devel op relations with Czechoslovakia, but the action of the three diplomats in London didn't help and this does not help either."

"They gave us the usual thing that these men were involved in the gathering of information of an intelligence nature," said the spokesman, who spoke on condition of anonymity.

of the F-16 and worked on research and development projects at air force headquarters. He is a pilot who flew 122 combat missions in Southeast Asia

General Abrahamson, 55, who is retiring from active military duty, was picked to head SDI in 1984. Before that, he ran the space shuttle program and was a manager of the air force's F-16 program.

A soft-spoken man, General Abrahamson has been a calm and patient proponent of an ambitious program to develop anti-missile de-fenses. But, in doing so, he did oot develop a strong reputation as a manager.

A Pentagon consultant familiar

with the initiative said: "From the Reagan administration's perspective, he was good in getting the program going. He had imaginative new ideas and he spread a lot of money around to a lot of places to build op a constituency for the pro-

"But when the time came to pul everything together and face up to the budgetary constraints and the political constraints on deployment, he was not a top manager,"
the consultant said. "In that respect, it is a pretty timely change."
He added that he believed Gen-

eral Monahan had strong skills in managing research and develop-

ment programs.

In his letter of resignation, General Abrahamson said that scientists involved in the research program had been "tearing away the technical barriers and turning the vision into reality by means of un-

precedented progress."
This outlook contrasted with recommendations to the Pentagon this summer by the Defense Science Board, an independent advisory panel. That panel suggested that Defense Secretary Frank C. Carlucci reshape the program by be-ginning with the deployment of ground-based interceptor rockets and deferring a decision about whether to put interceptors in

Reagan's Appeal on Chemical Arms Called Stopgap Response by Experts

By John H. Cushman Jr.

New York Times Service WASHINGTON -- President Ronald Reagan's call for an international meeting to discourage the use of chemical weapons is a stop-gap response to delays in eliminat-ing the weapons altogether, administration and congressional experts

and arms control analysts say. His call for shoring up existing prohibitions on the weapons' use, delivered at the United Nations on Monday, raised questions about how the proposed conference would mesh with formal oegotiations in Geneva where the administratioo in 1984 proposed a comprebensive chemical weapoos disarmament treaty.

Mr. Reagan reiterated the broader goal of an outright ban, saying, "We urge all nations to cooperate in oegotiating a verifiable, truly global ban on chemical weapons at the Conference oo Disarmament in

Most experts say at least another year or two of negotiations, involving 40 nations, must precede any agreement prohibiting the develop-ment, production and stockpiling

of chemical weapons. But for the first time, Mr. Reagan called for an interim step. He asked "all civilized nations to ban, once and for all, on a verifiable and global basis, the use of chemical and gas warfare."

The 121 nations that have signed the 1925 Geneva Protocol renouncing the use of chemical weapons should join with other states, Mr. Reagan said, "to consider actions that we can take together to reverse the serious erosion of this treaty."

Skepticism about Mr. Reagan's reason for making the proposal at this time was fueled by the fact that Vice President George Bush has emphasized chemical disarmament during his election campaign. Mr.

Mr. Dukakis's camp responded that Mr. Bush three times voted to action."
break Senate ties and allow reoewed prodoction of chemical weapons by the United States, but Mr. Bush is taking credit for having been the envoy who presented the U.S. draft treaty calling for global elimination of the weapons.

The Soviet Union has endorsed the idea of comprehensive chemical disarmament and has agreed to inspections to verify compliance. But other nations have not been as flexible and the difficulties of controlling the production of dozens of chemicals remain unsolved,

One expert oo chemical arms working for a congressional committee said the same political and technical difficulties that have prevented the disarmament treaty from being concluded would block meaningful actions at a burried conference of the type Mr. Reagan

This official cautioned that the conference Mr. Reagan proposes might even siphon energy away from the Geneva disarmament talks, which despite their halting progress have engendered guarded optimism that a treaty eliminating the weapons might be coming within reach.

But a State Department official said the president's proposal was "complementary" to the more am- York - The British foreign secrebitious goal of eliminating the tary, Sir Geoffrey Howe, expressed weapons.

"We see an immediate problem with the use of chemical weapons," said this official, citing the use of such arms by Iraq in its war against Iran and in attacks on its own Kurdish populatioo. Iraq has signed the 1925 Geneva Protocol. "As far as we were concerned in

shottle equipment, mainly the solid-fuel boosters that provide much of the thrust to the shottle in the first two minutes of ascent. Improved seals were designed and tested several times in ground firmgs of the rockets. About \$2.4 billion has already been spent on the

After the two boosters hurn out, they are to be jettisoned, to fall back into the Atlantic. Then the shuttle's three main engines, fueled by liquid bydrogen and liquid oxy-gen, are to continue firing six more nutes, taking Discovery to orbit.

"This has been a long two and a half years," Admiral Truly said of NASA's struggle to return to flight. We can't make it perfect. In space there will always be risks. What we have done is go through the sys-tems, understand the risks and know they're well within the com-

Despite the host of leaks and power failures that troubled countdown practices and a firing test in August, the countdown for the actual mission has so far been relatively free of problems. The communications satellite.

called TDRS-3, for Tracking and Data Relay Satellite, fills most of the 60-feet-long (18-meters-long) eargo hay of Discovery. As planned, the satellite and its attached rocket will be released from the bay 6 hours, 13 minutes after

The satellite will be a critical second link in a network that is to serve as a switchboard in the sky for scores of spacecraft operating in orbits below.

If the astronaots succeed in deploying the satellite the first day, they will turn their attention the rest of the flight to an assortment of scientific experiments to be con-ducted inside the crew cabin.

Bush raised the issue twice during has oot attracted enough interna-his debate Sunday night against tional attention. A conference Governor Michael S. Dukakis of would focus attention on the use of the weapons as almost an emergency. This is a short-term kind of

Matthew G. Bunn, a senior associate at the Arms Control Association, a comprofit and nonpartisan research organization in Washington, said Mr. Reagan's proposal "might be useful, but is not earthshaking.

The idea of the conference is just to rally the international community around the issue," Mr. Bunn said. "It is not clear to me whether the administration is going to propose any actual international sanctions that would be imposed on states that used chemical weap-

The State Department official who described the proposal's objectives conceded that U.S. allies had oot been consulted in detail on the president's proposal and that the details themselves — including where a conference might be held and what its precise objectives would be - had not been decided.

Howe Supports Reagan Plan on Arms Conference

UNITED NATIONS, New of chemical weapons and backed a proposal by President Ronald Reagan for a conference to outlaw their

The spread of chemical weapons is one of the most disturbing of recent developments," he said in a speech to the General Assembly. As more countries develop a chemical weapons capability, the risk of their increased use as an estrument of war and terror multi-

Sir Geoffrey said Britain had taken a lead in preparing an international convention for the worldwide suppression of such weapons and bad made proposals for strengthening the 1925 Geneva Protocol banning their use. "So today I welcome President

Reagan's proposal to reconvene the 1925 Geneva conference to mobilize the international community behind the search for a convention on chemical weapons which would outlaw their use," he said. He was referring to an initiative by Mr. Reagan in a speech to the assembly

"The charge that Iraq has used chemical weapons against the Kurds adds gravity to the situa-tion," be said, noting that Secre-tary-General Javier Perez de Cuéllar was empowered by a recent Security Council resolution to investigate the use of such weapons.

WASHINGTON (AP) — The House of Representatives approved Wednesday a military budget bill shorn of restrictions on the missile defense system and arms control policy that had been objected to by President Ronald Reagan. The vote was 369 to 48.

Mr. Reagan is likely to sign the bill after the Senate passes it later this week, said Representative Les Aspin. Democrat of Wisconsin and Senator Sam Nunn, Democrat of Georgia, the chairmen of the House and Senate armed services committees. The defense authorization measure

Senate armed services committees. The declare authoritization measure provides permission for broad Pentagon program areas, while a companion appropriations bill allots money for specific expenses.

The bill, for the fiscal year starting Oct. 1, differs only slightly from the \$300 billion package Mr. Reagan vetoed last month. Pravda Urges Tough Line in Armenia

House Approves U.S. Military Budget

MOSCOW (Reuters) — Pravda urged the authorities in Soviet Armenia on Wednesday to take a tougher line on unrest over the disputed Nagorno-Karabakh Autonomous Region of Azerbaijan, as strikes and demonstrations continued in Armenia's capital, Yerevan.

demonstrations continued in Armenia's capital, Yerevan.

"Activities which can only be described as subversive have been going on for almost nine months," the Communist Party daily said. "There are reasons to say the state and law enforcement agencies have been acting in an inconsistent and indecisive manner," it added. Armenians in Nagorno-Karabakh are seeking to have the autonomous region under the control of Armenia. Armenians, most of whom are Christian, dominate Nagorno-Karabakh, which has a minority of Moslem Azerbaijanis.

A spokesman for the Armenian Forcian Ministry in Yerevan said that some workers were still on strike in the city and that meetings were being

A spokesman for the Armennan Potentially in Televan and that some workers were still on strike in the city and that meetings were being held in the Opera Square. "The situation is still tense although it is gradually normalizing," the spokesman said, adding that troops had been withdrawn from the city center although police units were still gnarding

Chinese Police Stop Tibetan Protest

BELIING (WP) — Chinese police broke up a small demonstration for independence by Buddhist monks in the Tibetan capital of Lhasa after the authorities had placed tighter controls on the city, a Westerier in

Lhasa said Wednesday. Reached by foreign journalists, officials in Lhasa denied that any incident had occurred. However, a Swedish tourist said by phone that a number of stores in Lhasa shut down following a demonstration Tuesday, the first anniversary of a demonstration for independence that was conducted in the heart of the city a year ago by Tibetan monks:

It was apparently in anticipation of this anniversary and a subsequent protest four days later, which erupted into anti-Chinese violence in which six persons died, that the authorities have increased security in the city in recent days, hoping to prevent a recurrence. European tourists said by phone from Lhasa that notices went up in hotels four days ago ordering foreigners not to go out on the streets after 11:30 P.M.

Progress Reported in Angola Talks.

BRAZZAVILLE, Congo (Reuters) — Delegates at peace negotiations on Angola and South-West Africa said Wednesday that progress was being made and the talks would continue into an unscheduled fourth day. "Progress has been made in overcoming a number of obstacles to a settlement and identifying common ground between the parties," a statement by the U.S. delegation said.

But Chester A. Crocker, the U.S. assistant secretary of state for African.

affairs, said in answer to a question that "there is still a lot to do." The opposing sides in Angola, who are observing a cease-fire, are under pressure to meet a previously set Nov. I target date for the star on implementing a United Nations independence plan for South-West Africa, also known as Namibia.

Opposition Party Registers in Burma

RANGOON, Burma (Reuters) — The opposition National League for Democracy registered as a political party Wednesday, but said it had not

decided whether to participate in promised elections.

The league, formed this week by U Aung Gyi, U Tin Qo and Dave Aung San San Kuy, sent a letter to the election commission saying that it wanted to register in case free and fair elections become possible. The

commission was appointed by the Burmese Army. A league spokeswoman said the group was calling on students and workers to continue anti-government strikes and demanding that the military ruler. General Saw Maung, who seized power Sept. 18 coder an end to shootings and arrests and lift a curiew and a ban on public

Local Coverage Is Giving Quayle a Boost

By B. D. Ayres Jr. New York Times Service

NEW ORLEANS - When Senator Dan Quayle awoke Tuesday morning, he found his picture on the front page of The Times-Pica-yune in full color, hands gesturing authoritatively as he spoke to workers at a nearby plant that produces parts for the space shuttle.
"Quayle: Record Speaks to Abil-

the accompanying headline

Over breakfast, the Indiana senator's campaign aides nodded with satisfaction as they studied the paper. The coverage was exactly what they had hoped to get: essentially favorable at first glance.

You had to read beyond the picture and headline to get to the "negatives" that still hang over the Quayle candidacy, the material about demonstrators and the questions about his qualifications to be

Quayle campaign has been going after, and increasingly getting, for several weeks in cities and towns

across the country. What is more, not only does the local newspaper often come through with coverage that campaign officials find satisfying but there has also been similar coverage in the "sound bites" and "sight bites" broadcast by local radio and television stations.

Is such coverage beginning to soften the strongly negative image

of Mr. Quayle that pollsters have been finding among voters? When Rich Bond, a top official of the Bush-Quayle campaign, was asked that question, he did not analyze, he just exulted, "I'll take it!" and held aloft a copy of The Times-

Mr. Bond is concerned that na-tional coverage of Mr. Quayle still frequently focuses on his problems, so much so that Vice President George Bush has limited campaign appearances with his running mate, as well as most speech references to

But Mr. Bond and other aides now seem resigned to that situation - Mr. Quayle himself has said that tionally a specialty of vice-presi-he does not expect it to change dential nominees. mists and editorial writers and feed him a steady supply of sharp, colormuch - and in an effort to recoup. they have focused their energies on local coverage, which they feel they

can more easily influence. The national media are treated cordially but are relegated to a political back burner.

Such treatment is not all that musual, Quayle aides contend, arguing that local coverage is tradi-

THE GIN OF ENGLAND

How can I diversify my investments if I only have US\$2,500?"

"Diversification" is the magic word in investment these days. Everyone wants to spread their investments over a range of economies, currencies, and business types.

But how can the small investor do this if he only has

Scimitar's "collective" fund concept.

You may be familiar with the concept of a unit trust. Your resources, along with the resources of many others, are pooled into one large portfolio and this is then managed by experts in the field - in this case, Scimitar, the investment arm of Standard Chartered Bank.

Thousands of others are contributing to the fund so the result is a "collective power" that can benefit from the highest level of management services and diversification for safer, higher returns.

With US\$2,500, you can invest in many of the world's leading companies.

Scimitar's Worldwide Selection Fund gives you a wide choice of funds in which to invest and diversify, including funds covering most of the world's equity, fixed income and currency markets. You can switch between funds as often as you like, free of charge.

What's more important is that each fund consists of shares in a variety of business types in a variety of economies. Our Worldwide Equity Fund, for instance, has shares in 70 leading companies in 13 different countries.

Our American Equity Fund lets the small investor take advantage of a diverse range of business sectors in the U.S., such as food (McDonalds), high tech (IBM), media (New

York Times), and heavy industry (Ford). Our Japanese Equity Fund was voted 1987's "Best Performing Japanese Offshore Fund" by Lipper Analytical Services. All Scimitar funds consist of a diverse range of investments, for safer, higher returns. So you see, a small investment can,

in fact, go a long long way. If you would like more information on how to diversify, post the coupon for a prospectus on the sole basis of which an investment may be made.

You are reminded that as a consequence of the general nature of the unvestments held and of possible exchange and interest rate fluctuations, the value of your shares and she yield from them may go down as well as up and that past performance as no guide to the future. Also, deduction of the Fund's Initial charge (where applicable) means that if you withdraw from the investment in the short-term you may not get back the amount you have invested. This advertisement is placed by Schuttar Asser Management Limited, members of IMRO and advertisement is placed by Schuttar Asser Management Limited, members of IMRO and advesters to the Schwitzr Worldwide Selection Fund, and does not constitute an invitation to subscribe for shares, which may only be made on the basis of the prospectus Neither Seimitar Asser Management (Ci) Limited not Seimitar Asser Management Assa Limited is an Authorited Person subject to the rules and regulations made under the Financial Services Act for the protection of investors.

Noriega Connection: What Did Bush Know, and When Did He Know It?

By Stephen Engelberg and Jeff Gerth

New York Times Service WASHINGTON — Throughout the 1988 presidential campaign op-ponents of Vice President George Bush have invoked the name of General Manuel Antonio Noriega, the Panamanian ruler, as short-hand for questioning Mr. Bush's

Because the Panamanian leader has been indicted on drug charges in the United States and accused of a variety of other illegal actions, critics have argued that Mr. Bush's high-level posts gave him access to an unvarnished picture of General

Moreover, the critics have argned, Mr. Bush, who was director of central intelligence in 1976, had material that should have prompt-ed him to limit U.S. dealings with the Panamanian.

As head of the CIA, Mr. Bush learned that General Noticea had "penetrated an American intelligence operation in Panama, the function of which was, in part, to eavesdrop electronically on Pana-manian communications.

on one level, this was simply a ease of spy against spy: The CIA was spying on General Noticga's country, and he was spying back.

But because the Panamanian was bribing American soldiers, the ease raised troubling questions for American intelligence agencies about the U.S. relationship with General Noriega, and the matter landed on Mr. Bush's deak early in

his one-year tenure at the CIA. Mr. Bush, when he was director of central intelligence, was one of a number of officials in both Democratic and Republican administrations who had access to intelligence reports on General Noriega that would have described the Panamanian's suspected activities, includ-

ing drug trafficking.
In those years the United States maintained a relationship with him because officials believed, on balance, that the cooperation they were receiving from him more than

offset the damage he was causing.
While the political debate has centered on Mr. Bush's knowledge this 1976 espionage episode was apparently the first exposure Mr. Bush had to potential mobile volved in dealing with him.

Some former intelligence officials, including Stansfield Turner, who succeeded Mr. Bush as director of central intelligence under President Jimmy Carter, now fault him for not having taken any action in response to the spy case. When he was head of the CIA; When he was head of the CIA;
Mr. Bush was told that General
Noriega had paid American soldiers to give him reams of highly
sensitive transcripts and tapes from
the U.S. cavesdropping operation

Lew Allen Jr., then the head of

the National Security Agency, closely guarded secret: a complete which is in charge of electronic surwhich is in charge of electronic sur-veillance, urged Mr. Bush to sup-intercepted by the NSA in Latin port prosecution of the soldiers, a move that would have publicly exposed General Noriega's role.

Mr. Bush declined, saying that as director of central intelligence he had no authority to challenge the army's decision against prosecu-

Many of the officials who have dealt with General Noriega over the years acknowledge that their assessment of his worth was subjective and that some within the intelligence fraternity had serious doubts about continuing the rela-

Mr. Bush was confronted with one of these doubters when he met

The head of the NSA had gone to see Mr. Bush because he was reported to be angry over the handling of the spy case in which General Noriega was paying American soldiers in Panama for copies and tapes of intercepted electronic communications, according to a meno Mr. Allen wrote about the

viously mentioned in reports by CBS News in 1977 and described in The New York Times in 1986 and 1988. Interviews in recent weeks with former intelligence officials, however, disclosed new information about the role played by Mr. Bush and the deep concern voiced by NSA officials.

According to documents reed last week under the Freedom of Information Act by the Army Intelligence and Security Command, the army's inquiry was begun on April 23, 1976, three

been compromised eavesdropped on electronic communications throughout Latin America and in Panama, according to former gov-

mouths after Mr. Bush became di-rector of central intelligence. The NSA listening post that had

emment officials.

America

Many intelligence officials concluded at the time that General Noriega had shared at least some of this material with Cuba, which cooperates closely with the Soviet

Union on intelligence matters. It is not known whether Mr. Allen or any other official imparted

this assessment to Mr. Bush.
It remains unclear why the CIA told neither the Justice Department nor the NSA about the case, according to officials who held law enforcement and intelligence posts

Under the executive order on intelligence in force at the time, "sonior officials" at the CIA were required to report to the attorney general any evidence of illegalities in certain areas, including espio-

Mr. Bush first met with General Noriega sometime in 1976. It is unclear whether aides told him at the time about the allegations of drug dealing that had been learned from informants in Panama and by the NSA's electronic surveillance.

Mr. Bush said in Sunday's tele-vised debate with Governor Michael S. Dukakis that he had seen no convincing or "hard evidence" until General Noniega was indicted this year by two federal grand ju-ries in Florida on charges related to drug trafficking.

Birch Bayh, an Indiana Democrat who was chairman of the Senate Intelligence Committee in 1978, told a closed session of the Senate at the time that he had read the files on General Nonega from the early 1970s.

"I do not think we have enough evidence, the kind of thing on which you could bring an indictment against him in this country," Mr. Bayh told the Senate. "But you are asking me, and as one colleague and sensed in this documents, there The officials said that the sol- is just a tremendous amount of diers had given the Panamanians a smoke there."

Smooth Soviet Talking

United Nations on Tuesday. In contrast to President Reagan's retrospective on Monday, Foreign Minister Eduard Shevardnadze looked ahead to ways in which the world body's "renaissance," as he called it, could be deepened and confirmed. The interesting thing was how smoothly and purposefully the Kremlin has moved to take advantage of its improved relationship with the United States in its dealings with other nations around the world.

It is no surprise that the Soviet Union seeks international support for its foreign policy. The United Nations is a great sounding board, in good times and bad. At this point, however, Moscow seems measurably more ready than Washington to reach out for Third World backing of specific projects in arms control, environmentalism and the diminishing of regional tensions and hostilities. The way things are going between the great powers, these projects make up an increasingly plausible international agenda, and Moscow is determined to set it.

The Soviets are also speaking, implicitly though vaguely, of a new international style involving more systematic consultations, consensus decision-making, acceptance of a common rule of international law and even voluntarily delegating a portion of national

It was the Soviet Union's turn at the rights" for the common good. As an example of the last, Mr. Shevardnadze cited the inspection provisions of the INF Treaty. No doubt one reason why Soviet policy at

the United Nations is in a more adventurous mode is the political calendar. Mikhail Gorbachev is settling in for a long haul, and Ronald Reagan is about to retire. But another reason plainly is that the Soviets have been thinking harder about it in the past couple of years. This is their "new political thinking."
The new thinking still has room in it for

puffery and some of the old, cynical realpolitik, such as heavy military support for imposition of an undemocratic regime in Nicaragua. But it also involves a considered response to the great natural appeal of American ideals of liberty and free enterprise, and it entails close attention to a complex and it entails code antennel to a com-plex and ever changing international scene. Even while asserting, without being especial-ly convincing about it, that ideology must be removed from foreign policy and diplomacy, the Soviet Union is accepting the sort of peaceful competition between the traditional Western system and the now modernizing Soviet system that the United States has always said it would welcome. At the United Nations anyway, the next American admin-istration is going to find it has to bustle.

Not Only Fraud in Seoul

Johnson, "the world's fastest human," tested positive for steroids and was stripped of his gold medal. Hours later, Greg Louganis wept for joy as the narrow victor over a spectacular Chinese teen-ager in diving from the high platform. These two episodes showed the best and the worst of Olympic competition.

Johnson, Canada's first Summer Olym-

pics winner in 20 years, was hardly the first athlete tripped up by drugs. But his triumph over his U.S. archival, Carl Lewis, in the 100 meter dash was a shining moment. Now Johnson is accused of using dangerously potent Stanozolol, a muscle builder that many athletes thought was difficult to detect.

There lies deeper tragedy: Rather than raw athlete vs. raw athlete, the use of drugs prodoces artificial, truly superhuman young men and women contesting for momentary stardom and barrels of money yet cellence and genuine tears. disregarding the risk to their lives.

Illegal drugs in sports are widespread.

Johnson was the seventh Olympic competitors to be caught in Seoul. The International Olympic Committee is properly aggressive in trying to stop drug use; its speedy move against Ben Johnson adds credibility. If future athletes think twice, this sad moment will have done its work.

Greg Louganis won springboard and platform golds in 1984, and hoped to repeat. In Seoul he won the springboard, but after nine platform dives he trailed 14-yearold Xiong Ni of China, half his age. Xiong Ni's 10th and final dive was clean and pretty. Could Longanis win? The suspense was tingling. He dived. He won. And then this normally cheerful young man wept openly on his coach's shoulder,

In one day, the watching world had been carried from shocking fraud to genuine ex-

-THE NEW YORK TIMES.

What Kind of Tax Rise?

Everyone knows that Ronald Reagan presided over a huge tax cut on taking office, particularly for the rich and corporations. Less well known, because neither Mr. Reagan nor his opponents have had the same interest in publicizing it, is what happened next. The president, beginning in 1982, signed a series of tax increases that together have now taken back more than half of what he and Congress gave away in 1981 - although the net tax cut is still very large, and the major contributor to the deficit.

For corporations, the later legislation has recouped more than was originally given away, so that corporate tax liabilities, as best auyone can measure, are now higher than they would have been under the law that Mr. Reagan inherited - although they are still a much smaller share of total federal revenues than in the 1950s and '60s and most of the 70s; by that historical standard the corpo-

rate income tax still has a way to go.

The legislation that may have done the most to restore the corporate income tax was the Tax Reform Act of 1986. It was repeatedly described in the course of its passage as a revenue-neutral trade-off of lower rates for fewer preferences for both individuals and corporations, and so it was. But the vaunted neutrality of the act, as to both the federal deficit over its first five years and the relative burdens of various income classes, did not mean that it created no winners or losers. For

corporations - in that it reduced preferences more than rates --- a net mcrease

The budget provides one measure of this, Corporate taxes, more than 20 percent of federal receipts through most of the 1960s. fell to a low of around 5 percent in 1982. This year they are expected to be back at about 11.5 percent, and by 1991 perhaps a percentage point higher. Now a new report by the tax reform group Citizens for Tax Justice confirms this partial restoration. The number of large corporations with sizable profits paying no taxes has declined; it was 40 nf the 250 surveyed in 1986, and only 16 in 1987. Mainly because of lost preferences, the effective rate paid by the 250 companies has meanwhile greatly increased, from an average of about 15 percent in 1981-1985 to 22 percent last year. At the same time, the reform group notes that overall corporate investment increased

last year. Corporate lobbyists had warned that reform would snuff it out. So the news is good, up to a point. That point is that the budget deficit remains \$150 billion. For all the strengthening of the tax system in the Reagan years, acknowledged and unacknowledged, there continues to be a need for a tax increase. The question is what kind. If only this were a presidential election

year. Then the candidates could debate that, -THE WASHINGTON POST.

Other Comment

Punish the Trainers, Too

Drug use by an athlete makes competition meaningless. A statement issued by a group of Olympic athletes after Ben Johnson was stripped of his medal called for "the establishment of unannounced random testing for athletes in training and competition on an international basis" a step that is obviously overdue. But test-

ing alone is unt enough.

World-class athletes like Johnson don't tamper with their bodies without consultations. That is why effective penalties will have to cover the trainers, coaches or others who have approved or encouraged the use of illegal drugs.

Factor In the Khmer Rouge

Off the battlefield, this has not been a particularly good year for the Khmer Rouge.
And with the opening last week of this year's
United Nations General Assembly session. the countries in ASEAN, the Association of South East Asian Nations, are considering including in their resolution on Cambodia language that opposes the return to power alone of the Khmer Rouge. The Khmer Rouge's worst fear - international isolation

appears to be materializing.
This is a situation of its own making.

Though it has disavowed its past policies and changed its constitution, and recently in its 14-point peace plan offered to place its army under international supervision after the Vietnamese withdrawal, these measures appear not to have made any impression on the international community, which is unconvinced that the Khmer Rouge has mended its ways.

How can the Khmer Rouge expect to convince the international community that it has changed when Khmer Rouge soldiers are reportedly committing the same crimes in camps under its control near the Thai border? Furthermore, the Khmer Rouge leadership has been reluctant to facilitate a solution by beeding calls for Pol Pot and

his clique to go into exile.

There will be some who argue that the ASEAN resolution does not go far enough. They would like to see the Khmer Rouge totally excluded from any settlement and from a future government. Those who hold this view are either naive or ignorant of Cambodian history. Prince Sihanouk knows better. Recently, he warned against excluding the Khmer Rouge from any new government because it is strong enough to destabi-lize such a government. Moreover, the cause of peace in Cambodia is better served through national reconciliation than exclusion of any particular party.

OPINION

Still Waiting for Thatcher the European

T ONDON - Margaret Thatcher, now in her third triumphal term as prime minister, is the senior European leader. Her complete dominance of the British political scene, her prestige, the force of her personality make her the one who could carry the Enropean Community's gold-starred blue flag to consolidate great new European power. Yet she doesn't seem tempted.

She stresses sovereignty, independence, national identity in Gaullist terms, just when others

are moving at last to revive the unifying aspira-tions that emerged from World War II.

She firmly denies that Britain is dragging be-hind again. In an interview in her study at Downing Street, she insisted that Britain had been first in forcing through agreement on the communi-ty's controversial budget, first in attacking its monstrously uneconomical agricultural policy,

first in opening up capital markets.

"I get a little impatient with people talking about visions in vague terms, and not proceeding forward with some of the practical steps which it is necessary to take in order to get further," she said. "And frequently you'll find that talking in vague terms is a way of avoiding the decisions. I'm not an avoider of decisions. We take them."

The practical steps, in her view, are deregula-tion, letting money flow. Her emphasis in Euro-pean issues, as in British affairs, is on economic forces. She speaks scornfully of the "terrible jargon" of Europeans who worry about "social partners." What they mean, she says, "is a dialogue between your industry, your trade unions and the state . . . That's an old-fashioned idea. By Flora Lewis

It really stems from a kind of Marxist doctrine fronically, Mrs. Thatcher's union bashing is beginning to convert Britain's unions from their adamant "little England" stance to being pro-European. They are coming to see that joining forces with Continental unions would help them deal not only with Enrope-wide companies but

also with their own government.

The impression Mrs. Thatcher gives of her idea of Europe is that it should be strictly business, and that politics must be the preserve of national parliaments. Obviously, she isn't ready to join the European Monetary System and she opposes the idea of a single currency and a central bank, which is the only way to make a truly single market.

But she probably has a hunch that she won't be able to hold Britain out indefinitely. All the

momentum is going in that direction and the symbols are lagging behind the economic facts. She says she suspects that the exchange rate system won't work once all the community members have really lifted controls on capital movements, so presumably she is waiting for circumstances to force a new look at currency relations.

For all her disdain of Marxist notions, howev-

er, the prime minister is clearly aware of the inevitable links between economics and politics. "You can't have or uphold political or personal liberty without having economic liberty," she pro-claims. She warmly endorses Mikhail Gorbachev's glasnost as a necessary step toward making the

Soviet economy produce more goods and services. "Freeing up the political system gives you not only the greater dignity, but it also produces greater economic results," she said. She called Mr. Gorbachev's efforts "very far-reaching, very bold and prophetic," and said the West should help by

sharing management techniques through joint ventures, without letting down on strong defenses. It is appropriate that the leading European ideologist of capitalism should show encouragement to the leader of the Communist superpower. The central facts that provoked Mr. Gorbachev's rosh for reference are not toly the feiture of communist superpower. push for reforms are not only the failure of commarrism but the success of the West.

That is what makes her reinctance about political Europe cumbersome, ft is understandable in terms of the traditions and emotions of nationalism she evokes with such ardor. But it is precisely withdrawal from exclusive nationalisms that enabled Western Europe to achieve so much. Mrs. Thatcher's intense dedication to both open

economies and the Atlantic relation will doubtless be of service to the United States in the struggle to keep a stronger European Community from turning into a Fortress Europe. There are pressures which, if not restrained, could turn Western Eu-

rope and America against each other.
But there is also a need for consolidation beyond the boardrooms if Western Europe is to maintain the example that has begun to transform the East. Go ahead and wave the Union Jack with the East. The telest but raise the one hand, Prime Minister Thatcher, but raise the blue and gold of Europe with the other.

The New York Times.

Poison Gas: Everybody Minding His Own Business

LONDON — The other face of the United Nations, its insistence on your right to commit atrocities inside our own border, will be on display

in New York until Christmas. At the General Assembly, presidents, prime ministers and others from Asia and Africa will beat their breasts over the plight of blacks in South Africa, Palestinians in Israel However, nobody from the Afro-Asian states is likely to say 2 word for the thousands of Hutus, including en and children, bayoneted to death by racially inflamed Tutsis in Burundi. Nor will much sympathy be wasted on thousands of Kurds mas-

sacred in slow agony by Iraqi gas.
The rule is clear. I can commit any racial crime against any people within my national boundaries. That is an internal affair and none of your business. The corollary bulds that South Africa and Israel are illegitimate regimes whose boundaries have no standing in law.

This annual display of UN cynicism should not cause much satisfaction in Washington. The Reagan

administration, alternately courting Iraq and Iran, has played a central role in legitimizing poison gas as a weapon of choice.

President Reagan, no doubt, was sincere at the General Assembly on Monday when be urged a conference to strengthen the 1925 treaty outlawing chemical weapons. But, as for so many Assembly orators, there was a substantial gap between words and doeds. Mr. Reagan labored long and

successfully to revive the production of poison gas in the United States.

Gas, of course, has been useless since World War I against any state with planes and artillery, with the means to abtain and deliver the stuff in retaliation. A gas war simply lumbers both sides with masks. President Nixon, no dove, understood this and renounced U.S. production in 1969. He admitted what everyone knew: Gas is useless in modern war.

But he threatened the careers of a handful of generals and lesser officers in the Army Chemical Corps. From an

Swift Ben Johnson Wasn't the Only Loser

the 100 meters.

obscure corner in the Pentagon, they began lobbying for their professional lives. By inventing a Russian threat, they won the new Reagan administration to their cause. Reaganants fervently pressed a reinctant Congress for funds to resume production.

Unfortunately, poison gas leaks from shells, and some of it killed sheep in Utah. So the clever Chemical Corps crowd came up with a binary shell, two supposedly inert gases that kill only when fused in battle. That solved the stockpile problem, but still Congress held out. The Reagan administration, aided by a credulous press, then invented 'yellow rain." The Russians were accused of waging germ and gas war in Cambodia, Laos and Afghanistan. But the tireless efforts ni Mat-thew S. Meselson, a noted biochem-

stuff was excrement from bees, Congress was bending, however. The House narrowly defeated re-

difference between Seoul and Paris. Never mind. On Saturday morning I woke Luca at dawn and via the

mysterious dramatization of radio we shared Johnson's

fabulous victory. The boy was a bit disappointed -

Lewis had only the silver medal. But what a race! The world record broken! We decided I would call him my

Ben Johnson from now on, to encourage his athletic

disqualification. He couldn't understand. Who had

taken the gold medal away from Ben Juhuson and why? What had a drug—for Luca the word has an evil ring—to do with the High Mass of sports, the 100

meters? It was complicated, painful to explain. Even

bent and celebrate his fast running.

ist at Harvard, dried up "yellow rain." He demonstrated that the

newed gas production in the summer of 1983. Bot the Senate, in a tide-turning vote, barely approved it. Vice President George Bush cast the vote that broke a tie and brought the genie out of the bottle. (An earlier Michael Dukakis might have ex-plnited this. His current, militant stance makes it an unsuitable issue.) The Senate vote was the first of sev eral administration successes, and gas production has now resumed.

The Russains almost upset this game. Even before the treaty curbing intermediate-range missiles, Moscow agreed to a limited, on-site inspection of chemical war plants in a treaty to outlaw production and stockpiling as well as use. The United States wanted more liberal inspection, and Britain proposed a compromise. Richard Perie, an assistant secretary of de-fense, accused Mrs. Thatcher's rightwing regime of "pandering" to the Russians. That stymied the treaty, ensured that gas would be made and saved those Chemical Corps jobs.

Now Iraq has shown how chemi-cal war can be waged against lightly armed guerillas who have no means to retaliate. So Afghanistan can use poison gas against its rebels; China against the Tibetans; Pakistan against Baluchi separatists; India against Sikhs, Nagas and Mizos; Syria against many dissidents; Israel against Palestinians; South Africa against blacks. All these countries also have chemical weapons, according to the Stockholm international Peace Research Institute.

As for the United States, which helped open this Pandora's box, it is hard to see how it can ever wage chemical war against the Soviet Union or any plausible enemy. Unless U.S. intelligence has found that the Sioux have again taken to the warpath.

Mr. Nossiter, a longtime foreign cor-respondent for The Washington Post who later covered the United Nations for The New York Times, writes a

the time was, and how long the distance for his short legs. The 100 meters, I told tim, was to the world of athletics what chamber music is to music; the essence. International Herald Tribune.

Campaign: Gorbachev Is Outscoring the Debaters

P ARIS — The difference between what Mikhail Gorbachev says to the Soviet people and what George Bush and Michael Dukakis say to Americans is that Mr. Gorbachev is trying to deal with reality while the two presidential candidates are doing their best to stay away from it.

That is a harsh judgement. But what else are we to say when we read the stark statements Mr. Gorbachev made last weekend about the failures of reform in his country, and compare them with what passed Sunday as a debate between the two Americans?

American politics has increasingly become an affair of manipulated emotion and image. Everyone knows this. The contest Sunday was conducted in exactly this way, prefaced by absurd struggles over the size of boxes to stand on, who the questioners were to be and the limit transcentable. be and the limits (unacceptable ones in my opinion) put upon them, and then conducted by the two candi-dates in memorized phrases written by others, avoiding all risk of expressing serious conviction or intelligence.
Were they men up there? Or the
things they have at Disneyland that walk and talk but have a dustcloth thrown over them at night?

The whole process displayed a fun-damental contempt for the voter. It is a contempt which the voter has invited. The electorate has shown that it will cast its votes according to which candidate has sweat on his lip, a 5 o'clock shadow, the warmer smile, or says "leadership" the most times. It has been willing to judge the issues according to impressions fleetingly provoked by television advertisements -themselves an amputation of political intelligence that no other major

democratic nation permits. The whole thing is giving democracy a bad name. It certainly is giving the Umted States a bad name, which is a point worth attention for what it means to the future of the country.

Americans have in the past expressed concern that the Soviet Union night win sympathy in world opinion because Mr. Gorbachev has taken the initiative from the West in arms control. The number of proposals he has made, their sweeping nature and his apparent willingness to compromise on enforcement, inspection and so on

have put Washington on the defensive. What Mr. Gorbachev has been doing is a manipulation of opinion, too, but it is based on real things. By William Pfaff

Similarly, he is dealing in reality when he lectures his people and the government apparatus on reform, resistance to reform, failures of reform and the stark prospects facing his country. He tells them to work refuse compromise, sacrifice in the interest of better times to come.

Which presidential candidate - or president — of recent years has told Americans that we "all must put on the harness and pull, pull," if we ex-pect to reduce the national deficit, produce better goods, innovate, educate children beyond quasi-illiteracy,

cope with drugs and the drug racket, house the wretched on the streets? Walter Mondale tried it in 1984, say-

watter Mondale tried it in 1984, saying that Americans had to pay taxes for what they spent; and that was the end of his political career.

The successful politicians, with few, if honorable, exceptions, tell America they have a plan — details later — to give it all it wants without cost or inconvenience. Mr. Gorbachev says to his people, "Don't accept the illusion that 'the center' or some 'good king' is going to do everything." And, "We are slow; we are losing time; we are losing

the gamble." He tells the newspapers, "Don't lead people to expect miracles," He has, of course, big problems to be realistic about. Frankness and realism are essential if he is to have any chance of bringing about a fundamen-tal change in his society. Nonetheless, the contrast between what he tells his people and what American leaders are telling theirs is very great. Outside the United States, certainly, people are thinking about that difference. The conclusion they increasingly are coming to is that only one of the two countries is being serious. International Herald Tribune.

Where Are the Big Men With Their Big Visions?

N EW YORK — The stern, surreally earnest governor is saying.
"I care very deeply about people, all
people, working people, working famlies." The anniable, goofy vice president is saying. "I don't want my
grandchild to go into an X-rated movie." Who are these guys, you wonder?

Only a couple of weeks ago, one was
driving around in a tank. At about
that time, the other was wandering
around a flag factory in New Jersey.

around a flag factory in New Jersey. That's right, a flag factory.

Can they be serious, those two? "And everyone realizes that peace through strength works and so this is where I have a big difference," says the vice president. "Let's not forget that our national security and our economic security go hand in hand," says the governor. How on earth did we get ourselves in such a fix?

Was it too much physical fitness—
thus, too much thinness and not
enough of those big men, those really
big men they used to have long ago,
with their huge, manly chests and large and dangerous visions?

Or perhaps it's just television, once again. Consider, after all, these socalled debates. Despite the presence of interviewers and the modest chal-lenge of a few questions, the debate is ence." It's as an audience that the almost entirely an audition -a com- country sees things - that the country

thought it was the era of the concerned scientist? the epic poet? the sleeping-car porter?) Half the world seems to be auditioning for the other half. Formerly obdurate businessmen hire voice teachers; 18-year-old kids "present" about the short run? George Bush was

By Michael Arlen

themselves by videotape in lieu of col-lege interviews. Politicians had been using actorish techniques for years, though not always to noticeable effect — in part because some of the older types were reluctant pupils; they didn't think they were supposed to be doing things this way, or maybe were afraid to get caught not being themselves.

But I think we're all in this togeth-

er and hypica to the American people is values in the schools," said Vice President Bush, who has been trained to keep his hands at his sides and to lower his voice below goofy levels. "I believe deeply in goals and values and the people of this country," said Governor Dukakis, who has been coached to move his hands around a bit and to smile like an orthodontist.

Imagine: a debate between presidential candidates on the subject of Being Oneself vs. Not Being Oneself. Once upon a time, the operative noun for inhabitants of the United States was "crizen." Citizenship still counts for plenty (especially if you don't have it), but for some time now petitive audition, if you will. works. So, who's in charge here?

This is the era of the actor. (You Who's really running the audition: the audience, the actors or the producers?

Over the long run, it is said that audiences usually figure things out pretty well - the collective wisdom of the race, some have called it. But what

saying, "Let them come to birth and then put them in a family where there will be love." Michael Dukakis said, "I hope you won't take my five seconds away but I will say this." Is it possible that we deserve each other?

Mr. Arlen writes about television, He contributed this to The New York Times.

In Tokyo **And Bonn** By Jim Hoagland

Foresight

P ARIS — The populations of both Japan and West Germany have virtually stopped growing, while those two socially disciplined nations continue to pile up enormous trade surploses with the United States and other nations. Curious co-

incidence or economic Darwinsm?

In either case, these developments provide a key to understanding improvide a key to undestanting in-portant economic facts of life that Americans will confront over the next few years. In the short term the news for Americans is fairly good;

beyond that, pray for rain.
The combination of demographic decline and economic success gives the central bankers, captains of finance and industry and politicians in Tokyo and Bonn enormous flexibility with fiscal and monetary policies over the coming five to ten years. After that their rapidly aging populations will mean rising expenditures, falling revenues and political headaches.

nues and postucal headaches.

I think Japan and West Germany are characteristically taking the long view and already gearing policies of these fat years to help get through the more than seven lean years to come.

They would not advertise it, of course; nor would they coordinate their actions. They are responding separately, but with the similar fore-

sight that got them to the top of the trading heap in this decade. Population growth is flattening out in Japan (half a percentage point this year) and entering a period of decline in West Germany. At the same time, both nations appear to have van-quished inflation, holding price rises to about 1 percent for the year. Spared the need to fight inflation by increasing interest rates, they will continue easy-money policies that favor new

investment for increased productivity.
In the United States, on the other hand, the Federal Reserve and commercial banks are certain to continue fighting the last war by keeping interest rates up to demonstrate that infla-tion will not he allowed back. The big-gap between the relatively high U.S. interest rates and the low percentages offered in Japan and West Germany will ensure continuation of the foreign capital flows that are vital to financing. U.S. trade and budget deficits.

Two things are new in this scenario. One is what I believe to be the clearly one is what I believe to be and West, perceived interest of Japan and West. Germany to have their investors sup-port the continuing financing of U.S. deficits during the next administration in Washington, for their own domestic reasons. They can continue to add new peaks to those mountains of debt that America has built in the past decade and postpone collecting the income until further down the road, when,

larger segments of their population are crossing into nonproductive years.
Second, Bonn and Tokyo are now. in a much better position to compelthe United States to continue piling up debt for a while longer, even if the new president has other ideas. The alternative is a dollar-smashing flight from U.S. assets by the Germans and Japanese that surely would trigger the re-

cession that many expected a year ago. In the absence of a recession, the dollar is not likely to fall much from its current levels over the next year or two. Neither will the U.S. trade deficit, after this year's improved performance. And U.S. productivity in the export sector has probably peaked at about 84 percent of capacity.

The reinforcing nature of these monetary and economic trends, and the first peaker of the control of the cont

the firm anchoring of Japanese and West German policies by their new demographic realities, is not getting sufficient attention in the international financial community. The lack of clear guidance coming out of this week's annual meeting of the World Bank and the International Monetary

Fund in Berlin is a good example.

The world's big-time money managers seem to have been operating in grease here and tightening a loose nut there, with delicate little exchangerate wrenches. The old buggy has performed suprisingly well this year or so the assorted finance munistress. ters, central bankers, IMF technicians and others are saying. They are cans and others are saying. They are also muttering (but voce more sotto than usual, in this American election season) that it is likely to be a rocky ride next year unless their advice on deficits is adhered to, and pronto.

Everything else being equal, they undoubtedly would be right. But Janan and West Germany has presented.

pan and West Germany have reasons to play it utherwise and to suspend the laws of economic gravity for a while longer. It is vital that the next U.S. administration not squander the breathing space that the graying of its major trading partners may bring.

In the middle of the afternoon the world learned that Chancellor Hitler had invited Premiers Mussulini, Daladier and Chamberlain to a conference in a last effort toward a peaceful solution of the Czechoslovak question. The conference will be held in Munich. Its

object is a four-power agreement for the transfer of the Sudeten territories to Germany without the use of lorce. The announcement sent a thrill of joy and relief coursing thoughout a worl almost resigned to an immment out-break of general hostilities. In the morning Mr. Chamberlain appealed to to Premier Mussolini to intervene with Chancellor Hitler. The Duce accepted and immediately got in touch with the Fuhrer by telephone. The announcement of the conference was made a few minutes after the Mussolini-Hitler telephone talk.

EC rank Bank

Banking and Finance / Toward a Single Market

Milestones and Obstacles En Route to Integration

of change in Europe. Without the free movement of capital among the 12 European Community nations, there would be little point in the tree ement of people, goods and ser-

Consequently, the forthcoming changes in banking and other financial services are a cornerstone for the EC's goal of creating a truly single market by 1992. Jacques Delors, the president of the European Commissison, the EC's 17-member policy-making body, says that opening up the savings and other money resources of the EC's 320 million residents will "enable our financial services to catch up with New York and Tokyo."

However, forming a financial tree zone remains one of the most daunt-

The first step: free capital flow by 1990

ing and ambitious aspects of "1992." Many problems are yet to be resolved by the European Commission, the 12 finance ministers and the European Parliament before the member countries can coexist under the proposed Single Banking License, What will the standards be for interest rates and capital adequacy? Should banks be regulated by their home countries or their host countries? Is the next logical step a common European cur-

rency and a central European bank? The EC directives covering banking and other financial services, including securities, have three primary goals: abolishing all money exchange controls among member countries; allowing banks, securities houses and other financial institutions to sell'their services anywhere in the EC; and guaranteeing the freedom of those

and Luxembourg.) Among the four must lift their currency controls by 1992 and Greece and Portugal by

· Lifting controls means that France must no longer prohibit French citiish, Spanish or other non-French EC banks. Italy must no longer ban its banks from lending to Greeks, West Germans or other non-Italian EC citizens. Spanish banks must be allowed to make loans in pounds, francs and German shares in Denmark and Bel-

For banks within the EC, there will be both winners and losers, and some experts predict that by the year 2000 the EC will be dominated by a relatively few megabanks and clusters of regional banks that have developed alliances. The increased competition will put pressure on profit margins and

Technology will become more important as institutions race to modernize. Some will carve out specialist niches, while others will expand, largely through mergers, joint ven-tures and other forms of alliances in

Interview / Pierre Bérégovoy, French Minister for Finance and the Economy

Source: The Banker, July and October 1988.

Bérégovoy: The Need for a Common Monetary Policy

Pierre Bérégovoy, France's minister for finance and the economy, outfined his views on European monetary tasues and other topics. The interview, which took place in Paris, was conducted by Axel Krause, corporate editor of the International Heraid Tribune. Following are excerpts from the interview:

How would you describe Europe's weight today as a player on the world monetary scene?

First, it is absolutely essential for Europe to speak on a basis of equality - with the Japanese and the Americans - on economic issues, and with the Soviets and the Americans on potitical issues. When it comes to monetary issues, it is clear that Europe has weight and is a force, but to be truly effective we must have a common monetary policy.

What is the problem? Unfortunately, a common monetary policy cannot work effectively as long as Great Britain remains outside the EMS exchange mechanism.

So what happens in the meantime? I am pragmatic. We need to advance step by step, letting market forces work, end coordinating our interventions in the market in keeping with our agreed-upon objectives. This means keeping our national currencles for the time being...determining together the value of the ECU with regard to the yen and the dollar.

What do you say about a Central European Bank?

You will not hear me talking about a Central European Bank, but rather about a central bank of central banks - as a first step. I would consider later the idea of a single, central European bank. We need intermediate

What would your central bank of central banks do?

Receive foreign currency reserves from national central banks. Its primary mission would be to manage the parity of the ECU with regard to the yen and the dollar. That would be a way of coordinating our monetary policy, and would represent a first step. Anything that helps us move to better coordination of our policies on ex-

What is the importance of the date

It is the deadline for the end of that year, but it can also be seen as Jan. 1, 1993. What we refer to as 1992 is, above all, a process, a continuing process. And there will be forestalling, and delay, including for the full harmonization of taxes in the Community. The essential thing is that the process not slow down.

Who do you see as providing the leadership?

A dynamic Europe should, and will, be built around the Franco-German duo. That relationship, I should emphasize, is not aimed at excluding anyone. But it does allow France and

Germany to show the way. What is your reaction to the widely held impression that France is block-ing progress on harmonization of EC value-added taxes?

First, it is clear that the EC Commission's proposals are too rigid. The Prime Minister [Michel Rocard] expressed the anxieties of France. My personal opinion is that we need to continue the discussions.

In light of the decisions taken at the Hannover summit meeting in June, what progress is being made on EC taxation of savings?

09 The World's Rendezvous With Europe

Insurance / Directives and Differentials

Taking No Risks With Billions in Tax Money

The European Parliament, having pushed through one insurance directive, is poised to proceed to the next. The insurance sector is gathering its forces and laying its plans for the coming decade. And in Brussels, the European Consumer's Association is still wondering when, if ever, the EC will resolve its internal tax differen-

"1992 is a catalyst, its effect is to focus attention on the Issues. It's making things happen faster," comments Brian Griffin, EC Research Coordinator for the British Royal Insurance

Royal Insurance, which last year picked up only 10 percent of its premiums in Europe, is interested in building up its share of the EC market. But. in Mr. Griffin's opinion, the idea of a

The non-life directive is due to be in force by 1990

common policy that could be issued to consumers in every European country is still "a long, long way away." Today, according to Peter Segaar, a corporate planner with Aegon insurance in The Hague, Royal Insurance is among the small number of giants - including Allianz, Zurich, UAP and Generali - that can consider themselves invulnerable.

The cluster of companies in what he terms "the second division" could all become targets for takeover by others seeking to broaden their portfolios and European coverage. These targets are loosely defined as having revenues of around \$5 billion and a market capitalization of \$2-4 billion.

In this context, attack is often the best means of defense, Patrice Allain-Dupré of the Paris-based Compagnie du Midi concedes that one of the major gains his company made by acquiring British insurers Equity & Law was to strengthen its capitalization.

Steve Schleismen, who heads UNAT, the European arm of American insurance glant AIG, is confident that more insurance capacity and greater choice will be available to European risk managers in coming years. But ha adds: "I believe big changes are coming in the industry because big changes are coming in society. But 1992 is not a political issue, it's a business issue, and the politicians are being reluctantly dragged along behind.

The checkered history of the recent non-life directive, ratified by the European Parliament in June, lends weight to his argument. The directive allows cross-border trade in non-life insurance for companies with more than 500 amployees or a minimum turnover of 24 million ECU (\$29.7 million), and could affect from 70 to 80 percent of all non-life insurance written in the EC.

Due to come into effect in 1990, it covers marine, aviation and transport risks, credit and surety insurance, fire, general liability, property

that freedom of insurance was inherent, even in the absence of a specific directive to that effect, under the Treaty of Rome. The case, centering on marine insurance and brought against Germany, was based on that country's reluctance to change its own national laws in accordance

with the 1978 Coinsurance Directive. The experience showed how easily, while defining the letter of the law, the true spirit of an open market could be missed. Similarly, embedded within the current directive is the proviso that taxes will continue to be collected, at the current rate, by those states within which a risk is Insured.

Commenting on the June directive. Robert Schmitz, legal counsel for the BEUC in Brussels, points out "Taxation is certainly one of the hardest parts, and not really tackled. Wa see very little possibility of that particular problem being solved by 1992."

"It was either that or no directive, explains an official in Brussels. "Little by little..." He puts 20 years of effort into perspective by patiently explaining how national regulations, standarda of living, fiscality, terms and contracts all had to be taken into The Tax Gap

By favoring mutual recognition rather than harmonization, the EC has endorsed the existing tax structure on insurance. For the Euroconsumer, this means tax levels can differ by up to 30 percent from

consideration for six, nine, 10 and subsequently e dozen nations. Indeed, even the latest directive is

being phased in between 1990 and

1995 to allow Spain, Greece, Portugal and Ireland additional time to develop their indigenous industries. By then, the EC will have intro-

duced a directive allowing insurers to cover life insurance risks across the

continent. If the problem of taxation had been resolved, such a move could have offered immediate benefits to European consumers. But national governments are understandably reluctant to surrender such a lucrative source of funds: France collected some FF 2.2 billion in tax from the life Insurance sector in 1986.

Banking and Finance / Toward a Single Market

Milestones and Obstacles En Route to Integration

Continued from page I

for \$600 million there have been dozens of such alliances within the financial sector, both cross-border and do-

Dutch Institutions, for example, need to expand because, despite their sophistication in banking and financial markets, their domestic market is too small to allow significant economies of scale. As a result, Amsterdam Rotterdam Bank recently entered a joint venture with Générale da Banque of Belgium, a move that not only expands their services, but also discourages takeover predators.

Spain has a larger domestic base, but its institutions also need to expand because they are smaller and less sophisticated than those from other countries that will be opening branches across the street. As a result, two of Spain's largest banks, Banco de Bilbao and Banco de Vizcaya, recently merged.

Despite the new ability to open branches in other countries, it appears unlikely that even the biggest European banks will undertake tha astronomical expense of expanding comprehensive retail networks to other countries.

'Cross-border sales could mean teams of traveling bank salesmen wandering the Continent with a terminal or a home bank in their briefcase." says John Quinton, chairman of Britain's Barclays Bank, "Perhaps more likely is the prospect offered by new technology for home banking any-

where in Europe." For banking customers, a single financial market promises a wider variety of services and products from banks, including computerized home banking, EC-wide credit cards, automatic funds transfers, insurance, share dealing, fund management, mortgages and even travel agencies.

According to a Price Waterhouse study, the cost to consumers of banking services will fall by 11 percent across the EC; 5-8 percent in the Benelux countries, 9 percent in Britain, 13 percent in France and West Germany and 20 percent in Spain. The cheaper cost of financial services will help reduce inflation across the EC by 0.7 percent and add 1.5 percent to the

EC's gross domestic product. Those figures, of course, are based on the assumption that the EC members resolve their many differences. Some obstacles are largely techni-

cal, such as setting standards for capital adequacy and solvency. Rules must be established for counting assets and setting assessment-versus-

Another technical obstacle is the formula for calculating and publishing

interest rates. There are currently four different methods of calculating rates within the 12 countries, and those rates can vary on an annualized basis by as much as a half e percent. Some standard must be set so that the 10 percent rate advertised by a bank in one country equals the 10 percent advertised in another country.

In approving the directive lifting currency controls last June, the EC finance ministers instructed the European Commission to come up with e compromise on taxation. France, particularly, fears that lifting controls will trigger a flight of capital to other countries where taxes are lower.

"The possibility for each state to safeguard methods for financing priority economic sectors should also be assured without Ilmitation. What sense would the creation of e unified market have if a financial product is still taxed at 10 percent in one country and 33 percent in another?" asks Maurice Benusilho, manager of the Centre National des Caisses d'Epargne et de Prévoyance in Paris.

Two other aspects of single-market financial services are controversial because of Britain's concern. One is the provision that banks, even those operating in other countries, continue to be regulated by their home countries rather than their host countries. Britain fears that its new, more stringent Financial Services Act will hamstring British institutions trying to compete against institutions from other countries.

The EC says that competition will gradually force standardized regulation. Geoffrey Fitchew, director general of financial institutions and company law for the EC in Brussels, says banks competing in their own countries with foreign banks that offer more services "are likely to prove effective lobbyists for new treedoms."

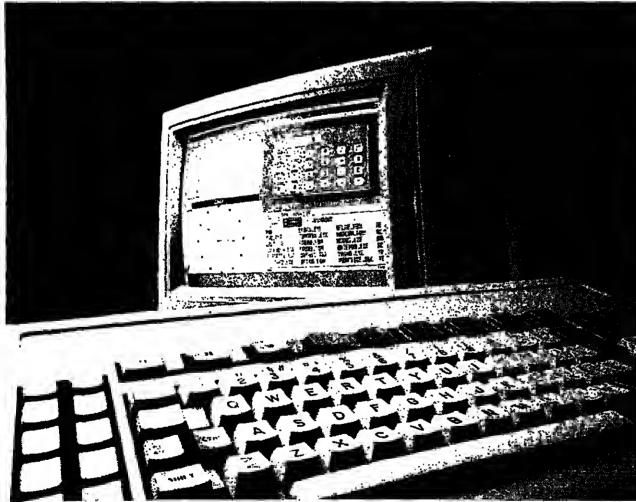

But Timothy Sweeney, deputy head of banking supervision for the Bank of England vows, "We will not support e general drift to the lowest common

Britain is also concerned that it will be unfairly penalized by the EC banking directives' proposed rules on reci-. procity. These rules say that non-EC banks may be barred from operating anywhere within the EC if they discriminate against or deny access to EC banks that want to operate in that

In Britain, where 400 of the 600 banks in the City of London are foreign-owned, the fear is that, for example, all U.S. banks might be ordered to: close down if Italy or Greece were to claim that there weren't enough Italian or Greek banks in the United States,

Retail Banking / In Pursuit of the Euroconsumer

Consumer Credit Given Top Priority

Seventy-two percent of banks taking part in a recent survey conducted by the European Financial Management and Marketing Association (EFMA) placed their main hopes for increased profitability on retail-sector business. Consumer credit was seen as the biggest potential earner, and most correspondents stated they were giving top priority to reorganizing their branch networks.

The single internal market already exists in the banking sector. It will radically after the rules of the game," suggests KPGM Peat Marwick Consultants in a report drawn up for the French banking association. "Competition in the provision of financial products and services to private cli-

A plastic credit card could be the passport to Europe

ents will get much fiercer," claims the

report.
"The completion of the single market will involve the total abolition of all remaining exchange controls. Thus individuals will be able to hold bank accounts in any EC country," comments Serge Boutissou, European director of the Crédit Lyonnais bank in Paris. "Freedom to provide services will lead to escalation in the number of products on offer to private customers, including consumer credit, home loans and all forms of unit trusts [mutual funds]."

Finance Indosuez Techniques (FIT), a part-owned subsidiary of indosuez Bank in Paris, proposes e scheme under which it can cover customers' investments with option contracts available on the financial futures markets. Would-be subscribers will need an initial stake of at least FF1 million (\$157,000).

"We are considering extending this package to include securities quoted in other centers such as London, Amsterdam, New York and Brussels," indicates François Barthalon, chairman of FIT and director of the parent bank's financial markets department. "In the longer term we hope to attract foreign investors as well as a local

Abbey National Building Society, Britain's second largest provider of

mortgage finance for house buyers, is the first British building society to try its luck on the other side of the Channel. "We are offering mortgaga loans to the Spanish public on conditions similar to those obtainable in the U.K.," explains Paul Gardner-Bougaard, Europe and offshore development manager at the Abbey head office in London. "For instance, repayment can be linked with endowment life insurance, terms can stretch to 25 years, and interest rates are variable throughout the life of the

British residents who find their dream cottage in France can turn to the U.K. office of the French Crédit Agricole group for help. "The loan can be made in either francs or pounds," explains Françoise Billon at the group's central office in Paris. "Our London branch deals with the paperwork, and funds are available through the local Crédit Agricole in the same region as the house."

However, mortgage lending remains one of the most domestically minded sectors of personal finance. Procedures are closely tied to the varied real estate laws of each EC member country, mortgage funding methods differ widely, and in many cases loans are still extended through specialized institutions subject to government regulation based on national housing policy.

. In Spain and Italy, for instance, the government uses special long-term instruments to direct financing techniques. In France, the state-run Crédit Foncier accounts for over 30 percent of the total market, while in Belgium two para-statal bodies deal with all subsidized mortgage finance and account for some 42 percent of the total home loans market. Savings banks and specialized mortgage lenders dominate in West Germany, and mortgage conditions are tightly regulated.

A draft EC directive on mortgage lending has so far failed to obtain general approval, and the Commission in Brussels is now taking a different approach. "As a first step we are trying to include home loans organizations with other credit institutions in a general directive," comments a Commission official. "This will deal with mutual recognition of licenses.

Wa can then see whether a special mortgage provision is still needed."

EC member states recently introduced a common format for national identity documents. But the plastic bank card could soon become the real passport to Citizens' Europe.

"It is important for the Community that cards issued in one member state can be used in the others," the Commission reminded the Council of Min-Isters at the beginning of 1987. "Technical compatibility must therefore be the aim, to be achieved notebly through standardization. In this way the Community will take a major step toward the completion of an internal market for payment systems."

Each country has its own network of automatic cash dispensers and point of sale systems, while three major card systams currently compete across Europe. Eurocheque is e paper-based check quarantee system. launched in 1968 with backing from West German banks. It is now pushing into the electronic age by offering international links to members.

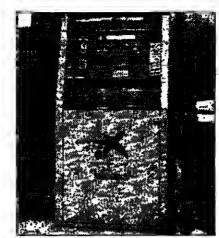

Eurocheque also has a 35 percent shareholding in Eurocard, a charge card system prevalent in Northern Europe. Visa International, a spin-off from the BankAmericard launched in 1958, but now an independent organization, is strongest in the south.

Forty banks from 17 European countries form the membership of the European Council for Payment Systems, set up in 1978. The card system operators are not admitted to membership, though each bank in the council adheres to one or the other of these systems.

in October last year the council concluded an accord aimed at making all their payment cards and systems compatible by the early 1990s. This agreement covers both automatic teller machines and point of sale setups.
"The council does not itself operate

any payment networks," explaine Thomas Stattery at the organization's Brussels office. "Rather it provides a forum for senior bankers dedicated to the orderly development of payment systems in Europe."

Some fear the development may be a bit too orderly, and that the accord will be anticompetitive in its effects. particularly with regard to nonbank

The major card systems currently compete across Europe.

card issuers. The EC Commission is examining the competition aspects, and has also drawn up a coda of conduct for payment systems agree-

"Ona of the largest growth areas in Europe over the next 12 years will be that of proprietary and 'affinity' cards, especially among retailers," com-mented James T. Larkin of American Express. "There will be more such retailer-issued proprietary cards in the vear 2000 than there will be those associated with credit institutions," Mr. Larkin added, speaking to e meeting of European bankers In Nice earlier this year.

As Europe opens up and banks and their competitors scramble for the available business, prospective customers at the top of the economic heap are getting the most attention. "High-net-worth individuals, top managers and young people are priority targets," reports EFMA.

Branch networks are being trimmed to push further automation of routine operations and concentrate staff on sophisticated tasks such as investment advice, "Europeans on average take on far fewer debt obligations than Americans," comments Michel Demont, a partner in Peat Marwick. To attract business and boost profits, banks and other credit institutions will encourage favored customers to borrow as much as possible.

"Top-of-the-range customers are limited in number, alreedy much sought-after, and will doubtless become ever more inclined to shop around," EFMA points out. "Is it really possible to build e European network on such a narrow base?

Michael Rowe

Diplomacy / Summit Fallout

Fortress Europe?

The Aspen institute for Humanistic Studies prides itself on organizing quiet, high-level meetings on crucial issues, which rarely attract much outside attention. But last month, behind the closely guarded walls of the medieval Canlsy chateau in Normandy, sparks flew over one of the key issues on this year's agenda: 1992 - Its implications for Europe and the

Raising the prospects of increased trans-Atlantic conflict over tha 1992 plan during the next year, senior European and American businessmen and political leaders attending Aspen's annual world economic seminar were unusually blunt. "After hearing what I did here, I'm even more negative about Europe than when I came," said Senator Bob Packwood, Republican of Washington, one of about 50 participants. "These people don't want free trade at all, so as I told the meeting, we should push them as hard as we can to be more open - or

eise look to our friends in Asia." More moderate, but equally ominous reactions about Europe's apparent drift toward protectionism came from other participants, which included senior executives from AT&T, IBM, Goldman Sachs, Compagnie Saint-Gobain, Matra, Havas, Flat, and the World Bank. Responding to the harsh criticism, EC Commission official Jérome Vignon said that although the Community's push for a borderless Europe was "Irreversible," it will seek to avoid discriminating against non-EC companies operating within the EC. "Ha did his best to defend Brussels, but many of us were unconvinced," said one of the executives. "And we are worried."

Some Aspen participants warned the EC Commission that it was failing badly in communicating its message about 1992 to its trading partners, notably in the United States and Asia. "Brussels doesn't seem to realize thet tha farther you are from Europe, the dimmer the message, and the greater the misunderstanding," said Jacqueline Grapin, economics correspondent in the U.S. capital for Le Figaro and a board member of Aspen. "My feeling, and of others in Washington, Is that they should be trying to improve the 1992 image - tast, before It is too late."

At e news conference in Paris following the conference, Richard N. Gardner, former U.S. ambassador to Italy and co-chairmen of the seminar, said that a report on the meeting was being prepared for the new American president and would be delivered shortly efter next month's U.S. election. Gardner said that he and former U.S. trede representative William Eberle, co-chairman of the conference, will recommend to the new president that his administration pressure Europe to make sure that 1992 protects the interests of the United States, while remaining committed to an open global trading system.

At the Canisy Chateau in Normandy. Left to right: Robert McNamara, former head of the World Banic, Umberto Agnelli, vice chairman, Flat group; Hisashi Owada, Japanese ambassador to the OECD; Denis de Kergoriay, director of Canisy and Gauthier Sauvagnac, senior French government official.

Annual net profits are over \$ 300 million per year.

Three ways of stepping into 'Europe-without-frontiers'.

Changes, challenges, and competition. The leading European companies of the 1990s are already building cross-border trade, just as they're deep into strategles for the future.

Insurance is the netural caution of the entrepreneur, the reflection of planned risk. And UNAT understands risk and creetive business. They are the factors which have been driving our parent, AIG, to become the leading American commercial and

industrial insurer, with impeccable triple-A reting and a network of directly controlled offices in more than 130 countries and territories. UNAT is AIG-in-Europe.

If you are already trading across the European continent, you deserve a single global insurance provider that has offices in all continental European countries and which has already taken a position on the new Europe. Because 1992 is for the bandwagon, and UNAT is for the up-and-running.

Central European Bank / The Debate Intensifies

Monetary Union Versus Independence

Pipedream, necessary evil, good idea, or plain common sense: These are just a few of the reactions that mention of a Central Bank for Europe can elicit from politicians, bankers, industrialists and Eurowatchers in

Although the idea has become a focus of tough talking only in the last few months, it is not new. For the supporters, some kind of common central authority to take charge of e common currency is built in to the principle of Europeen monetary union, which itself is enshined in the Single European Act. So why the howls of anguish and the declaration of British Prime Minister Margaret Thatcher "not in my litetime" when the question is raised? And, if mone-tary union is inextricably linked to the

Europe has the choice of three formats to follow

success of post-1992 Europe, why have the 12 European Community (EC) countries waited until now to bring it to the negotiating table?

One answer is the political and technical complexity of the issues involved. Thatcher's resolute opposition to the proposal illustrates the political hurdles. While stating her opposition to the idea of e central European government, she also says she could not envisage Britain's renouncing control over monetary matters - the responsibility of e central bank - until there is political union of the 12.

With monetary union, governments would no longer be able to devalue their currency to recover export competitiveness, Instead they would have to let real wages fall, a risky endeavor politically. Moreover, by pooling their cash reserves, they would be sharing their wealth as well as their burdens. In contrast to Thatcher's opposition, France is enthusiastic on the whole, Germany seems to have warmed to the idea recently, and Italy, Belgium and Holland are in favor of the princi-

Divergences among Europe's central bankers surfaced clearly at the first meeting in Basie early this month

of a high-powered committee created "at last June's EC ministerial summit. The committee, chaired by EC Commission President Jacques Delors, is to propose "concrete steps toward economic and monetary union."

The 17-member group is due to complete e draft report in April so the Community's finance ministers can mull over the conclusions before discussions begin in earnest at the Madrid summit next June. The committee, made up of the central bank governors of the 12 Community countries, three "wise men" and two EC representatives, got off to a "positive" start in Basie, participants said. But as they could not agree on the importance of monetary union, not even the vaguest of timetables for reaching the goal was set.

Politicians do not always have the last word over monetary issues. In West Germany, the central bank (Bundesbank) acts independently of government, whereas in France, Italy and to an extent in Britain, the position is reversed. So even if countries agreed on the notion of a central European bank, they would still have to decide who would pull the strings: the governments, the 12 central banks or the European institution itself. Basically, this leaves Europe with e choice of three formats for e common authority. The EC could either replace the national central banks or set up e U.S.-style Federal Reserve System controlled by the 12 central bank governors. Alternatively, it could opt for coexistence, with central banks transferring some cash to e Bank of Europe in order to fund the issue of European Currency Units (ECUs).

Valery Giscard d'Estaing, former French president, end Helmut Schmidt, former West German chancellor - ardent advocates of monetary union - tavor e Federal system and the use of ECUs alongside countries' own currencies. But apart from the political stumbling blocks facing these ambitions, e more immediate question is whether 1992 is doomed to failure without monetary union. The pro-union lobby fears that free crossborder flows of capital from 1990 will already strain the European Monetary System (EMS), the present mechanism for controlling exchange rates between most of the major European

currencies. Advocates of integration argue that cash would pour into countries with strong currencies (West Germany in particular), depriving the others of foreign investment and fur-

ther weakening their currencies. Even if 1990 comes and goes with no monetary union and no catastrophic consequences, the next flashpoint will come when the trade barriers fall in 1992. Already goods are shifted around to take advantage of exchange rates, thus putting pressure on distribution networks, according to Bertrand de Maigret, General Representative of the Paris-based Association for the Monetary Union of Europe, "It would be an anachronism to have the free movement of goods without e single representative value," he said. Industry is now taking over from politicians in accelerating the ad-

vance, Mr. de Maigret added. Economists do not necessarily consider that monetary union should be a top priority, however, "The success of the single market does not depend on e central bank, although it would help," said Rainer Veit, Senior Economist at Deutsche Bank. He thinks it highly unlikely that monetary union either should or will be reached in the foreseeable future. "More urgent and controversial tasks like harmonizing taxation and subsidies should be tackled first," he said.

Europe must follow a logical order of events, e French government official said. "It should first strengthen the EMS, then introduce a single currency, and finally set up e central bank," he added.

Paul Home, International Economist at the U.S. investment house Smith Barney, Harris Upham in Paris, thinks a common European currency will operate in parallel with national currencies in the medium-term, while the "phenomenally successful" EMS is perfected further. "There will be no miracles in the Christmas stocking in 1992," he said, "The danger is in presenting the single market as a pipedream - it should be e process of evolution."

Bankers welcome the prospect of monetary union, but feel it is up to governments and the authorities to commit themselves to implementation. "The banking sector has played its part in promoting the use of the

British Prime Minister Margaret Thatcher: "We should not try to run before we can walk."

ECU," said Gilbert Lichter, General Secretary of the 83-member ECU Banking Association in Paris. (The Association is the clearing house for ECU deals.) "Bank assets denominated in ECUs soared from \$28 billion worldwide at the end of 1984 to \$110.2 billion in March this year," he said. "But more than 80 percent involved interbank transactions, which shows the ECU is still a long way from the man in the street."

Overall interest in the currency inside and outside the EC has intensified this year, however. The British government announced recently it would issue short-term Treasury Bills in ECUs, Lichter pointed out. "Three Japanese banks are already members of the Association, and others have applied to join," he added.

Wilfried Guth, president of Deut-sche Bank, explained recently that monetary union would increase productivity in Europe, improving com-petitiveness and promoting economic growth. This, in turn, would boost banking activity and profits, he said. But on the negative side, banks would lose some of their foreign exchange earnings if Europe adopted a single currency.

Although the debate over a central bank will no doubt rage on, no decision can be expected until next year after the committee chaired by Jacques Delors has delivered its recommendations on "concrete stages" toward monetary union.

The advent of a central European bank might seem remote now, but es Deutsche Bank's Veit said, James Bond probably got it right when he said "never say never."

Consultants / Making a Market

Expertise is in Demand As Countdown Continues

"Are you ready for 1992?" asks a questionnaire sent to company chiefs by KPMG Peat Marwick Consultants in France. Throughout Europe, con-sultants believe the answer is "no," and are setting out their stalls accord-

Suddenly everyone from university professors to organizers of business conferences is peddling wisdom on the coming single market. Firms offering advice range from long-established multinationals to outfits where the chief executive mans the switchboard and makes the tea. Accountants, management consultants, busi-ness schools and International law

Consultants could earn \$200 million this year

firms are all eager to sell their exper-

"Financial services and transport could be two key areas," comments Christine Petzold, head of CP Consult near Paris. "One of our main aims is to help clients keep abreast of developments in Community legislation and support them in their relations with the European institutions."

Each major capital has its own crop of Euro-advisers. Brussels shelters the largest single concentration, with some 200 firms currently offering packages related to 1992. According to a recent survey carried out by The Economist in London, the total market across Europe could bring in more than \$200 million this year.

American firms are already well-embedded in the business. Knowledgeable lone rangers willing to provide the benefit of their individual experience include former EC Commission staff members, diplomats, journalists and business executives who have worked in Brussels. Fees can reach \$1,000 a day.

One newcomer is Euromanagement Consultants, a small French company that set up shop in Paris at the beginning of the year. With a total staff of 10, it is specializing in financial Sector studies, and propates reports

for general sale as well as advising

individual customers. For many of the larger firms, corporate restructures and help with mounting or resisting cross-border takeover bids are particularly profitable fields. Companies look to us for different things according to their size and international experience," explains Gérard Van Kammel, chairman of Arthur

Andersen in Paris. "A large multinational will have considerable in-house expertise, end might turn to us for advice on one or two specific strategic issues," Van Kammel continues. "A smaller company may need detailed help with e whole range of subjects, including competition and tax policy as well as more general planning questions."

The effects of Community regulations and directives in particular sectors are e good source of business for specialists setting up their own con-sultancy practices. Complex technical standards in the telecommunications industry and health rules relating to agriculture provide two examples.

Not everyone feels the need to go outside for advice. For instance, ICI in London relies on its own internal plan-

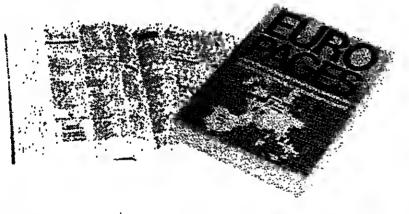

ning department. A number of large British banks have hired eminent academics or other consultants to tell them what Europe is all about.

Will all these advisers be celebrating the end of their jobs on New Year's Day, 1993? Almost certainly not. Few experts think that the single market will be fully operational by that date. Even when it is, consultanta can hope for continued pickings from companies grappling with the new

Michael Rowe

How much British interest will these pages yield for a German banker today?

Every entry in Europages is a gilt-edged investment. For Europages is the only directory of its kind which extensively covers the European market and appears in Dutch, English, French, German, Italian and Spanish editions.

It lists banks, stockbrokers, finance companies and insur-ance agents from Madrid to Bonn and London to Rome. Puts their names and numbers at your fingertips. And can also be used to find a hotel, flight and car rental company if you plan to visit in person. Because Europages is a business to business directory.

From language to language, the information in it stays the same. So wherever you are, it shows the market at a glance.

And that market is changing. After 1992, with the liberalization of financial services,

clients will be looking farther afield. A Spanish businessman might hold a German mortgage, buy shares on the London stock market and shop for Italian insurance.

Europages is the integrated answer to this integrated market. Which is why 317,000 companies already rely on it as their direct line to Europe. With it, they can reach 140,000 companies in 600 key sectors.

Like the transport company in Toulouse which uses it to find fleets of trucks in Spain. The British manufacturer which uses it to order chemicals from Germany. And the company in Eindhoven which uses it to buy Belgian components.

> That amounts to a lot of current interest. And makes Europages a sound investment for the future, in anyone's lan-

While many American and European financial institutions have been retrenching since last October's Black Monday, the Japanese banks and se-curities houses operating in the EC seem intent on continuing to grow in anticipation of 1992.

Yamaichi, one of Japan's - and therefore the world's - leading investment houses, is an example. Since the stock market crash last October 19, Yamaichi International (Europe) Ltd., based in London, has won a U.K. banking license and staked out its claims to become a major player in European corporate finance.

Like a number of other Japanese firms in the EC, Yamaichi is taking advantage of the skittishness among American and European competitors to hire away experienced employees

First-quarter investment in Europe: \$1.5 billion

who have been laid off or become disgruntled by the retrenchments.

The strong yen and Japan'a huge trade surpluses have given its banks and investment houses huge capital reserves and allowed them to operate at higher volumes and lower profit margins than their competitors.

Consequently, the Japanese financial houses in Europe are scooping up business that has been neglected by the American and European firms their post-crash concentration on high-profit cores.

Unless more European banks and investment houses begin gearing up to compete for single-market business, some experts warn, the Japanese firms will have a commanding position. Gary Hamel of the London Business School says: "1992 is not about European competitiveness, it is about global competitiveness for European companies.

Only 31 of the 600 banks in London are Japanese, yet they account for 36 percent of London's international banking business, compared with just 13 percent for U.S. banks based in London, Among investment houses, five of the top six firms in lead-managing Eurobond Issues are Japanese. Nomura, the leader, last year managed more than \$18 billion worth of Eurobond issues, nearly twice as much as the nearest non-Japanese competitor, Crédit Suisse First Bos-

Yamaichi, one of those Japanese firms leading the Eurobond league taJapan / Corporate Finance

EC Becomes Battlefield for Investment Houses

bles, sees a boom in corporate finance growing out of tha EC's march toward a single market.

Michael Hutchinson, director of corporate finance at Yamaichi's European headquarters in London, cites the many companies - not only European, but also multinationals - that have been and will be raising money

and repositioning themselve "There are significant 1992 opportunities, especially in mergars and acquisitions, and aspecially among companies that have to take into account the effects of 1992 on their mar-

Yamaichi, like other big Japanese institutions, is offering itself for tullservice, one-stop shopping for all manner of cross-border deals: money moving from Japan to Europe, from Europe to Japan and, less often, from one European country to another.

Mr. Hutchinson says there have been several instances where European firms come to Yamaichi seeking Japanese buyers, and Yamaichi has found them better deals closer to home, with other European firms. "It's happened, but unintentionally," he says. "I don't think at this stage e company would engage us purely to find a European buyer.

Some observers, notably David Shirreff, a consulting editor for Risk magazine, believes Europe's single financial market could prove to be a staging area for the expected showdown for world dominance between U.S. and Japanese investment houses when those countries lift their rules barring banks from the securities field and vice versa, as they are expected to do by the end of the century.

Europe is the only place where full-service financial Institutions are permitted to operate," Mr. Hutchinson points out. "In the U.S. you have to be either a bank or a securities house. It's largely the same in Japan."

However, he says the Japanese thrust toward full-service institutions in Europe would be happening even without the prospect of a single market. Despite the Increase in corporate finance activity, he says, considerable doubt remains over the development of the overall securities business in

"The hope of the promoters of the

integrated European market is certainly that Europe will become as large a market as the United States and more significant, but I guess there remains a certain amount of skepticism among both American and Japanese, especially given the track record of non-cooperation among the European countries," he says. "Generally, Japanese companies are more concerned with getting into the U.S. securities market. They're not con-

On the other hand, a recent report by Salomon Brothers in London predicts substantial growth - 5 to 10 percent per year - in investment in foreign equities by 1995, and cites the

vinced about the market in Europe."

EC's single market as one of the major forces behind this trend.

The report by Michael Howell, Salomon's chief European strategist, says that many corporate restructurings among EC companies will take place, primarily through stock exchanges. He expects a considerable boost in cross-border equity flows among EC

The report said that during the first quarter of 1988, Japanese investors poured more than \$1.5 billion Into Europe, most of it on London's International Stock Exchange, compared with just over \$1 billion Into U.S.

It further noted that, in 1987, Japa-

nese investors overtook the British as the largest investors in global equities. To tacilitate further investment from Japan into the EC, many firms are expanding into Europe. Nomure, for

Brussels. Also, several Japanese commarcial banks have announced that they will begin offering corporate loans to EC companies, concentrating first on West Germany. Sumitomo Bank opened its Frankfurt offica in early September, and Fuji Bank follows in

instance, is now planning to open re-

search offices in Pans, Frankfurt and

Another Japanese bank, Mitsubishi Trust, is opening its Frankfurt operation next year in e joint venture with West Germany's Westdautscha Landesbank.

Meanwhile, some European leaders are bridling at the Japanese expansion into the EC at a time when the foreign share of the assets of Japanese financial institutions is dropping - from 4.4 percent in 1979 to 3.8

percent in 1987. The Bank of Japan says foreign institutions' stake in the Japanese banking industry has declined from 3 percent in 1979 to less than 1 percent in 1987. Even in toreign exchange, historically one of the strengths of foreign banks in Tokyo, their share has fallen from 38.5 percent to 31.4 percent since 1979.

In London, Yamaichi's Hutchinson says he is not overly concerned about the proposed reciprocity provisions in the EC's 1992 directives. Under those proposals, Japanese firms could be barred from operating anywhere in the EC if Japan discriminated against any individual EC country or firm trying to do business there.

There's nothing new in that, really," Mr. Hutchinson says. "The threat has been around for a long time from Individual European countries. What's new is the possibility of a unified

He adds, however, that he doesn't think Japan deserves the image of a country trying to keep foreign firms out of its markets. "I certainly have the Impression that Japan is trying very hard to make its markets as accessible as possible to foreigners. The Japanese recognize that if that doesn't happen, they'll find themselves ex-

For example, the delaying action against Nomura by Prime Minister Margaret Thatcher earlier this year was widely viewed as her way of telling Tokyo she was unhappy that its markets were not being opened more quickly to British firms.

Mrs. Thatcher blocked Nomura's application to act as a market-maker tor U.K. gilts, but after e few weeks the license was granted.

In one of the most recent liberalization moves affecting foreign institutions, Japan's six largest banks announced on September 8 that they would begin tying their short-term prime rates to money market rates instead of the Bank of Japan's official discount rate.

The change, which could happen as early as November, follows the deregulation of deposit rates, and is expected to have the practical effect of weakening the traditionally close links between the big Japanese banks and Japan's massive industrial corporations. Even if they offer competitive interest rates, however, it remains to be seen how much major-corporation Japanese business foreign firms can

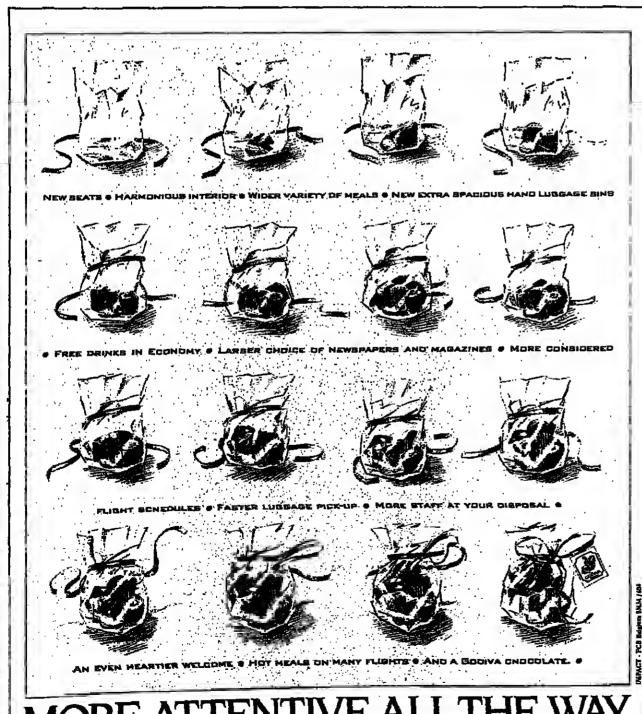

Because Japan has relatively little history of M&A and Western-style corporate finance, Japanese firms in Europe generally rely on non-Japanese experts such as Yamaichi's Hutchinson to oversee these operations.

After buying a 20 percent stake in the Wall Street M&A boutique Wasserstein Perella for \$100 million, Nomura recently announced the formation of Nomura Wasserstein Perella in Tokyo. The new firm will specialize in advising Japanese companies on foreign M&A opportunities, including in Eu-

Increasingly, Japanese Institutions are relying less and less on Japanese staff posted to Europe, except for their top management, It is estimated, for example, that Japanese nationals account for only 20 percent of the 5,000 employees working for the 13 Japanese banks and assorted investment houses in London.

Europeans working for Japanese firms generally say their opportunities for career advancement are better than they were at the European firms they left - as long as they don't aspire to the very top, which will always be Japanese dominated.

Timothy Harper

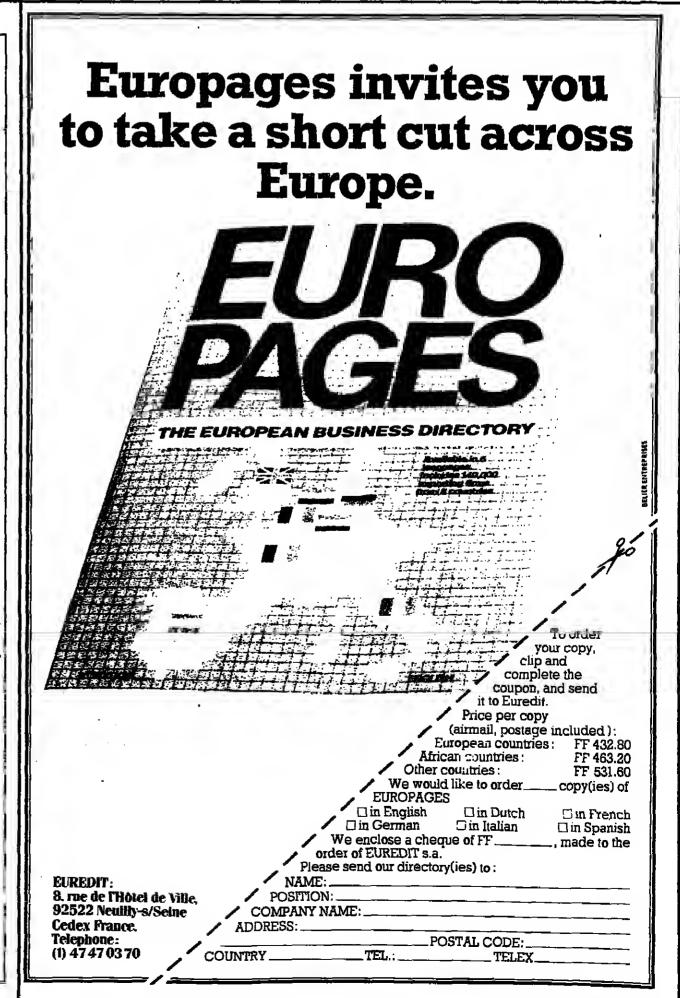

To be sure of holding your full attention we are determined to be more attentive than ever. The World's Rendezvous With Europe

Investment Services / A Case Study

Futures and Options for a Securities House

The EC's directive on investment services is not as far along the approval pipeline as the banking directive, it is still taking shape before the European Commission, the EC's early directive arm, while the second banking directive which also occurs the ing directive, which also covers the securities activities of banks, could gain final approval from the European Parliament this winter

But the investment services directive is expected to offer the same sort of prospects for stockbrokers and other nonbank financial houses. Like banks, investment houses authorized to operate in one EC country will be

M&A activity: 450 deals worth \$20 billion in EC

able to operate freely in all 11 other member nations.

James Ferguson, the deputy chairman of James Capel, believes the London-based securities house eventually would have expanded into continental Europe even without the pros-

pect of a single financial market.
"But 1992 certainly helps," he adds. "it makes it easier for us to offer our services throughout Europe. And it

offers us quite a good opportunity to compete on e more level turf."

"The importance of Europe to us is very simple," Mr. Ferguson says. "The big forces in the business world are now American or Japanese, and the reason for that is their big domestic bases. It's unlikely we can play in the same league if all we're offered is the U.K. as a base. But if we redefine our home market to include all of Europe, we can compete."

The speculative money flows in Europe will increase in volume and volatility, and tha corresponding liquidity should increase business even more. "As companies are offered more equity financing, the markets will be more liquid and bigger," Mr. Fergu-son says. "The greater liquidity will mean more money in the markets, and faster-developing markets."

Corporate finance is already boom-Ing, largely because so many Europe-an companies ere raising capital and repositioning themselves in anticipation of 1992: underwriting new issues, joint ventures, disposals, valuations, advisory services and mergers and acquisitions. This year there has been more than \$20 billion worth of M&A activity in Europe, with a reported 450 takeovers and mergers against 303 last year and only 117 as recently as

James Capel has also increased its operations in the rest of the EC. The company bought two other brokerage houses, Dufour Koller Lacarrière in Paris and Van Meer in Amsterdam, and opened its own representative office in Frankfurt.

"We went to Holland not because it was an obvious case, but because we could buy it and it was a cosmopolitan atmosphere," Mr. Ferguson says. "In France, we got a firm that was not very successful but had a good name. We made an aggressive turnaround with new premises, expanded research and new products. In Frankfurt, we felt that Germany is such a major part of Europe that we needed our own

Mr. Ferguson points out that some exchanges desperately need upgrad-ing before 1992. "France, for example, needs a lot of money for technology," he says. "Tha Interesting question is where that money will come from."

He says firms joining the Paris Bourse expect to pay entry fees in excess of \$1 million - "and probably a lot more than that." If an exchange becomes too expensive, he says, it will simply move offshore through screen-based trading; to salvage national pride and keep their exchanges open, some countries may find themselves faced with hefty subsidy pay-

The EC's investment directive is expected to contain the same sort of reciprocity provisions as the sections of the banking directive that have drawn opposition from the City of London, the European base for so

many foreign securities houses. Mr. Ferguson is also concerned about the home-versus-host rules proposed in the investment directive. Under the proposed draft, an investment house would operate under its home country's rules for capital adequacy and acceptability of major shareholders, but under the host country's rules for marketing and ad-

It's still up in the air whether home or host rules would apply for other conduct-of-business regulations such as conflicts of Interest, compensation for default or bankruptcy and segregation of client funds. "The U.K. has some extremely tight

rules for the security business," Mr. Ferguson says. "If based in the U.K., those rules can hurt you in com-

nes Ferguson, deputy chairman of James Capel.

petition against firms from Germany or Italy, where the rules are easier. They can compete here in London with their set of rules."

For example, he says, signing up a new client in London can require filling out 64 pages of forms, compared with a single page in Italy. "The hope is that they'd harmonize the whole lot before it starts," Mr. Ferguson says. Without more standardized regula-

tions across the single market, he says, the issue of compensation funds for default will raise more problems. "If you have tight regulations, if your capital adequacy rules are OK, there's no need for as much compensation," Mr. Ferguson says. "But if firms have to put up a lot of money to support competitors' failures, it's not fair." **Timothy Harper**

Capitals / Relocation Talk

To Brussels?

Brussels continues making quiet headway toward becoming Europe's political capital. The plan is contained in the "Brussels-Europe Area," a recent Belgian government study outlinging planned renovation extending from the Avenue des Arts and the Parc Cinquantenaire to the Quarter Leopold and the district surrounding the Rond-Point Schuman, site of the EC headquarters complex. An integ-national conference center will bit built in the area, and it could house the European Partiament, although just mentioning the prospect of the Parliament's leaving Strasbourg sparked immediate and firm denials from French government leaders. No verthless, Le Point, a French weekly, reported earlier this month that the European Parliament is preparing to rent 300 offices in Brussels for partia-mentarians as e first step away from Strasbourg. "With 1992 approaching, and the difficulties of plane access to Strasbourg, we all are assuming that Brussels will become our capital," said a British parliamentarian. Act Belgian capital, there are already more lobbyists and consultants work ing in the city than tha 15,000 "Euro" crats" working for EC Institutions.

Set up in 1949, Kredietbank S.A. Luxembourgeoise now ranks among the top banks in the financial centre of

KBL belongs to the Almanij-Kredietbank Group, an international banking and financial group better known in the Euro-market world under the name of Kredietbank International Group.

KBL provides a broad range of banking services such as financing of corporation and public institutions by means of Euro-credits and Euro-issues, mainly in Luxembourg Francs. KBL is also active in the primary market of new issues, in bond trading and in the financial servicing

With 1992 in mind, and in order to offer its eustomers a professional and personal service, KBL has entrusted some of its activities to a new company inside the Group in Luxembourg, thereby creating for such activities a more flexible and independent framework. The following services - Holding Companies, Undertakings for Collective Investment, Portfolio Management for private and institutional clients - have been transferred to the new entity, KREDIETRUST.

U.S. Increases

Presence in EC

Mention 1992 to some members of the Wall Street financial community and they presume it is a reference to the recent level of the Dow Jones Industrial average.

Open Questions/The View From Wall Street

But despite occasional ignorance on the Street, cajor.

American banks and financial institutions are steadily preparing for the more integrated, less regulated European; banking, insurance and securities market of the 1990s.

"Nowhere will the changes promised by the 1992 integration be more profound, or have more far-reaching effects, than in the financial services arena," predicts. Dennis Weatherstone, president of J.P. Morgan & Co. :: Many American observers expect that changes wrought by 1992 will enable American institutions to offer a full

spectrum of wholesale and retail banking and financial services across European borders. Consequently, the most visible 1992-related effect to date is an increase in the physical and financial presence of American firms in European capitals, While London remains their most obvious commitment, e growing number

While most Americans feel the momentumwill continue, not everyone is optimistic.

of companies are betting on a decentralization of financial

markets and moving closer to currency borrowers and investors in individual countries.

We are quickly establishing a physical presence throughout Europe due to new investment opportunit created by 1992," explains François de Saint Phalle, senior executive vice president at Shearson Lehman Hutton, which has e financial stake in Carlo De Benedetti's CERUS group and has created a fund for investments in mediumsized German companies. "To be e true European player:

we need access to each domestic market." Major banks, like Chase Manhattan and Citibank, have long had operations in Europe. A spokesman for Citibank acknowledges: "We don't expect the liberalization of European capital markets to occur overnight, but we are certainly preparing to participate in 1992."

1992 has also altered the American perspective on Europe as a part of its global investment strategy. 'The: investment potential of e unified Europe cannot be ignored, and we are looking for opportunities," says United States
Trust Company senior vice president Harry Rowney, who
favors companies with cross-border activity in areas like
television production and telecommunications.

The fear that a unified Europe may introduce protection ist restrictions in the financial arene is perhaps one obdois reason American companies are currently implementing plans to increase their investment and presence in Europe. Some firms, conscious that reciprocity must exist for European banks to enter America, are also lobbying for future parity in the American marketplace.

"All the signals suggest that EC member countries will not be shy about seeking reciprocity from the U.S. between now and 1992," says Mr. Weatherstone."But the demands for reciprocity are likely to contribute greatly to the momen-tum for reform of the laws governing the fractured financial services industry in America."

Naturally it is the implementation of many 1992 directives, currently in the discussion stage, that will ultimately determine the outcome of the protectionist issue. There is the added expectation that pan-European de-

regulation will lead to mergers, joint ventures, general consolidation and even hostile takeovers throughout the banking and financial services field. Americans point to the unprecedented battle earlier this year for control of Society Générale de Belgique and the mergers of a number of banks in Spain as steps in that direction.

Indeed, numerous American executives expect deregu-lation in the 12 European countries to be the first globel last of the convergence of banking, insurance and financial

While there is an obvious reluctance to identify potential takeover targets — and some observers expect that growth through acquisition in Europe could backfire — few American Institutions are ignoring the potential of Europe. And they acknowledge that the expansion and activity prompted by 1992 will undoubtedly lead to challenging organizational and management issues.

How are Europeans reacting to the increased Infusion of American financial and banking institutions on their tur? "We may be perceived as cowboys, but Europe and the rest of the world definitely want to get on the horse," explains Mr. de Saint Phalle, referring to the unorthodox takeover bids that occurred in the United States during the 1980s.

While most Americans feel the momentum toward post-1992 unification and deregulation will continue, not every-

"I have watched the EC since its inception, and feel that if integration does occur it will be a boon for the Europeans and a setback for Americans and other foreigners," concludes a Vienna-born economist living in New York.

But even the skeptics recall that a Dow Jones average of But even the skepus recent that a second 1992 seemed a bit farfetched four years ago.

Luxembourg / Concessions to Change

Clients Back Moves Toward Collective Investment

A rush of private investment funds toward Luxembourg over the past two years has effectively ended doubts that the grand duchy's attractions for bankers would cause after the col-lapse of the Eurodollar boom. The volume of private investment placed with the Luxembourg banks is running at twice the level of 1986, according to a senior benker. "The cash is coming from private investors — t would guess them as upper and middie-income, tet's say about US \$50,000 upward, mainly German, British and French." According to the benker they seek security for their money, also "privacy and apprecia-

These are well-proven Luxembourg qualities. But how much longer can such traditional selling points be maintained? While there has never

Will new measures mar Luxembourg's charm?

been any suggestion that Luxenbourg harbors tex-dodgers, the drive toward transparency in private financial transactions within the Community could blunt its appeal for those seeking full secrecy over their bankfng business.

The growth of banking in Luxembourg has been striking and comparatively recent. In June 1988 there were 132 foreign banks established in the country, compared to only 37 in 1970. Eleven of the top 20 were German, including the top three - Deutsche Bank, Dresdner Bank and Commerzbank:

The breakdown by nationality shows where the growth has come from. In 1970 nearly half of the "foreign" banks were Luxembourg-Belgian combines. In June this year their number had scarcely changed, while the establishment of West German banks had soared from 3 in 1970 to 31. After the Germans, the Scandinavian banks were prominent with 16 concerns, lured like others by the ease of conducting Eurodollar business in the grand duchy.

Suggestions that such banks may consider leaving Luxembourg in the light of the EC banking regime are

combination of facts:

challenged by the Luxembourg Bankers Association, which notes that the number of establishments and the level of assets has grown every year

since 1970 For a lot of the money flowing into Luxembourg is there in anticipation of the coming into force on October 1, 1989 of the Common Market's directive on Undertakings for Collective Investment in Transferable Securities (UCITS). This is part of the EC plan to establish e single Community market in finance by 1992 as e component of the internal market among the 12 member countries.

The UCITS directive, approved by member governments in December 1985, will permit any company to seek money from the public and invest it in any way it chooses, throughout the Community, on the basis of an authorization by its own government. There are some limits. The company will have to invest 90 percent of its funds in publicly quoted companies and may not take more than e 5 percent share in any concern. Other limits are set over its borrowing rights.

Luxembourg has been able to accommodate itself to these regulations to such an extent that major investment houses in London and Tokyo have begun to seek locations in the grand duchy. According to e London banker: "The taxation system is friendly, and the communications are superb." But there are two potential problems. Luxembourg is part of the EC and thus liable to its laws. There is a near certainty that by 1992 the EC will have approved common regulations on banking, including disclosure requirements, that could effectively remove Luxembourg'e present avan-

While there is no guarantee that the proposed harmonization of banking practices will be approved in the form presented by the EC Commission, Brussels officials are confident that the thrust of the drive to bring about a common pattern of operations will eventually win the consent of the EC governments end the measures would be implemented, if necessary, on the basis of a majority vote.

Whether the loss of some existing perks will affect the charms of Luxernbourg to private investors is unclear.

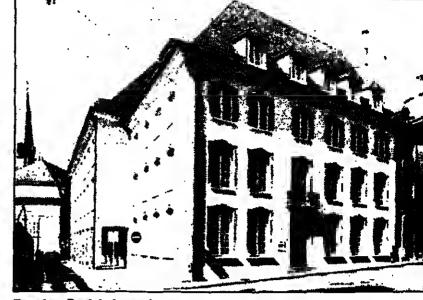

An American banker speculates that "While the tax concessions in Luxembourg are not way out of line, the discretion of the authorities is much prized." Much may depend on the skill of the country's marketing techniques and its portfolio management. There is a widely held impression of Luxembourg as a conservative financial center compared to London or Zurich, But its record over the past 12 months compares well with those of its competitors. "By and large the account managers took a long view a year ago and avoided overexposure in equities with the result that the worldwide stock market crashes of last autumn have caused less embarrassment in Luxembourg than elsewhere," comments the banker.

The evidence so far is that the major banking clients of Luxembourg in the past - West Germany and Scandinavia - are strongly backing the new UCITS in the grand duchy. The tradition of collective investment, well-established in Britain through unit and investment trusts, is less familiar in other European countries. The UCITS directive gives Luxembourg e clear edge over non-Community countries in competition for savings, while its investment expertise puts it in contention with London. There is now even e move by some British firms to use Luxembourg as a base for UCITS operations. "The Luxembourg regulations are flexible, unlike those introduced in the new U.K. Financial Services Act, and offer several attractions to British firms. But I suspect that the main effect of the UCITS directive will be to divert money away from offshore centers like the Channel Islands and the Isle of Man," says an executive of a major London accounting

Luxembourg has now virtually completed the changes in its own legisla-tion needed to Introduce UCITS, though it could still be held back by legal restrictions in other countries where collective investment is customarily handled by banks. The prospect of losing business to Luxembourg has inspired suggestions in some EC capitals that the grand duchy may lack the necessary resources to police the UCITS business

and that its flexible regime could permit abuses. "Certainly tha operation of UCITS on a large scale will call for a major enlargement of Luxembourg's supervisory agencies," agrees a gov-ernment official. "This has been planned for and will be in force once the business comes into effect."

There seems no reason to doubt this, since Luxembourg's major claim to primacy in money management has always been its unchallenged responsibility. "The regulations might be accommodating in comparison to others, but there has never been the slightest suggestion that they are not forcefully and fairly applied," says e British banker.

sion's proposals, but it is clear that we need to advance on both taxation fronts, harmonizing valueadded taxes and taxation of savings. We also want to avoid capital flight. Today Luxembourg is e tax haven. Germeny? No. Germeny has moved in the direction of withholding the tax at the source. Today, we are the only country that requires e tax declaration in this regard by the individual or the bank. It is all very complex, but we do need to move

What are the main obstacles to European integra-

tion? There are technical difficulties, but the realty big question for European governments is sovereignty and the delegation of power. And here I refer to the immediate question of abandoning sovereignty in the spheres of economy and of taxation. It is clear that member governments must take account of public opinion. Mrs. Thatcher, Chancellor Kohl, our government, we all do

Is that blocking progress toward greater political uni-

Much of the reticence from certain countries stems from the fact that they do not want to delegate powers to the Commission, an executive organizetion. One day or another we will have to think about the institutions.

We have e parliamant. What is its role? Sooner or later, the technical difficulties should lead us to accelerate political coordination.

In the monetary field? No, in the area of policy in general. Obviously, we are not yet at the staga of having a president or e common government.

Do you favor strengthening the powers of the EC Commission?

The problem, in the long term, is the establishment of a truly democratic government. Delors has revitalized the Commission. It is one of his great successes. But I wonder if it would not make more sense to think about reinforcing the powers of the Council. It is clear that the logic of building Europe is leading us to question the structures of decision-making.

What does the "social dimension" of an integrated Europe mean for you?

Reduction of Inequalities of working conditions, and the development of a European union movement. What is needed are converlevel - between employers and unions. If workers are left out in the cold, something very important will be missing in the building of Europe.

What is your reaction to reports that many French financial institutions fear the coming of 1992 and are not ready to cope with the ensuing new competition? I think French banks hold their own pretty well. Also, I have always said that comtake another look at our popetition in the banking secsition. Our goal for compator must be allowed to opnies end banks is to help erate freely, and thet them develop with an interincludes between state and national dimension and a private banks, in terms of European structure. And financial innovation, we are we have many places to in a highly advanced stage discuss issues - in international monetary bodies, of development, aven in the framework of the ahead of other European Uruguay Round. countries. Our financial system is well adapted to

Finally, what message the building of Europe. I am would you give the next President of the United delighted when I see e large French insurance company entering into agreements with a British or a German

Do not mistrust Europe. And realize that Europe can be an efficient partner and e faithful friend. And understand that it is in the interests of democracy that Europe and the United States get along. But it is equally important that the United States not look exclusively to the Pacific. If it does, Europe will find other partners. The Interest of the United States is to look in both directions, east and west, at the same time.

Investing in Europe? What you should know about this church.

Bavaria is the semiconductor center of Germany and Continental Europe. Nearly all main semiconductor manufacturers have major production facilities or their European headquarters in the state.

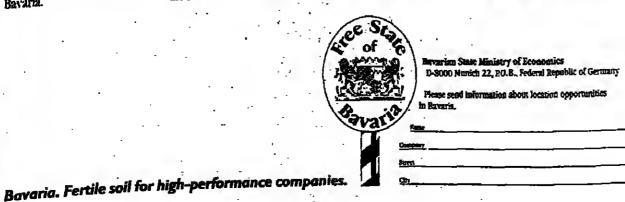

An exceptionally high To concentration of user industries of advanced technology is in Bavaria and at its doorstep. Heading the list are electrical and mechanical engineering, automakers, and aero-

space industries.

Munich, the state capital, is the site of many trade exhibitions, including Electronica - Europe's leading exhibition for components and modules - and Productronica -Europe's largest fair for electronics production installation.

Bavaria employs more people in R&D in the industrial sector than in any other state. It is the home of the world-famous Max-Planck Institute and Fraunhofer-Gesellschaft as well as many research facilities for microelectronics and biotechnology.

Take a close look at Bavaria. You might be surprised to see how many church bells are operated electronically. And how many other attractive opportunities Bavaria has to offer.

Have all the advantages of a bank account in LUXEMBOURG, without actually being there.

SIEMENS

It's official: Once again Siemens ranks as Europe's No.1 in Computers

Every year the international computer magazine "Datamation" publishes a table of the world's leading Information Systems companies. For the fourth year in succession, Siemens is No.1 in the European league and, as such, the top European computer company in the world market.

This success can be attributed to four major

product groups: • the BS2000 computers, which run under a single

operating system – from small departmental computers right through to the largest mainframes.

• the SINIX® multi-user system, Europe's best-selling UNIX® computers.

• the Siemens Personal Computers - made in Europe, with a continually increasing share of the • the digital office communications systems, which

are at home throughout the world. Each of these systems is the result of an intensive,

ongoing program of research and development. Moreover, Siemens itself manufactures the key components, being the sole European source, of the Megabit chip - a chip for both the

world electronics market and Siemens computers. If you would like to know more about Siemens Computing, please write to Siemens AG. Infoservice 134/Z560, P.O.Box 23 48, D-8510 Fürth, Federal Republic of Germany.

Switzerland and Austria / Outside Looking In

Rethinking National Rules In the Light of Directives

"We're not at all worried - we see it as e challenge," says Jean-Louis Delachaux, menaging director of Credit Suisse bank's Genera office. Delachaux'a attitude toward 1992 is typical of most Swiss bankers, who believe their international expansion in recent years will help them weather the change to a single European mar-ket. They also cite their present close relationship to the EC as proof that it is possible to work with the Community and not belong to it.

Links are Indeed strong: last year Switzerland looked to the EC for 72.5 percent of its imports, and 56.2 percent of its exports went to the Community. Austrian trade is heavity de-pendent on the EC: In the first six months of this year it climbed to 75

1992 provides an excuse to push for reform

percent of exports and nearly 80 percent of imports.

Nonetheless, the Swiss - like other Europeans outside the European Community - are not taking the possibility of e new financial environment lightly. Switzerland and Austria in particular have financial industries that play Important roles in their economies; Swiss banks, for example, account for 7 percent of GNP, higher than that of any other sector. These countries are particularly anxious not to see their banks crippled by a role on the tringes of a stronger Communitv. Dr. Fritz Diwok, secretary general of the Austrian Bankers Association, emphasizes that it is now up to his government to take steps to enable industry and banks to cope with the new situation. The difficulty, he cautions, is knowing what steps. "Very much will depend on whether we see harmonization or mutual recognition. Even within the EC, they're not sure

The Swiss government issued a report two weeks ago outlining its policy for dealing with the EC's integration efforts. The Federal Council reaffirmed that it will continue intense negotiations in such areas as finance to ensure that EC and Swiss law are mutually nondiscriminatory. "The fact

Striff Agree

But Minter and a

خارج الإسخ الإيلامة

we're not members of the EC shouldn't mean we're relegated to Europe's B team," said Minister for the Economy René Felber.

Markus Lusser, president of the Swiss National Bank, welcomes the EC's efforts to create a unified market, and the directives that have been issued to date. The success of the Cooke Committee of the Bank for International Settlements in harmonizing capital adequacy for the Group of 10 countries bodes well, he believes. The fact that the European Community was also represented at those negotiations indicates that the prospects of finding compatible solutions for banking and finance regulation are

There are, however, reasons for concern, says Mr. Lusser. "The Swiss National Bank does not see any fundamental reason to fear discrimination against Swiss banks by the European Community. But it is possible that the European Community will establish directives for financial markets that would make discussions about the adaptation of certain Swiss rules necessary. One example of this may be the regulations for admission to stock exchanges." The Swiss are cur-rently struggling with e revision to their commercial code, which governs shareholders' rights. The battle pitches bankers against some powerful corporate groups; the latter would like to retain the current system, which has provoked criticism from abroad that the Swiss are raiding companies elsewhere while protecting their home turf against foreigners.

Austria is interested in getting closer to the EC, possibly even in joining the Community. The Swiss, however, continue to Insist that their political neutrality is not compatible with EC membership. Yet both believe reciprocity is the key to coexistence with the EC. For Swiss and Austrian bankers this means virtually every national banking regulation must be reassessed in the light of new EC rules.

In some cases, such as Swiss rules on capital adequacy, current regula-tions are stricter than those the EC appears to be planning to adopt. Bankers fear this could make them less competitive and they are trying to

convince the authorities to make changes. Swiss bankers' main concern is that they may be at a disadvantage in the tax area; for years they have been trying to convince the government that a crippling stamp duty is chasing away stock market business. The EC's plans for 1992 provide a welcome deadline and excuse to renew the pressure.

Though the general mood is optimistic, problem areas remain. Switzerland's large banks are already well established abroad, particularly in EC countries, where their subsidiaries will be treated as native banks; their strategies will be to continue this expansion. Credit Suisse, for example, plans to open offices in Spain and Italy. Smaller banks, however, are less well

equipped to cope with stronger foreign competition.

Austrian banks also worry about their size. "Our banks should become bigger by International standards," says Herbert Kaspar of the economics department at Girozentrale in Vienna, the second largest Austrian bank. "We've started buying. The merger mania that is going on now is geared toward a single Europe, so no matter what happens with our politicians In Brussels, banks have to look to 1992.1 The country's third largest commercial bank and largest savings bank three weeks ago announced a proposal to merge, a move that could trigger an industry shake-up.

The challenge, say bankers in both countries, will be to find the right balance. "We will be obliged to make some changes," says Credit Suisse's Delachaux. "But we can't just become ing with a Swiss touch."

Opinion / Realizing Europe's Potential

New Opportunities Should Allow Equal Competition

The advent of 1992 presents great opportunities for U.S. financial Institutions to assist their clients in raising funds and executing their corporate strategies in a larger, freer and more dynamic European market.

The overall impact of a single European market should be extremely positive for the European business and financial community, and thus tor American commerciel and investment banks operating in Europe. But some of the changes now being planned raise important concerns. Specifically, it appears that the directives on the banking and securities industries will link the treatment of toreign firms in the EC to treatment afforded European financial institutions in the home countries of those firms. While the

The major challenge for U.S. financial institutions

details of the directives have not yet been fully worked out, I have confidence that the Commission will recognize that although there are significant differences between European end American banking/securities regulations, the United States is a very open market for European financial institutions. It has offered them vast and growing opportunities for expanding their business - in some cases extending privileges that are not enjoyed by comparable U.S. Institutions. Moreover, many American firms have been providing service of the highest quality to their European clients and have proved that they add genuine value for the companies they serve in Europe. Therefore there is good reason to expect that the EC will apply standards of reciprocity fairly and flexibly, and will not restrict the ability of American financial institutions in Europe to compete on the same basis as their European coun-

A number of issues will arise as the Commission formulates a policy for regulating and reviewing large crossborder mergers and acquisitions. Cross-border combinations, and those within national borders as well, will enable corporations to enlarge market share and realize greater economies of scale. They are a logical product ot, and complement to, other aspects of the effort to create a unified market. A clearly defined EC merger a satellite of the EC. We must remain and acquisition policy (superseding specialists, doing International bank- conflicting national regulations), an expeditious review procedure for ap-Ellen Wallace proval or disapproval of proposed

mergers on an EC-wide basie, and a process for providing preliminary indication of whether a prospective merger is likely to be considered favorably would greatly reduce uncertainties, avoid costly delays and tacilitate the planning of corporate acquisition and divestiture strategies, as well as defenses against hostile takeover ettempts. Communication between the EC Commission, and European as well as non-European financial institutions in the EC, while the new rules are being written and when they come into effect, would provide Commission experts with "second opinions" that might be helpful to them in anticipating the practical consequences of alternative review procedures and approval criteria. It would also help these nstitutions and their clients anticipate the new rules and be sure that any mergers and acquisitions being contemplated will be consistent with

The period ahead offers major chellenges to U.S. financial institutions to think creatively and strategicelly about how best to serve their clients' needs in the single European market and the rapidly integreting and changing world. While our headquarters are in the United Stetes, we at Goldmen Sachs see ourselves as very much a European, as well as an American, firm, not only because of the over 700 people which we have committed to the European merket but also because of the extensive experience we have had in advising European clients on mergers, acquisitions, divestitures and raid detenses, reising funds for them in the key European and offshore markets and executing major privatization assignments.

We believe our future success in Europe will be determined largely by our ability to provide a full range of financial, merger and trading services to our clients throughout Europe, understand European-wide developments in all major industries and sectors, and raise capital in all major European and world markets. The creation of a unified European market challenges us to be innovative, think strategically, and constantly expand and update our range of services. We see enormous potential opportunities for our clients throughout Europe in the period ahead, and hope to play a significant role in helping them to take advantage of the more dynamic Euro-

In the Air: High-Tech Plans

With the removal of trade barriers between E.E.C. financial markets on the near horizon, James Capel is moving rapidly to provide clients throughout Europe with a complete Pan-European investment service that features timely investment ideas and access to a network of 22 offices on four continents.

We are already in place in Paris with Dufour Lacarrière Pouges, in Frankfurt with our own representative office and in Amsterdam with Van Meer James Capel. Steadily building our institutional equity operations in each of these important markets, we are finding clients quick to appreciate our integrated approach to sales and research. Our salespeople work with fund managers and institutions reviewing top quality research produced by more than 150 of our own analysts who cover more than four thous ad companies traded on 27 markets worldwide.

We are equally well placed to satisfy the fixed income needs of our clients. As market makers in UK Gilts, important players in the Euromarkets and associates of the US Treasury experts CM&M through our membership of the HonekongBank Group, we can provide a range of dealing services and economic analysis to clients. These facilities combined with the established presence of DLP in Paris and Van Meer in Amsterdam give us depth in both fixed income and derivative products.

Continental corporate clients are of growing importance to us. We have a long list of corporate clients in the United Kingdom and have represented a number of major continental companies looking to London for corporate advice, but our focus

> home markets. And the private investor has not been forgotten. Paris and Amsterdam have sophisticated private client services

Two years ago, the EIB lent Philips about half that amount for in European broadcasting," but also noted that it faced two important obthe Mega project (200 million guilstacles: competition from the controversial TDF-1 satellite due to be launched at the end of October and Aerospace Industries in the EC will

soon be able to tap research funds from a new plan announced by the EC

Commission. Until now, the commission has avoided funding aerospace. leaving spending in that sector up to national governments and the European Space Agency. Euromat, the new EC plan, will have an initial budget of 60 million European currency units and will aim to help participating companies in areas such as aerodynamic design, materials and computer system research.

 AT&T and Philips Telecommunications B.V., a joint U.S.-Dutch company based in Hilversum, Netherlands, will change its name to AT&T Network Systems international BV, reflecting a

stronger role in the company by AT&T. The company, which is currently seeking major expansion in Europe's telecommunications market, says its sales this year will rise to \$650 million from \$450 million last year.

· New air transport rules on competition have been adopted by the EC Commission that outline new, strict conditions for agreements between airlines. They relate fo such agreements as coordination of capacity and schedules of revenue pooling, computer reservation systems and ground handling services at airports. The new rules, which are part of the Commission's growing efforts to deregulate the EC's air transport system in the early 1990s, are aimed at assuring greater competition between airlines for the benefit of travelers. New rules affecting coordination between airlines, for example, specify that airlines retain the largest possible freedom to act independently and that the agreements not weaken the position of airlines which are not signatories.

.France's Thomson SA, and STET, Italy's state-controlled electronics group, plan to join other EC manufacturers participating in Jesi, the ECbacked Joint European Silicon Initiative, known as "Europe's big-bang superchip project." The program, intended to help participants develop e global capacity in semiconductors, already includes Siemens of West Germeny end the Dutch electronics group Philips. Pasquale Pistorio of Italy and president of the joint French-Italian venture, told newsmen that his group, created last year, was now the second-largest semiconductor firm in the EC, after Philips.

 Belgium has emerged as a key battleground for two competing European fighter aircraft projects: the European Fighter Aircraft, being built by a Munich-based consortium of British, German, Italian and Spanish aerospace companies, and Rafale, the controversial French fighter that has been sharply criticized for its high costs by the Rocard government. While weighing both projects, Belgium is also seeking to develop its own fledgling aerospace industry and taces considerable pressure from French industry lobbyists for whom an EC sale is crucial. France was an original member of the EFA consortium but withdrew when it became clear that the Dassault group, designer of the Rafale, would not obtain design

The World's Pencezvous With Europe

Spain / Watching the Bottom Line

Mario Conde, chairman of Banesto.

When the two biggest domestic banks, Banesto and Banco Central, came together in May, Prime Minister Felipe Gonzalez said it was the most important economic development of the century in Spain.

Indeed, the Banesto-Central merger created a banking group with e combined stock market capitalization of 913 billions pesetas (\$8.23 billion). Their combined profits came close to 56 billion pesetas last year and, with resources pooled, they now rank 25th

in Europe in terms of assets. As Mr. Guillermo de la Dehesa, who

Striking a Balance Between Size and Service

was secretary of state for the Economy at the time of the mergers, insists: There is a barrier to entry to the unified market based on size. If you don't get over a certain size, you cannot even compete."

The clearer minds in Spanish banking had long recognized that a strategy was needed to take the domestic sector past the 1992 barrier and into a aingle European market. Spanish banks seemed too small for Europe, and protected domesticity had made them flabby.

The merger lobby had e clear blueprint for the future. Smaller, better run, more efficient and more profitable banks were to join forces with the bigger, and flabbier, banks. The former would provide management and

This was the logic behind, for example, the approach made to Banesto, a big bank, by the smaller Banco de Bilbao. Bilbao's international network, arguably the best among the Spanish banks, complemented Banesto's

deep and blanket penetration of the domestic market.

A second similer overtura saw Banco de Vizcaye courting Banco Central. Vizcaya prides itself on its management skills and its industrial know-how and Central, which be-longs to the bigger and flabbier division, has e very big stock in Spanish

The main surprise and irony was that things did not work out as planned. Banesto fought off Bilbao when the latter made a public share offering and Central kept Vizcaya at arm's length. What occurred instead was that Vizcaye and Bilbao, the two Basque banks, came together in January and months later Banesto (its full name is Banco Español de Credito) and Central followed suit.

Some claimed that professionalism wedded professionalism in the future Banco Bilbao Vizcaya and size married size to form what, in three years time, will be known as the Banco Espanol Central de Credito. In other words, the result was exactly the opposite of that laid out in the blueprint.

Critics of the process said that the one plus one equals one exercise. especially given the way it turned out. is going to consume vast amounts of time, energy and money. Popular, the smallest of the big seven private banks and one of the best managed and profitable, preached small is

beautiful and stayed resolutely single. Banco Hispano Americano and Banco de Santander had a different approach to the 1992 challenge. Rather than digging themselves into the domestic market with mergers, both preferred to take the initiative; the two banks evolved go-it-alone strategies and attempted to strengthen themselves in Europe rather than in Spain through acquisitions and cross-share agreements.

The anti-merger lobby questions whether, after 1992, European banks will be interested in Spain's retail banking business. The real challenge they foresee facing Spanish banks is the provision of specialized services. In this sphere, which is the real profit maker, size can be e handicap rather than an asset.

Certainly what the foreign banks are doing in Spain at the moment is to press ahead with merger and acquisition expertise, with leverage buyout skills and with underwriting new instruments such as europeseta bonds.

The real bottom line of the banking merger process may well have less to do with banking than with industry, for the big banks, by virtue of the portfolies they hold in Spain's major corporations, have traditionally been the powerbrokers of the nation's industry.

Banesto and Central will be pooling major shareholdings in e whole range of sectors, from electrical utilities to land development projects. Their merger brings together, for example, the two biggest domestic construc-tion companies: Agroman, which is controlled by Banesto, and Dragodos y Construcciones, which is controlled by Central. The two major private oil companies, Central's Cepsa and Banesto's Petromed, likewise come under the same umbrella.

The picture is a similar one with the Bilbao-Vizcaye merger. Both banks

Jose Angel Sanchez Asiain, CEO of Banco de Blibao.

have e many-tentacled spread of corporate Interests in Spain and their merriage has creeted a hugaly ko

strengthened industrial arm. of the upheaval that has taken place is ...it the manner in which the pacemaker of Spanish banking at present is Baneeto's 40-year-old chairman Mr. Marlo,
Conde. A year ago he was not a maniber of Banesto's board and did not, in the fact, have any direct experience of banking at all.

T.

As the EC seeks to harmonize the financial landscape, many German bankers are concerned about the issues this raises regarding their non-bank holdings, capital adequacy re-quirements and hidden reserves.

Perhaps the most worrisome issue facing them is a directive under consideration that would limit a bank's share in a non-bank company to 10 percent. Total investment in such

Investment in a non-bank company is limited to 10%

companies would be further limited to 50 percent of a bank's own funds.

German banks currently hold large stakes in non-bank companies, including Deutsche Bank's 28 percent share in automobile manufacturers Daimler Benz, Dresdner Bank's 23 percent holding in raw materials trador Metallyesellischeilt, and Commora-bank's 25 percent stake in retail giant Karstadt.

West Germany / The Dangers of Divestiture

Directive Could Reduce Banks' Stake in Industry

They, presumably, would be forced to divest some of their holdings."That could hit some German banks," said Gunter Sterl, edministrator in the EC's financial institutions division, Industry observers agree that Deutsche Bank, the nation's largest commercial bank and the EC's third largest, would be most affected.

"They would have to pay higher taxes as they unscramble their holdings," said Keith Brown, a banking analyst with Morgan Stanley International in London. He also said the bank's influence and possibly their business relationship with industry might diminish.

Thomas Albrecht, European bank analyst at stockbrokers UBS-Phillips & Drew in London, said the directive's impact in Germany would be limited because it applies to the listed value of

assets. German banks generally list their holdings at less than their actual value, so they are less likely to violate

the 10 percent and 50 percent limits. Divestment, need not necessarily drive down stock prices. "If the companies are allowed to slowly unwind their holdings, there is no reason why prices should fall," said Mr. Brown.

But the divested companies could become more susceptible to hostile takeovers. "After all, if banks hold large blocks of shares, it prevents takeovers," he explained. One possible solution under consideration by Deutsche Bank and others is to place shares in holding companies, possibly in non-EC countries.

German banks are also concerned that the EC might adopt the Cooke Committee's guidelines to harmonize capital ratios for leading banks. Because the German definition of core capital is stricter than the committee's. German bankers fear they may face tougher capital adequacy standards than their competitors.

"It could be a competitive disadvan-tage," said Peter Pietsch of Commerzbank. Another bank source, who requested anonymity, disagreed. "The Cooke guidelines count for all of us," he said. "It would be more of e problem for Japan and the United States."

A third, related worry is that German banks might be forced to expose their hidden reserves. "That could threaten the way the German banks work," Mr. Brown said. "They have large hidden reserves, which might have to be exposed and become subject to tax-

industry sources generally agree that any foreign growth in the German market will be made at the expense of the smaller savings and cooperative Institutions rather than the major banks. Deutsche Bank plans to spread its investment and commercial banking activities through acquisitions abroad. In 1986, it bought Banca d'America e d'Italia, and is now aiming for control of Banco Commercial Transatlantico in Spain.

Commerzbank is seeking cooperation with partner banks abroad through cooperative links and cross shareholdings. It hopes to become a major shareholder in Crédit Lyonnais. Dresdner Bank's strategy is considered less clear, but leans toward expansion through foreign cooperation. Both Commerzbank and Dresdner will concentrate on investment services.

Longest Taxi Ride Arrives in Singapore

The longest and most expensive taxi ride in the world has arrived in Singapore via Europe, the Middle East, Pakistan, India and Sontheast Asia, Michael Richardson of the International Herald Tribune reports. When the London cab drew up Tuesday in front of Raffles Hotel, its me ter showed a fare of £18,665 (\$31,330) for a 14,000-kilometer (8,700-mile) journey. And there's still another 5,000 kilometers to come. According to the Guinness

restaurants, theaters and carmval | Book of Records, the longest pre-attractions, will be reproduced in | vious taxi ride was 12,133 kilometers in 1981.

Barring mishaps, the Great Taxi Ride from London, orga-nized to raise funds for an international childrens' charity, will finish on Oct. 27 in front of the Opera House in Sydney as part of Australia's bicentennial celebrations. The team of six drivers and mechanics will fly to Perth later this week with the cab for the long drive eastwards across Aus-

Money is being raised by corporate sponsors and collections in the countries the cab passes through. In Singapore, 7,000 taxi drivers persuaded passengers to donate nearly 293,000 Singapore dollars (\$144,000).

In Singapore, a Cultural Tug-of-War

By Michael Richardson International Herald Tribune

SINGAPORE - During the reent Festival of the Hungry Ghosts, Chinese Singaporeans burned joss sticks, incense and artificial paper money and made offerings of food: rites that are part of a common cultural heritage among Chinese in many parts of the world.

These ceremonies welcome and placate the spirits of the dead who, it is believed, return temporarily to share the comforts of home with their living relatives, and they suggest that customs brought to Singapore by migrants from China more than a century ago remain alive and

But leaders of the Chinese community here, government officials and Chinese intellectuals are worried that Singapore is in danger of losing its cultural bearings as Western ideas permeate more deeply this multiracial Asian society.

In one of several speeches on this theme last month, Prime Minister Lee Knan Yew cautioned that the values transmitted by increasingly widespread use of English in ed cation, business and daily life might turn Singapore into "a pseudo-Western society" that was neither part of Asia nor of the West.

And a survey published this week by the Singapore Federation of Chinese Clan Associations found that while most Chinese Singaporeans still adhere to their tra-ditional religious beliefs, many younger Chinese, particularly those educated in schools where the language of instruction is English, are much less attached to custom.

"The picture that emerges," said Wee Cho Yaw, president of the federation and a leading banker, "is of a community that is slowly losing interest in its rich cultural

heritage."
Officials of the governing People's Action Party, which has been in power since 1959, also worry about an erosion of traditional respect for authority and the readiness of Singaporeans to place collective obligations ahead of individual rights.

They argue that a foundation of social cohesion and discipline has enabled East Asian countries such as Japan, South Korea, Taiwan and Singapore to outpace other nations in economic growth and raising living standards.

Singapore's future, Mr. Lee asserted, would depend on whether its population — 76 percent Chinese, 15 percent Malay and the remainder Indians and people of other ethnic groups - could maintain their Asian core values.

"It's the software to the younger policy, totensified after he moved talked last week with Mr. Shevard-generation which will determine to divide the responsibility for su-nadze, who told reporters that the

whether Singapore continues to that wide use of English had given thrive, to prosper, to be a dynamo, or whether it will plateau as in so many Western societies where they just lose steam," he added.

Diplomats said that the cultural tug-of-war between East and West in Singapore had totensified since Mr. Lee's government decided in the 1960s that the island-state had in promote English and plug toto nese majority became in their ways the world economy if it was to

THE WAY YOU SEE EUROPE DEPENDS ON WHO YOU ARE.

From the outside, Europe can be seen simply as an emerging political entity · (see fig. 1). But as most businessmen know, on the inside it's a vibrant economic

community packed with places generating a lot of business (see fig. 2). So if you fly for business we think you should fly with people who fly for the businessman: Air France. With 94 destinations in Europe alone we not only regularly go where everybody else does, but also to places nobody gives a second thought to, until they have to go there. In fact, we fly to more cities in Europe than any other airline. And if that isn't enough incentive for you to fly with us, fly with us for our service. You'll find that it also rates a few stars.

I THE FINE ART OF FLYING

AIR FRANCE

A Step in Saving Sight

TEW YORK — In a major advance, two groups of U.S. scientists have successfully transplanted cells from the eye of a rat to the retina of another rat and cured a disease that would otherwise

The work, the first successful retinal cell transplant, is the first time that researchers have been able to cure a descnerative disease of the central nervous system. The researchers cautioned that the studies would have to be duplicated in monkeys and perhaps other animals before the procedure could be tested on people. But they said they were encouraged by the results and estimated that retinal transplants would be possible for people with degenerative eye diseases in 5 to 10

"I'm sure it will eventually be done," said Joe G. Hollyfield, a research scientist at Baylor College of Medicine in Houston who specializes in diseases of the retina.

Degenerative diseases of the retina are common, occurring in 400,000 living Americans, according to the Retinitis Pigmentosa are 60 days old they are blind.

these diseases, macular degeneration, is the leading cause of blindover the age of 60. Doctors can sometimes slow the loss of vision in patients with degenerative retinal diseases, but they have no way of preventing it. Although many aspects of these diseases are mysteries, scientists suspect that the type of retinal cells transplanted in the recent experiments could save the vision of many patients.

المرازي المرازي والرائحة فيهينها والمعتبرة فوعوها وهياناه

This is the first time that a degenerative neural disease has been mally grow. The cells survived and stoppped in its tracks," said Mat-thew LaVail, of the University of wise inevitable death of photorestoppped m its tracks," said Mat-California in San Francisco, who studies degenerative diseases of the

The recent experiments, which will be published within a few months in the journal Experimental Eye Research, involve rats with an inherited defect in one type of retinal cell. The defect causes the death of both these cells and others that are nourished and supported by the defective cells. The cell death begins when the rats are about 28 days old. By the time they

To cure this degenerative dis-ease, Dr. James E. Turner and Dr. Linxi Li of Bowman Gray School ness in the United States in people of Medicine at Wake Forest University in Winston-Salem, North Carolina, and, independently, Dr. Peter Gouras and his colleagues at Columbia-Presbyterian Medical Center in New York, transplanted healthy pigmented epithelial cells into the animals' eyes by cutting slits in the back of their eyes and injecting tiny drops of fluid con-taining the healthy cells into the area where the pigmented cells norceptor cells. Dr. Turner has operated on more than 200 rats, and, in every case, the transplanted cells survived and prevented photoreceptor cells from dying.

Turner's work is just phenome-nal." Mr. LaVail said. What he described was so amazing that I went out and visited his lab just to make sure he was not a charlatan. I almost felt it was the high point of my career when I went out there and saw it, it was so phenomenal." Mr. LaVail added that he thought the transplanted cells not only survived but also divided and spread in the rats' eyes.

Dr. Turner said that the cells could have grown or they could simply have spread out, or both. There is no answer yet," he said. Dr. Gouras said he and his colleagues hoped to try the retinal cell

transplants on monkeys next, and Dr. Turner said he would try them on other species, including rabbits and monkeys, and would try implanting greater numbers of cells in

France Approves An Abortion Pill

International Herald Tribune PARIS - The French government has authorized commercial use of the abortifacient substance RU 486, but has made it must be subject to legal and medical controls as strict as those applying to other methods of abortion,

The substance, a so-called antihormone, acts by blocking the action of progesterone, a hormone essential in all phases of pregnancy. It has been found to be an effective abortive agent when used in conjunction with a prostaglandin during the first two months of preg-nancy. It was synthesized in 1980 by the Roussel-Uciaf company and developed in its Paris laboratories. RU 486, known by the propri-etary name of Mifepristone, is tak-

tion from a vaccine."

females giving birth.

sense of fatigue, but the chemical changes in the nervous system and OS ANGELES - The sense of muscles are different. Fatigue is defined as a decrease in force that a muscle can exert as it

> The new device for measuring fatigue is called a magnetic resonance spectrometer. The spectromoter can trace the action of individual molecules within the body and take moving pictures of one compound at a time.

"For the first time we have the tools to tease out the complexities of fatigue and then perhaps even design treatments or diets to combat it," said Dr. Robert Miller, chief of clinical neurology at Chil-dren's Hospital of San Francisco.

Previous information about muscle fatigue came from experi-ments in which muscle tissue was stimulated or exercised, removed from the body, quick frozen and later studied under a microscope. Few people signed up for such experiments more than once, Dr.

Miller said, because the procedure was extremely painful.
Such experiments demonstrated that chemical changes occur in fa-

tigued muscles, Dr. Miller said, but they did not reveal exactly how the nges came about. The spectrometer, on the other hand, reveals a broad spectrum of

chemical changes in muscles instantly and without requiring the cutting or sectioning of tissue. The technique is based on the povel response of living tissue when

laced in the path of a magnetic field and radio waves. A person is put inside a doughnut-shaped mag-net and radio waves are beamed in. The magnet aligns the nuclei in the atoms of the body, and the

waves excite the nuclei. Because each chemical compound has its own frequency, just like each radio station has its own broadcast frequency, researchers can "tune" the spectrometer for one compound at

There are two main theories of fatigue. One holds that all fatigue lies in the muscle itself; that somebow fatigue is tied to a disturbance in energy metabolism that is induced by exercise.

The second theory, focusing on the fact that all muscle action is initiated by electrical signals from the brain, holds that the sense of fatigue rests in the nervous system. Changes in activation, as the nerve to muscle signals are called, would explain all fatigue.
"We suspect both are at work,"

Dr. Miller said.

Tracking Down the Seal-Killing Virus

By Joe Kirwin

Special to the Herald Tribune STOCKHOLM — Four months ago Anders Bergmann, a Swedish pathologist and one of the world's foremost seal experts, was performing autopsies on carcasses of some of the more than 15,000 seals that have died in the North Sea from what was then a mysterious virus. He noticed the characteristics of an agent, encountered in previous veterinary work,

agent, encountered in previous veterinary work, that attacks the immune system.

Mr. Bergmann found that the animals' symph glands were devoid of lymphocytes and that their spleens were damaged. This reminded him of autopsies be had done on animals that had died of a canine distemper virus that all domestic dogs are vaccinated against.

Early in the summer, Mr. Bergmann, of the lighterity of Amigultons is Hearth. Sander

University of Agriculture in Uppsala, Sweden, passed on those observations to virologists in Sweden and the Netherlands who were trying

to isolate the lethal virus killing the seals. Four months after his suggestions, and after three and a half months investigating a herpes and picuma virus, Dr. Albert Osterhaus in the Netherlands and Dr. Bernt Klingeborn in Sweden, who cooperated in the research, announced the culprit: a camine distemper virus.

"If we had thought about what Anders Bergmann had told us — that the pathological picture looks like canine distemper," said Dr. Klingeborn, who works at the National Veterinarian Institute in Uppsala. "We would cer-tainly have found it a lot earlier." The reasons Dr. Osterhaus and Dr. Klinge-

born and their colleagues failed to find canine distemper virus earlier exemplify the complex-ities of virology research. In this case, the job was further complicated because little of this type work had been done with seals.

As with any viral isolation work, the researchers followed the postulates developed by Dr. Robert Koch, the German Nobel laureate and pioneer of virus work. These involve isolation, certification of widespread virus presence

and, as final proof, reintroduction.

Dr. Osterhaus, at the Netherlands National Institute for Public Health and Environment, had developed a herpes vaccine several years ago and his immediate tests with dead scal serum and organ tissue were positive for both a herpes and a picuma virus. But the herpes virus was ruled out because seals given the vaccine were not protected, and researchers focused on the picurna virus.

To verify a picuma virus as the infecting agent, Dr. Osterhaus tested gray seals, a species closely related to the harbor seal also suffering from symptoms of the virus, for picuma antibodies. The picuma virus theory became suspect when the gray seals tested negative. It was abandoned when the Dutch virologist developed a picurua virus that, like the herpes vaccine, provided no protection .

At that stage, in early August, the researchers started to look for a canine distemper virus. "The reason we didn't find the canine distemper virus earlier is that you have to look for it to find it," said Dr. Osterhaus.

The search for canine distemper antibodies involved two steps. First, the Elisa technique, also a test for measles, was applied; then a neutralization test, designed to indicate the highly specific antibody structure triggered by camine distemper. When that diagnostic work with blood proved positive, Dr. Osterhaus told Dr. Klingeborn and both began trying to isolate it in cell structures.

To do that, a special immunofluorescence microscope was required. "The canine distemper virus is too small so you can't see it under a normal microscope but you can trace the antigen of the virus substructures, which are being produced in cells," Dr. Osterhaus said. "You can trace them by using antibodies which you have coupled to a finorescent label."

Within several days both virologists had isolated the canine distemper virus. Corroboration

dumping into the water."

\$40,000,000 That's Forty Million U.S. Dollars!

THE NEW YORK LOTTERY

Pick Your Own Numbers Play Lotto 6/54 Get Rich in America's **Biggest Lottery**

Millions of U.S. Dollars are won regularly playing the World Famous New York Lottery. In fact, the New York Lottery has AWARDED BILLIONS OF DOLLARS to people who have won — including its biggest Jackpot of U.S. \$41,000,000. Imagine all the things you could do and enjoy with \$41,000,000. Every year, people from all over the world go to New York just to play the New York Lottery. Now, you too can play the World's Greatest Lottery and win a MULTI-MILLION DOLLAR JACKPOT.

Playing Lotto 6/54 is Easy

Lotto is the World's most popular form of louery. The Official New York version is called Lotto 6/54 and is FULLY BACKED BY THE GOVERNMENT. Each week two draws are held in public -THE GOVERNMENT. Each week two draws are held in public—under strict supervision in New York. Lotto 6/54 is easy to play. You pick your own numbers by selecting any 6 of 54 possible numbers from 1 to 54. It's that simple. The numbers you select are entered in the Lotto 6/54 Computer System and if they match the same numbers in the draw — YOU WIN THE JACKPOT. Even if you didn't select all six numbers, you could still be a winner! If you have only 3, plus a supplementary number or 4, or 5 numbers correct, you win one of the thousands of other prizes.

Here's How You Can Play

All you have to do to play the World Famous New York Lottery is to complete the order form and send it to United States International Marketing's world wide processing center, along with your payment. You can play 2, 4 or 6 games for 15, 26, or 52 weeks. REMEMBER, EACH ADDITIONAL WEEKLY GAME YOU PLAY INCREASES YOUR CHANCE TO WIN THE JACKPOT. Once your completed order form and payment is received, your numbers will automatically be emered in the computer system and you will receive an "Official Entry Confirmation" by return nitail. Your "Official Entry Confirmation" will indicate the numbers you

NYSE Higher in Light Trading

NEW YORK — A sport of buying in the final minutes Wednesday enabled prices to edge higher in a quiet, trendless session on the New York Stock Exchange.

The Down lones industrial average, which had

The Dow Jones industrial average, which had slipped 2.84 points on Tuesday, rose 3.20 to close at 2,085.53.

Advances led declines by about a 7-6 ratio, while volume edged up to 113.72 million shares from 113.01 million traded Tuesday.

"This is the dullest of markets," said Hilde-gard Zagorski, a market analyst with Pruden-tial-Bache Securities Inc. The trading remains in a narrow range with nothing significant taking place," Ms. Zagorski said. "People just seem to be apathetic or unwilling to do anything ahead of the next set of

She noted that the most important report — September unemployment — was not due out until Friday, Oct. 7, and that the lethargic pace of the market was not likely to change until at

Broader market indexes also posted small gains. The New York Stock Exchange composite index rose 0.39 to 152.03. Standard & Poor's 500-stock index rose 0.82 to 269.08. The price of an average share added 8 cents.

"Nobody wants to do anything other than those involved in special situations," she said.

INTERNATIONAL MANAGER

To Stem Insider Trading, Hire a Compliance Officer

By SHERRY BUCHANAN International Herald Tribuna

ONDON — In an effort to deter insider trading, major commercial and investment banks are hiring in-house "compliance officers" to keep tabs on their brokers, traders and corporate finance staff. "It's the new craze in London," said Marc Lamy, who finds and recruits financial executives throughout Europe for Heidrick & Struggles, an international managerial search firm in Paris.

Banks are increasing the staffs in their compliance departments, upgrading the status of the compliance officers in their organizations and turning what were often part-time jobs into

staff positions with good career prospects.

A compliance officer's job is to keep everybody in the firm's employ within the law: to make sure, for instance, that what the financial world calls the

"Chinese Wall" between a company's mergers and acquisitions department and its brokers is respected so that salesmen cannot tip off cus-tomers with advance information from the M&A department; that analysts who

The aim is to keep everybody in the firm's employ within the law.

follow stock trends pass on the information to all the bank's clients, not just to their best the information to all the bank's clients, not just to their best chistomers; and that traders do not run up huge personal debts. This is not to say that banks compliance officers are anything near. But they are being given more authority, especially in the City of London, the British capital's financial district, since an outbreak of insider trading. The jury is still out on whether strengthened compliance departments will help deter such activi-

- Initially, international banking companies set up compliance departments to keep employees informed of the latest govern-

"There is clearly an increase in the number of compliance officers," said Brooks Chamberlin, Korn Ferry International in New York, "In New York, compliance departments were beefed up not just as a result of problems with insider trading but because of huge growth in M&A staff of investment firms in the last three to four years and the increased complexity of SEC and other regulations.

N LONDON, the catalyst for creating compliance departments came from deregulation of financial services. The compliance officer's job was created subsequent to the 1986 Financial Services Act and the Big Bang," said Joe Reilly of Badenoch & Clark, a recruiting agency that has placed several lawyers and accountants in compliance officer jobs.

The head of compliance at one London merchant bank said that blocking insider trading, upholding ethical standards and enforcing the rules "is our responsibility."

The challenge is to encourage interaction between the compliance department and the other parts of a firm rather than having compliance officers spying on other employees, which would be not only distasteful but difficult.

Thus, recruiters of compliance officers look for lawyers who, in addition to having the right qualifications, are people-oriented.

To be effective, compliance officers must be very personable types, "said Mr. Reilly of Badenoch & Clark. "They must be able to talk to everybody as everybody must talk to them. If the compliance officer is a bore and not able to interact, he will not be

Compliance officers also need senior rank in their firms' pecking orders to make their decisions stick, recruitment specialists said, either reporting to the chief executive or to a nonexecutive committee of the board.

"The function has grown to be a fairly important one, usually with direct access to the chief executive officer of the bank," said Mr. Chamberlin of Korn Ferry International.

Maxwell **Protests** KKR Bid

Macmillan Battle Gets Legal Twist

By Warren Getler International Herald Tribune LONDON — Robert Maxwell, chairman of Maxwell Communication Corp., said Wednesday that he would seek a court order to block Kohlberg, Kravis, Roberts & Co.'s planned \$2.5 billion takeover of Macmilian Inc.

On Tuesday, Macmillan, the U.S. publishing concern, said it had agreed to be acquired by Kohlberg, Kravis, whose \$90.05-a-share offer had topped the \$89 bid by London-based Maxwell Computersition in based Maxwell Communication in a fiercely contested auction.

In a telephone interview, Mr. Maxwell said: "We are certainly filing suit. We've been left with no cery Court.

The British publisher said he was "shocked and dismayed" that the Macmillan board had jumped to accept a sweetened offer by Kohlberg, Kravis, a New York firm that specializes in leveraged buyouts, without providing him an opportunity to better it.

If Macmillan's board had needed a higher offer, he said, they should have so indicated. "But they did not," he said.

Our bid, at \$89 in cash, is the best bid at present," he added.
The Kohlberg, Kravis offer, for up to 91 percent of Macmillan's 27.8 million outstanding shares, is a mixed cash-and-securities tender.

Last year, be failed to establish a major U.S. beachhead when his hostile takeover offer for Harcourt Brace Jovanovich Inc. was defeat-

Referring to the takeover duel, Mr. Maxwell said he was "in it to

Asked whether he was prepared to raise his offer for Macmillan to \$91 a share, Mr. Maxwell said: "In addition to pursuing legal action, we are keeping all options under

Phone Supplier Rejects Offer Made by C&W

Compiled by Our Staff From Dispatches

LONDON - Cable & Wireless PLC, the British relecommunications giant, made a cash offer Wednesday for the 97.9 percent of shares in Telephone Rentals PLC that it does not already own, but the company rejected the bid as

The bid valued Telephone Rent-als at £283.8 million (\$477 million).

C&W offered 305 pence a share cash for the company, which rents, sells, installs and maintains communications equipment in Britain.

C&W said it already owned 1.9 million shares in Telephone Rent-als, representing 21 percent of issued share capital.

Telephone Rentals recommended that its shareholders take no action on the offer and particularly

urged them not to sell their shares. The company also said Wednesday that it bought the 85.75 percent of Carphone Group PLC it does not already own.

C&W is a global telecommunications company, and its subsidiary, Mercury Communications Ltd., is the only telephone system operator licensed to compete with British Telecommunications PLC.

C&W, which completed its takeover of Mercary Communications in 1984, was denationalized in 1985

Matra is Ericsson's main French partner.

when Britain sold off its last shares in the company. British Telecommunications was

privatized in 1984. Telephone Rentals is the secondlargest supplier of customer telecommunications equipment in Britain, but it does not manufac-

ture equipment. In the mid-1980s, it shifted its emphasis away from equipment rentals to sales. Shares in Telephone Rentals quickly climbed above the offering price on the London Stock Exchange. They closed up 124 pence at 335 pence a share.

C&W, whose shares rose 2 pence, to 387 pence, on Wednesday, said prior to Telephone Rentals' rejection that it would ask for a meeting with the board of Tele-phone Rentals in the hope of obtaining a recommendation to the shareholders for the offer.

Industry sources said the C&W hid had taken Telephone Rentals by surprise,

C&W said it believed the acqui-sition of Telephone Rentals would bring major benefits to both Telephone Rentals and Mercury.

Mercury operates in Britain as a public telecommunications specialist under a license granted by the government in 1984. It has invested over £600 million in creating the only all-digital national network in Europe, C&W said. It said that Mercury and Tele-

phone Rentals were a natural fit Ericsson, Matra to Supply French Mobile Phones and would provide customers with a comprehensive telecommunica-tions capability able to compete more broadly with British Telenetwork for the planned digital car-telephone digital mobile telephone system in that country. The system will enable customers to commu-

The company added that a merg-er would clear the way for an imnicate directly between Europe's major countries. According to industry estimates, about a third of all telecommunications traffic will be proved rate of installation of Mercury services and wider use of its carried on mobile systems by the end of the network.

The approval of the Ericsson-Matra team followed a decision in April to sell control of C&W said that if its bid were accepted, Telephone Rentals Compagnie Générale de Constructions Téléwould remain under separate management. But it said that the comphoniques to a consortium headed by Ericsson. pany's South African interests would be sold. The decision to sell control of the second-

Reagan Vetoes Bill to Restrict Textile Imports

Washington Post Service
WASHINGTON — President Ronald Reagan vetoed on Wednesday a bill to restrict textile imports, which he called protectionism at its worst," and he signed legislation implementing an agree-ment with Canada that would create the world's largest open market.

Although the House of Representatives is expected to try to override the veto next week, White House and Capitol Hill vote counters said they expected the president to prevail.

The bill implementing the greement with Canada "is a hallmark of free trade, in contrast to the damaging, protec-tionist textile bill that I vetoed earlier," Mr. Reagan said as he signed legislation to enact the free-trade agreement that he and Prime Minister Brian Mulroney signed in January.

The free-trade agreement with Canada is supposed to take effect Jan. 1, but under the law signed Wednesday by President Reagan, nothing will happen until the pact is ap-proved by the Canadian Par-

the signing of this bill to impress upon the Canadians believe this is to increased trade between the two com-

Air France Move Raises Questions

By Joseph Fitchett International Herald Tribune

day about how many more top managers in state-owned enterprises might eventually be replaced by France's ruling Socialists, but it cies and competence.

Bernard Attali, 44, former head of GAN, a large state-owned insurance company, was named to take over the state-owned airline. Most of his career has been spent as a scaior civil servant, with brief experience in the private sector as an executive at the Club Mediterrance

and a British insurance company.

Mr. Attali is the brother of Jacques Attali, widely considered to be the closest adviser to President François Mitterrand, French commentators said that after the ap-pointment of a man with such conspicuous ties to the president's office, the Socialist government will find it politically harder to change more high-visibility management jobs soon.

prises and public services.

But French and foreign business-

parently intended to confine their

While Mr. Friedmann, 56, a prominent conservative economic strategist, had been expected to be relieved of his duties at Air France, the choice of Mr. Attali surprised many businessinen and analysts, who had expected a manager with more experience in industry. Conservative and center-right politicians accused the minority

MGM/UA Announces Major Restructuring New York Times Service

LOS ANGELES - MGM/UA Communications Co., hit by a number of top-level resigna-tions and questions about its future, has announced plans for a broad restructuring that may include a major financial infusion from Kirk Kerkorian, the motion picture and television studio's majority owner.

In making the announcement on Tuesday, the company said that it plans a \$200 million rights offering to shareholders. Public stockholders would receive the right to bny additional shares at a price yet to be set.

Tracinda Corp., which is controlled by Mr. Kerkorian, holds 79 percent of MGM/UA's shares, and would purchase any shares not acquired by other shareholders under the plan. In addition, the company said that it would consolidate all of its motion picture production in its MGM unit, instead of making films through both MGM and the separate United

Artists division.

Proceeds from the rights offering and the asset sales would be used to repay all of the company's bank debt of more than \$250 million, said Stephen D. Silbert, the chairman and chief executive of MGM/UA.

The company said the plan would improve its annual cash flow by more than \$50 million through a reduction in interest expenses and

IBM Executive Takes Position With Texaco

New York Times Service NEW YORK — Texaco Inc. has reached outside its ranks and named Allan J. Krowe, a top executive at International Business Machines Corp., as its chief financial officer.

Mr. Krowe, 56, succeeds Richard G. Brinkman, 61, who is taking early retirement. Mr. Krowe, who spent 28 years at IBM in various positions, will be a top-ranking Texaco executive in the company of James W. Kinnear, 60, the president and chief executive, and Alfred C. DeCrane Jr., 57. the chairman.

That puts him in a good position in Texaco's succession, but analysts pointed out that Tex-aco had historically chosen its leaders from the oil ranks and not from the financial side. In fact, Mr. Brinkman was Texaco's first chief financial officer, appointed just two years ago by Mr.

The announcement is unusual because Tex-aco tends to promote from within, like most large oil companies, said George F. Friesen, an analyst at Dean Witter Reynolds Inc.

Mr. Krowe, who is the executive vice president and a director of IBM, will be senior vice president and chief financial officer at Texaco. He was IBM's chief financial officer until two years ago, when he was named to his current

Air Canada Public Offering **Oversubscribed**

TORONTO - Investor demend far outstripped supply in the Canadian government's

public stock offering of a 45 percent stake in Air Canada, a spokesman for an underwriter of the issue said. "It was significantly over-subscribed," said the spokes-

man, who requested anonym-

The airline said late Tuesday that 30.77 million com-mon shares of Air Canada would be priced at 8 Canadian dollars (\$6.50) each, for total proceeds of 246 million Cana-

dian dollars.

The issue will dilute the Canadian government's holding in the airline to 55 percent. The government has said it

hoped small investors would buy up to 40 percent of the offering. The airline's 22,000 employees get first chance at buying the shares, followed by small investors from Canada.

SHOW: Iacocca Is Optimistic About the Prospects for Chrysler in Europe year Chrysler would self 45,000 to 50,000 cars and Jeeps in Europe. Chrysler now has 300 dealers in West Germany. five European countries in April, has already shipped 17,000 units to Europe. It expects the number to reach 35,000 by the end of 1988. Of those, 20,000 are expected to be Jeeps. Last year, Mr. lacocca projected sales of only 5,000 Chrysler cars and 10,000 Jeeps in Europe.

and Italy.

ket, by 1992.

ties in Europe."

When we began exporting here. after being gone so long — over a decade — I really didn't know what to expect," he said. "But what has happened over the past year has given us a lot of encouragement. Nothing establishes credibility for the new kid on the block as fast as getting cars on the road."

Chrysler sold its European automaking operation to Pengext SA of France in 1978 when the No. 3 U.S. automaker was near bankruptcy.

Chrysler's initial penetration in Europe has far exceeded the efforts of Ford Motor Co. and General Motors Corp., which are also exporting U.S. made models to Europe. In the first eight months of 1988, Ford sold about 2,800 U.S.-made cars in Europe and GM sold

1 Skety, v. *;

Traders focused attention on the pound after the chancellor of the Exchequer, Nigel Lawson, said that it would be inappropriate to let the currency decline as a means of adjusting the British current account

Mr. Lawson's remark followed Tuesday's report that the British current account deficit for August fell to £1.31 billion, well below the £2.15 billion record in July.

The pound closed in New York at \$1.6900, up from \$1.6785 on Tuesday. It also rose to 3.1720 Deutsche marks from 3.1540. The dollar closed at 1.8778 DM,

down slightly from 1.8788 on Tuesday, and at 134,075 yen, down from

Against the French franc it fell to 6.3930, from 6.3945, but it edged 1.5913 Swiss francs from up to 1.5900

"Right now it is very hard to say what is on the minds of traders with the IMF meeting going on," said Françoise Soares-Kemp, a vice president in the treasury division of Credit Strices "It's one of the most Credit Suisse. "It's one of the most interesting meetings in a long

Speakers at the meetings of the

International Monetary Fund and World Bank in Berlin have called for greater free trade and for commercial banks to do more to help trim the \$1,23 trillion Third World debt burden.

The fact that they are talking about it out loud, about forgiving debt, that's very exciting." Ms. Soares-Kemp said. "I think it has a very positive tone."

Earlier in London, the pound ended at \$1.6855, up from \$1.6785 at the close Tuesday, and at 3.1675 DM, up from 3.1548 DM. It closed on its trade-weighted index against a basket of currencies at 75.8, up 0.2 points from the previous close.

The dollar closed at 1.8780 DM, slightly lower than 1.8790 DM on Tuesday; at 134,25 yen, compared with 134,45; at 1.5902 Swiss francs. compared with 1.5920; and at 6.3938 French francs, down from (UPL, Reuters)

Sprinkel Calls Price Rises Temporary Phenomenon

WASHINGTON - Beryl W. Sprinkel, President Ronald Reagan's chief economic adviser, said Wednesday that recent price increases were temporary and that inflation was not threatening the

He said the recent rise in the inflation rate as measured by the consumer price index was due to higher food prices caused by last summer's North American drought and higher costs for imported goods caused by a weak dollar.

"We went through what I would call an inflationary scare." Mr. Sprinkel, chairman of the President's Council of Economic Advisers, said as he released a report reviewing the state of the U.S. economy. Last week, the government reported the consumer price index rose

0.4 percent in Angust. Consumer prices rose by 4 percent for the 12 months ended on Aug. 31, but they rose by an annual rate of 4.6 percent for the first eight months of 1988, higher than the 4.4 percent for all of 1987, the Labor Department said. Financial markets have been concerned that the U.S. economy has been growing too rapidly, which poses the danger of inflationary pressures from rising wages and prices.

The administration is eager to calm such fears in a presidential election year. Concern about inflation has translated into higher interest rates throughout the economy.

Debtors Say Relief Is Short of Needs

By Carl Gewirtz

International Herald Tribune
BERLIN — The Third World's response here Wednesday to the industrialized nations' weekend offer of partial debt relief was thanks, but more is needed

Speaking on behalf of Africa at the joint annual meeting of the In-ternational Monetary Fund and the World Bank, the finance minister of Botswana, P. S. Mmusi, welcomed the decision by the Group of Seven leading industrial democracies to cut the debt owed by the poorest states — mostly those in sub-Saharan Africa — to developed countries.

"This appears in be a step in the right direction," Mr. Mmusi said. But, he added, "There is no doubt that given the magnitude of the debt crisis in our continent, they are far below our immediate re-

The Group of Seven agreed to cut the debt by one-third, either through outright forgiveness, a reduction in interest rates or a stretching of the life of the loans.

The reduction was proposed at the Toronto summit meeting in June. At the group's meeting in Berlin, the governments agreed on how to calculate the equivalent value of the three options.

Mr. Mmusi also assailed the alleged case-hy-case approach adopted by creditors in handling the debt

"It is common knowledge that much of the work is done in Washington and that different country programs show a very close similarhe said.

"We strongly believe that na-nonal authorities should be allowed to play a more important role in the design and implementa-

tion of adjustment programs." A number of ministers - including Finance Minister Mailson Nobrega of Brazil, who is the spokesman for the developing countries at

the conference - have complained

servicing Third World debt. There is virtually no effective surveillance pressure on the major industrial countries to comply with the fund's policy recommendations," Mr. Mmusi said. The IMF has repeatedly called on Washingmo to reduce its budget deficit more quickly than it is doing.

Mr. Mmusi also said that, despite "strong declarations of commitment to free trade," protection-ism was rising in the industrialized

During the meetings, World Bank officials said their studies show that protectionism in the industrialized countries costs the developing countries double what those countries receive in aid from the developed ostions.

Although speaking only on be-half of the African nanons, the tone of Mr. Mmusi's speech reflects the frustration and growing anger ex-

raise taxes to cut its budget and trade deficits drives up interest debt-burdened countries after six rates and, as a result, the cost of years of declining living standards years of declining living standards and rising poverty.

Among speakers from the industrialized countries, the British chancellor of the Exchequer, Nigel Lawson, said that his country's current-account deficit this year would be about as large as the United States's in economic terms, or about 2.5 percent of domestic out-

While Mr. Lawson did not put a money value on the British deficit, the percentage estimate would put the figure at about £12 billion,

compared with a shortfall last year of £2.5 billion. He said that it was a "mistake to think that the automatic response in a current-account deficir should

be a lower exchange rate." He added that while devaluations may be necessary, it was wrong to assume that a currentaccount deficit was sufficient evi-

dence of the need for one.

Banker Says Dollar, Pound **Must Decline**

WEST BERLIN — The dollar and the pound have to fall to cut trade deficits in the United States and Britain, according to the chairman of Midland Bank PLC, Kit McMahon.

"The recent rise in the dollar seems to me to have been quite irrational and will have to be reversed," he said.

Over time, the pound must fall against the Deutsche mark, he added. "It's hard to imagine how we can avoid a considerable reduction in the sterling exchange rate."

Brady, New U.S. Treasury Chief, Treads Softly

By Reginald Dale

onal Herald Tribune BERLIN - Nicholas F. Brady, the new U.S. Treasury secretary, slipped quietly in and out of his first international meeting this week leaving an expectant world financial community little

chance of taking his measure.

"He came through Berlin like a Stealth bomber on a training mission, with no radar profile," said one private banker attending the international Monetary Fund and World Bank annual meeting here.

"The presence of a U.S. Treasury secretary has been less noticeable here than at any international meeting I can remember," said a veteran international official.

That appeared to be precisely Mr. Brady's objective. Some conference participents con-cinded that the neophyte Mr. Brady wanted to avoid a faux pas in the clite club of finance ministers and central bankers to which he had gained entry only a few days before.

Until his appointment last month, Mr. Brady was chief executive of Dillon, Read & Co., a New York investment banking firm, with little experience in top-level, government-to-government international financial diplomacy

Above all, however, Mr. Brady's colleagues in other delegations assumed that he wanted to say nothing to upset the financial markets or damage the presidential campaign prospects of Vice President George Bush. Mr. Brady's brief speech to the meeting on

Tuesday bore out that analysis. In a cautious address on the meeting's opening day. Mr. Brady said nothing new and did little more than generally indicate his support for the policies of his predecessor at the Treasury, James A. Baker 3d, who is now running Mr. Bush's campaign.

"He did not confront one single issue," said a frustrated British economist, who had hoped for a more revealing view of Mr. Brady's thoughts. Most delegates in Berlin assume that Mr. Brady is likely to continue in his post if Mr. he can't achieve anything?"

Bush wins on Nov. 8, making them particularly interested in his views on such matters as the U.S. budget deficit and exchange rate policies. Mr. Brady, however, appeared only once in public, to make his speech, and did not submit to reporters' questions either on or off the record.

By all accounts, he was equally laconic behind closed doors. Officials from other governments said Mr. Brady coorributed little to Saturday's meeting of representatives of the Group of Seven major industrial countries, leaving most of the running to Alan Greenspan, chair-man of the Federal Reserve Board.

Mr. Brady's colleagues were on the whole understanding. "He did not say too much, and I think if someone doesn't need to talk too much, to me that is usually a good sign," said Giuliano Amato, the Italian treasury minister.

"He was almost invisible," said a senior West

German official. "But that was very wise. Why should he come here and make a big show when

Peru Courts Its Creditors

International Monetary Fund and World Bank meeting here this week in a bid to improve relations with its creditors, Peruvian and banking sources said Wednesday.

Signaling this, the Peruvian economics minister, Abel Salinas, was due to meet with the managing director of the IMF, Michel Camdessus, for exploratory talks.

In recent weeks, Peru has indicated that it wanted to end the confrontation with its creditors after nearly two years during which it fell behind on its debt payments. Peru is more than \$1 billion in arrears to the IMF and World Bank, and has shown little intention of

The crisis began three years ago when Peru, under President Alan Garcia Perez, imposed a debi service limit of 10 percent of export income. Since then, negotiations oo its \$16.4 billion foreign deht have been stalled, the IMF declared Peru ineligible for loans and the government ran up arrears to the fund of almost \$700 million.

But on Sept. 6. Peru announced an austerity package aimed at cutting inflation, which is rising toward 1,000 percent annually, and conservative political leaders in Lima called oo Peru to reach a new agreement with the IMF.

This list, compiled by the AP, consists of the 1,800 most traded securities in terms of dollar value, II is undated twice 9 year. Via The Associated Press

Former Toy Official Is Charged by the SEC With Insider Trading

change Commission has charged a former offi-cial of Toys 'R' Us Inc. with iliceal insider trading of options on the toy retailer's stock

purchasing at the Toys 'R' Us headquarters in Rochelle Park, New Jersey.

Rochelle Park, New Jersey.

The SEC said Mr. Markham made \$40,000 in illegal profits from the trades. The commission is seeking a return of the profits and "an appropriate civil penalty" under the Insider Trading Sanctions Act of 1984.

Mr. Markham, who lives in Paramus, New Jersey, could not be reached Tuesday for comment because his telephone number is unlisted.

Mr. Markham's lawyer, Anne Flannery, said only that her client planned to contest the charges. Ms. Flannery is the former enforcement chief of the SEC's New York regional office.

BOOKS

1941: Our Lives in a World on the Edge

By William A. Klingaman. 448 pages. \$22.95. Harper & Row, Publishers Inc., 10 East 53d Street, New York, N. Y. 10022.

Reviewed by Arnold I. Isaacs

LONDON stoically endures the last and most brutal raids of the German bombing campaign. Adolf Hitler, proclaiming that "the name of Moscow will vanish forever," sends 148 German divisions to invade the Senior Union the most colossal clash of the Soviet Union, opening the most colossal clash of armies in the history of warfare. Following the front-line troops are the SS Einsatzgruppen, execution units whose assignment (foreshadowing the death factories that will soon make killing even more efficient) is to murder Jews and other supposed racial inferiors and enemies of the Reich enemies of the Reich. .

On the far side of the world, Japan's military rulers are planning their huge gamble of war with the West. And in America, still measily at peace, Joe DiMaggio hits safely in 56 straight games; President Franklin D. Roosevelt cautiously and somewhat deviously tries to position the country for future conflict without arousing an isolationist reaction; and a disastrously unpre-pared nation sluggishly and reluctantly begins to arm for the war that will come, in the final weeks of the year, with the devastating Japanese attack on Pearl Harbor.

From these and many other events, William A. Klingaman has constructed a mosaic of "a world on the edge," as he calls it — the world of 1941, the year World War II became a truly global conflict and (as was far from clear at the time but is evident in retrospect) the year in which Nazi Germany and imperial Japan were each led by overreaching ambition to attack too powerful opponents and thus sealed their own eventual defeat.

As in his first book, "1919: The Year Our World Began," Klingaman's goal is the dramatic re-creation of events, not historical analysis, and his sources are, for the most part, contemporary accounts and first-hand memoirs. From these he has called a mass of descriptive detail and evocative quotes, woven into a fluent, fast-paced, readable narrative.

At its best, Klingaman's writing achieves a poetic vividness — as when, in a passage describing London under German attack, he writes about searchlights that

felt for the bombers with broad stalks of light that faded into the mists at the edges," while "antiaircraft guns thumped and pounded at the invaders and shells burst like weird blue diamonds below the stars."

For all Klingaman's impressive research and fluent style, though, "1941" lacks a little in freshness, perhaps because much of its material is already so familiar. London under the Blitz, the Pearl Harbor attack, convoys across the North Atlantic, even the war in Russia — these are all stories that have been told many times before, in both fictional and nonfictional form, and not only in books but in plays and movies and on television as well. Although Klingaman reteils them well enough, he really has nothing new to offer his

The book also suffers from a somewhat uneven treatment of its subject matter. Klingaman's portrayals of Japan and the Soviet Union on the brink of war are quite cursory and drawn from a very narrow selection of sources, compared with his far ampler accounts of Britain and America. (The treatment of Germany falls somewhere in between.) The disparity does not seem to reflect a judgment of historical significance, but simply the far larger volume of available contemporary writing on the British and American experience.

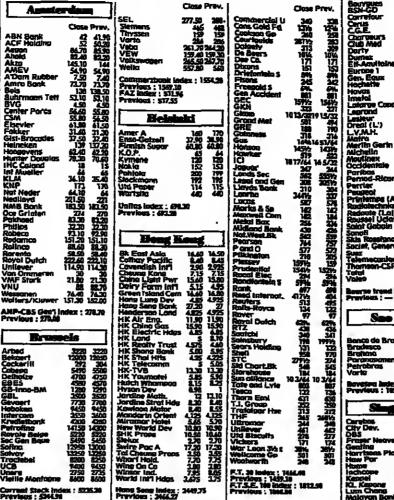

Nonetheless, "1941" is well worth reading for its portrayal of the spirit, mood and texture of the times. It will certainly reward those readers who would like to have, in a single readable volume, a refresher course on some of the major early turning points of World War II. In addition, by presenting the year's events panoramically, instead of pursuing one or another subject more narrowly as conventional histories tend to do, Klingarmen succeeds in permeding us that 1941 wee

more narrowly as conventional histories tend to do, Kingaman succeeds in persuading us that 1941 was indeed one of those milestone years, transforming the world and changing irrevocably the lives of virtually everyone living or yet to be born.

"1941" may have a special impact for one group of readers: those who were born, as I was, during that year. Writing about that age group, I once observed that we 1941 babies seemed to resemble survivors from some vanished civilization, "like children in a flood, led away from our native village just as the waters poured over to drown it forever." Reading William Kingaman's vivid account of the world that year, a world on man's vivid account of the world that year, a world on the edge, brought that feeling back once again.

Arnold I. Isaacs is the author of "Without Honor: Defeat in Vietnam and Cambodia." He wrote this for The

T HE second Royal Viking conti-nent-wide game was played re-cently at clubs throughout North America. This follows the successful precedent of the Epson World Pairs in which the diagramed deal was played June 4. The official analyst pointed out that four hearts could be made if the lead was helpful, but Howard Piltch of Andover, Massachusetts, made a useful overtrick with no help at all.

Two diamonds was a Drury convention variation, and a diamond was led. Piltch finessed, won with the ten and repeated the finesse. He

finessed the club jack, and West won with the ace and led a third diamond to dummy's king, allowing a spade discard. A spade to the queen proved to be another successful finesse, and the club king was cashed. A low heart lead forced West to duck, and the queen won. The dia-mond are provided another spade discard, and as East could not ruff, the position was clear. Piltch ruffed a club, cashed the spade ace and led the heart eight to endplay West at

In events of this type the match points are predetermined. When the deal was over, Piltch knew that he had scored 89 out of a possible 100.

Five Reinstated by NFL After Drug Suspensions

The Associated Press NEW YORK - The National Football League reinstated five players Tuesday after 30-day sus-pensions for failing preseason drug tests. New York Giant linebacker Lawrence Taylor, Buffalo defensive end Bruce Smith, San Francisco receiver John Taylor and linebacker Emanuel King and cornerback Daryl Smith of Cincinnati are eligi-

ble to play this weekend. The respective teams can ask the league for a one-game roster exemptions for the reinstated players, who will continue to receive counseling and treatment. Reinstatement is on the condition of their totally refraining from further violations of the league's substance-abuse policy.

ian veteran Tibor Klampar.

In synchronized swimming Carolyn Waldo of Canada pulled ahead of her principal rival, Traci Ruiz-Conforto of the United States, after the compulsory fig-ures. Waldo had a total 199,350 points to Ruiz-Conforto's 197.033. In the men's competition, Ahn

Byung Kenn of South Korea, the gold medalist in 1984, and Hiro-taka Okada of Japan, the 1987 cal Tayot ol France defeated Okada in the 78-kilogram competi-tion. Ahn lost to Kevin Dohery of (AP, UPI, AFP)

■ U.S. Runner Arrested

Johnny Gray, a U.S. runner who finished fifth in the 800 meters, has been arrested for kicking a taxi. Associated Press reported

According to a police account, the taxi driver, complaining that Gray was blocking the road, blew his horn, after which Gray kicked the taxi and tried to flee. Gray was questioned at a police station, then released in the custody of U.S. Embassy officials. The case was forwarded to the Public Prosecutor for possible action on charges of vio-lent assault, the police said.

Renters reported that South Korean state radio said Wednesday that the U.S. swimmer alleged to have stolen an ornament from a night club is unlikely to be charged in light of his status as an Olympic athlete and lor the good of Korean-

American relations. Elsewhere, three Olympic soccer players were banned from Saturday's final between Brazil and the Soviet Union, according to Agence France-Presse. Brazilian midfield players Geovani and Ademir received one match suspensions from FIFA, the sport's governing body, along with Soviet defender Alexei Cherednik. All three were given their second yellow card of the tournament for infractions in Tues-

Americans, Koreans, Soviets Survive Boxing Quarterfinals

SEOUL — Roy Jones, landing big rights at will, beat and bloodied Yevgeny Zaitsev in the first U.S. Soviet Olympic boxing match since 1976 on Wednesday to lead seven other Americans into the semifi-

Jones hattered Zaitsev's nose with a thundering right late in the first round and cut his lip in the second en route to an easy 5-0 decision win in the light middleweight

Super heavyweight Riddick Bowe added a first-round knockout over Peter Hrivnak of Czechoslovahia four bouts later to cap a day that saw all five U.S. fighters in action win their quarterfinal bouts and assure themselves of bronze medals at the worst.

"We knew we were capable of doing this good," said heavyweight Ray Mercer, who also scored a knockout win. "The press gave us no credit, saying we weren't that good. But it didn't faze us." Wins hy Mercer, Kennedy Mc-Kinney and Kenneth Gould earlier in the day enabled the United States to advance eight fighters to the semifinals, the most of any team. The Soviet Union and South

nade the semifinals along with three lighters from the suprisingly strong Polish team.

Jones was dominant in his fight, overcoming a slow start to land almost every right lead he threw against the left-handed Soviet. The 19-year-old from Pensacola, Florida, began showboating late in the fight, taunting Zaitsev with flashy "When I first came out I wasn't

sure what to expect," said Jones, who was tentative early before landing his lirst big punches. Then I said, 'On boy, you're on a

roll. keep on doing it."

It was the first Olympic matchup between fighters from the two countries since Michael Spinks stopped Rufat Riskiev in 1976.

Bowe's win was the eighth in inconstants of the stopped Rufat Riskiev in 1976. nine quarterfinal bouts for a U.S. team that is beginning to exert its domination in the boxing competition. It came against an outclassed Hrivnak, who went down from a right hand and was counted out at 2:34 of the first round.

The 21-year-old Bowe appeared bemused when be saw his portly opponent, and threw only a lew punches in the opening two minutes. After he was urged by U.S.

Three East German boxers also took only a few punches to end the

"My coach yelled, 'If you don't do something now, I'm going to stop the fight," said Bowe, of New York. "But I stopped the fight." Mercer, a 27-year-old Army ser-geant, scored a first-round knock-out of heavyweight Luigi Gaudiano of Italy, while Gould scored a deci-sion in the welterweight division and McKinney won in the bantam-merical division by decision

weight division by decision. Three South Korean fighters also won by decision, including a 3. win in the light middleweights by Park Si-hun over Vincenzo Nar-diello of Italy.

Mercer knocked out Gaudiano late in the first round with a savage right uppercut followed by a left hook to advance to a Thursday heavyweight semifinal against Ar-nold Vanderlijde of Holland, who took a 5-0 decision win over Ghyula Alvics of Hungary. McKinney and Foster had little

trouble winning easy decisions, with McKinney taking a 5-0 win over Stephen Mwema of Kenya and Gould winning 5-0 over Finland's Joni Nyman.

"Right now I'm not satisfied said McKinney, a 22-year-old from

Games Official Says Johnson Told of Taking Drugs

phan said of Johnson, "To my knowledge and to his knowledge, no, he has not taken anything,"

"I never gave him any" steroids. Dr. Astaphan said, "He never told me he took any."

On the ABC "Nightline" program Tuesday night, Dr. Astaphan again denied the Sports Illustrated article. "These charges are totally untrue and unfounded," he said. When Johnson rejoined the Ca-

nadian track team in Europe after his injury, he was in surprisingly "great shape," his coach. Charlie Francis, was quoted as saving last

will begin soon, but that comprehensive testing of all athletes had been rejected as too expensive and too harsh.

The new program calls for ran-dom testing of all athletes on a year-round basis rather only during national competitions or when they set world records.

Casey Wade, the competitions manager for the association, said the policy was planned late last year and had nothing to do with Johnson's disqualification.

Andy Higgins, coach of Canada's decathlon team, said Wednesday in Seoul that be long had seen signs of steroid use in Johnson.

"I'm not naive," he said. "Somebody has been training his butt off for five or six years, and, all of a sudden, you see a change in performance and the shape of the human body.

James Worrall, an International Olympic Committee member from Canada, called Johnson "basically decent, shy young man." "Unfortunately, he's been per-

suaded by those managing him," Mr. Worrall said. Johnson, Mr. Worrall said, "was hero and role model."

"But now, of course, he's de-stroyed that," Mr. Worrall added. "He's destroyed his whole life."

Robinzine is for out-of-competi-

It simply makes sense. If you tell all athletes when they are going to

be tested, you are giving the cheat-

ers most of the information they

Soviets Defeat U.S. by 82-76, Play Yugoslavia for Gold in Basketball

Washington Post Service

SEOUL - This time they did not need to replay the last three seconds of the game. This time there was no controversy; the U.S. men's basketball team could not claim for a second that it had been cheated in any way.

The Soviet Union, led by Arvidas Sabonis, beat the United States in Olympic basketball Wednesday and won fair and square. The Soviet players beat the great John Thompson defense, beat the great David Robinson, beat the great Danny Manning, beat the thought-to-be invincible United States and its superior basketball program. The score was the Soviet Union

82, the United States 76. After compiling an 85-1 record since basketball became an Olympic sport in 1936, the United States fell on its face, in its first Olympic game against the Soviet Union

The United States didn't even get to the gold medal game this time. This time, it will be the Soviet Union playing for the gold, on Fri-day, against Yugoslavia.

Yugoslavia, with the 7-foot (2.1meter) Vlade Divac getting 15 points and 10 rebounds in the first half, with Drazen Petrovic sinking six three-point shots and scoring 24 points, routed Australia, 91-70, lat-

Australia, already assured of its best Olympic finish, will play the United States for the bronze medal Thursday night.

By Peter Alfano New York Tunes Service

SEOUL - In defeat, John Thompson tried to be philosophical, saying that hard work and a good effort should be its own reward. It may have been the right thing to say, but those were not his sentiments during the summer when he was apprehensive about falling short of the gold. And it wasn't the attitude echoed these past two weeks, when he said that the first priority was to win, not have a good time.

Judging by their stunned expres-

record holder in the decathlon, and

In the first of the 10 events over

the Soviet Union. The nnly loss had been to the Soviets in the contro-versial final in 1972, in Munich.

Americans were cheated of victory when the final three seconds were replayed twice. There was no doubt, however, about which was the better team Wednesday. The Soviet Union outplayed the Americans in every phase of the game. The Soviets ocutralized Thompson's vauoted pressure defense with a textbook passing game; they slowed the fast break to a walk, hitting their outside shots, then

dropping back quickly on defense. Thompson had built his team on defense, a coaching philosophy that won him a national title at Georgetown University and made the Hoyas a perennial power. To make his point, he chose Stacey Augmoo of Nevada-Las Vegas, a defensive specialist, as his 12th player.

Earlier in the day, Debbie Flintow athletes, Jurgen Hingsen of toff-King of Australia won the West Germany, the former world What Thompson probably oceded Wednesday, though, was a scor-Pam Marshall of the United States er such as Mark Macon of Temple, Steve Kerr of Arizona State, Stacey King of Oklahoma, Sberman two days, the 100-meter race, Hing-Douglas of Syracuse, Danny Ferry sen was disqualified after three of Duke. brought an 85-1 Olympic record gymn. It is a team made for a five-into Wednesday's semifinal against month college season, oot two month college season, oot two weeks. Given the nature of Olympie play - the medal round is sinninatinn — no team can af-

To this day, many feel that the ford to have a bad game. Thompson also could be second guessed about the manner in which he used, or did not use, Danny Manning on Wednesday. After drawing his second foul less than three minutes into the game, Manning was benched for the rest of the half. The Soviets built a 10-point lead in his absence, dictating play.

Manning is an experienced playcr, accustomed to situations such as these. Thompson made him a spectator and Manning had, most likely, the worst game of his career.

"It's one of the biggest disap-pointments of my life," a somber Manning said after the game. He added: "It's hard to take, any way you look at it."

At the other extreme, Sharunas Marchulionis had four fouls in the first half and Arvidas Sabonis three, but Alexander Gomelsky, the Soviet coach, kept them in the game.

Representing a country that had won nine of the 10 previous Olympie gold medals in basketball, Thompson oot only had to win, but

felt he had to do it impressively.
"The pressure," said Lute Olsoo
of Arizona State, who coached the U.S. team in the 1986 world championships, "has to he very intense If you win, people say, 'So what?' If you don't, they want to know why. I think John did a tremendous Job man the way Rimas Kourtinaitis of putting together a team he was

SEOUL - Sergei Bubks of the Soviet Union, the world record holder in the pole vanit, came within a hair of not winning a medal Wednesday. Then he stalked off after winning the gold.

Jurgen Hingsen of West Germany, the former decathlon world record holder, stormed out after being disqualified in the opening event.

Bubka began vanlting, like all the Soviets, at 18 feet, 8½ inches (5.70 meters), when most of the other competitors already had been eliminated. At 19-414, he first missed badly, and his second an absolute mess. On his last try, he hit the bar. It bounced atop the stanchion, then hung on the far was that down for the property of the support. Bubka raised his arms as if to keep the bar from (MR) British. Chick and the begin jumping about in an uncharacteristic by force that the begin jumping about in an uncharacteristic buffurst of joy. Had it fallen, Bubka — who has dominated pole vanlying

for years — wouldn't have won a medal.

When he had wrapped up the gold, he asked that the bar be set at 20 feet.

But when the few thousand people left in the stadium burst into applanse of the Frenchman Christian Plaziat's high jump in the decathlon at the other end of the stadium, Bubka slammed down his pole and walked off. Teammate Rodion Gataulin had run out of time for his first try at 5.95 nicters because he stopped when a cameraman moved and distracted him. 'As he was about to make his second try, officials began laying a

ceremonial red carpet across the vault runway. Gataulin waved them angrily away but, his concentration broken, he passed under the bar.

Fingsen, a leading contender for a decathlon medal, screamed at the
South Korean officials, "it's impossible, it's impossible" after they turned on the red flashing light signaling his disqualification in a 100-meter heat.

The West German team protested that Hingsen had not been told of his second false start. Horst Blattgerste, a team official said, "Hingsen does not dispute two of the false starts, but be never moved on the third one. The jury of appeal took 20 minutes to reach its decision, which delayed the start of the next event, the long jump. Then it disqualified Hingsen.

Said one official, "We cannot have athletes overruling the starter's decision. What credibility would that leave the starter with." That left the three-time world record-holder trailing the 100-meter wither and overall favorite, Daley Thompson of Boitain, by 947 points.

(AP, UPI, AFP)

ing. Lewis stretched his advantage a bit and was never seriously challeaged through the finish. Reynolds won the silver in 43.93, and Everett was third in 44.09. "I wanted to get out pretty fast and hold the second curve," he said. "When I realized I was strong enough to come home. I raced to the tape: I felt Danny and Butch 200 Is a Family Outing coming on, but then it was a matter of holding on." ily treats Lewis like one of its own. So when Lewis more or less eased toward the end of the 200meter final in the U.S. Olympic trials two months ago and De-Loach won, Lewis scemed to be doing a favor for a friend. And when Lewis seemed to ease in the last stride or two of Wednesday's Olympic 200-meter final and De-Loach won the gold medal, there

was speculation that Lewis was doing another favor. Lewis said no. "Joe just ran a tremendous race." said Lewis. "I'm a little surprised 1

ran as fast as I did, so I'm happy with second. He did it all himself. I'm proud of him for that. I'm proud I was able to run a great time in the final, and that was a great time no matter where I finished." "With 30 meters to go," said De-Loach, "I could sense Carl was there I made a slight surge 20 me-

ters out to come back, and I had the strength to do it. I was pretty sure I won, but it was close. I'm in the best shape of my life. I felt I had a chance to win just like everybody else."
DeLosch's time of 19.75 broke

Lewis's Olympic record of 19.80 in winning the 1984 gold medal in Los Angeles. Only Pietro Mennea's 1979 world record of 19.72 is faster. Lewis, who ran 19.75 in 1983, ran 19.79 here. He was favored to win his third gold medal en route to equaling his four golds of 1984, but his friend ended his chances. "I hoped no one would ask me

about that," said DeLoach. "I really hate that, but that's what the game is all about. There are going to be disappointments and joys. This is a lifelong dream for me. This is the ultimate. It really means a lot, but I hate that I was the one to stop Carl's dream."

With the drug disqualification of Carl. too."

"I don't think so," he said. "I improved the Olympie record I set in 1984 and I was defeated. 1 think sprinting has improved. And I'm going to run at least next year and then evaluate it on a year-to-year

DeLoach comes from Bay City, Texas, and is entering his senior year at the University of Houston. Lewis, a Houston graduate, helped recruit him. Lewis and DeLoach

train in Houston under Tom Tellez, their college coach. "Before I started training with Carl," said DeLoach, "I could run fast, but I didn't understand races.

He taught me." DeLoach is the youngest of 13 children — two boys and 11 girls. He is 21. His oldest sister is 42. Their father, Joe DeLoach Sr., is a maintenance man at a nuclear pow-

er plant in Bay City.
Joe DeLoach Jr. is an unor-dained pentacostal minister who last year preached his first sermon. He is affiliated with the Bible Days Revival Church in Bay City.
"He's running for God now,"
said his father. "Whenever be's not

at school or running, he's at church. He's very mature and he listens to "Since Carl lost his father last year, he's my son. He comes over a lot, and he and Joe go fishing. They're just like brothers. His moth-

er is living in Houston now, and we had her down. We are all family." Lewis and DeLoach have been friends since 1984. The first time Lewis visited the family, De-Loach's sisters told their friends in advance. The whole neighborhood turned out.

"A cop came over to keep everything in order," said DeLoach's father. "But he really wanted to meet

GAMES ANALYSIS

easy to get all the best players. Some have turned the U.S. basketball NBA clubowners surely will object to their multimillion-dollar properteam into a bronze bust at best, the white fermented by American sour tics risking injury in the Olympics. Basketball Association players be Another question: how much would each of the NBA players be allowed to compete in the Olympics. paid? Or would they be willing to And for the good of the game, even do it for God and country?

> Another question: could the NBA coexist with the International Basketball Federation that rules Olympic basketball.

In any event, it's unlikely that a future Olympic team would be the NBA all-star team. But it could be get up to be No. 1 sport in the world. Larry Bird, Magic Johnson, dominated by a few NBA players who simply want to win an Olympic gold medal. Especially now that the Soviets have a two-game winning streak against the United States.

> The Russians have poise and maturity," John Thompson, the U.S. coach, had warned. "There's no team here that knows each other more and plays as well together." Several months ago Thompson complained that the NBA was

> lping the Russians by promoting exhibition games with the Milwaukee Bucks and the Atlanta Hawks. He also griped about the Portland Trail Blazers arranging for Arvidas Sabonis to work out in Oregon while rehabilitating a damaged Achilles' tendon under the care of their team physician. "Coach Thompson, great coach,

the Summer Games. But it won't be but he's not foreign minister," Go-

Union have good contact in politics, economics, sports. People sleep, no problems. Maybe coach Thompson do not understand this."

Maybe most people in America and Russia do sleep better now that glasnost has de-iced the cold war somewhat. But for the next few nights Thompson might be secondguessing himself for not having chosen another three-point shooter to offset Rimas Kurtinaitis, be with the blond rat-tail haircut. He had 28 points, and four three-point baskets, as many as all the Americans.

Thompson's only real outside shooter, Hersey Hawkins, remained on the bench with a damaged knee. "I think the player we could've used was Hersey," Thompson said. "If we could've nailed those threepointers, we'd have had a better

chance.

After the Americans closed to 52-50 early in the second half, the Soviets surged ahead, 65-57, and never let their lead get less than 79-76. They had shattered Thompson's press by running picks off Sabonis, the skyscraper who reduced J.R. Reid to resembling a six-story apartment house. Only 23 years old, Sa-bonis had 13 points and 13 rebounds. If healthy, he will be a force in the NBA if and when the Soviets allow him to join the Trail Blazers.

"Sabonis is a presence on the court, he's also an excellent passer," said Thompson, finally unable hide his annoyance with the Trail Blazers' arrangement. "He players on the Olympic team.

melsky said. "Today U.S.-Soviet had to be improved. He's been working hard all summer against America's finest.

America's finest, judging by that remark, are the NBA players, not his Olympic team of NBA rookies and collegians. But now that the Americans must defeat Australia to salvage the bronze medal, some NBA players might be willing to sacrifice their Juoe and July in 1992 to prepare for the Games in Barce lona and restore some basketball respect for the United States.

In 1992, some of this year's Olympians, ootably Danny Manning, might even want to return for another shot at the Russians.

Manning, who will join the Los Angeles Clippers as the very first choice in the NBA draft, didn't score. Zero. Zilch. After having been on the bench for the last 17 minutes of the first half with two personal fouls, be took a total of only four shots. He had only three rebounds and no assists.

"It was," Manning said later, "one of the biggest disappointments of my life.

Thompson also acknowledged the "disappointment" at not winrung the gold medal that the United States has considered its own, But he told his players that he didn't want to see any tears.

"They're very disappointed, I'm very disappointed," the coach said. "But there'll be life after." And by 1992, that life might include at least some of the best NBA

Joy in Mudville: U.S. Baseball Team Grabs Gold

By William Gildea Washington Past Service

SEOUL - It ended the way Hollywood would have written it, the way any American who had ever seen Jim Abbott pitch wanted It felt like it does when your

World Series. It was a game never in to be forgotten by those who played it. And when it was over, when the United States had beaten Japan, 5-

3, in a tense and dramatic demonstration baseball game Wednesday for the Olympic gold medal, Ab-bott found himself at the bottom of a 20-player pileup of a celebration on the pitcher's mound, his face ground into the dirt. His elation transcended any-

Pitcher Abbott Makes Big Play "It was my dream of a lifetime," In these Olympics, baseball was

ming.
When the American players unthe team took off en masse in a victory lap around the outfield, all 20 of them running together, sever-al carrying American flags that rippled in the breeze. It was the magic moment they

had worked all summer for, spent the last six weeks abroad struggling to get to and - to their everlasting joy - made the most of when they 20t their chance.

said the one-handed pitcher who a "demonstration" sport. It will be worked his way through a sixth- a full-fledged sport starting in the ming jam that almost sent him to 1992 Games. WASHINGTON — The worst mistake I made recently was to tell people that during the summer I had been a guest on Donald Trump's zillion-dollar yacht, the Trump Princess. I thought they would be delighted that not only had one of their friends made the big time, but had even walked the decks of the largest private boat in

the world. Instead, they could not have шоге shocked. It was as if I bad played racquetball with the Ayatollah Kho-

"How could you go on Trump's beat?" one of my friends asked.

"What is he?"

"I bad no Buchwald choice," I protested. "I have relatives in Atlantic City." "But don't you know what the man is?" another woman said.

"He's pushy," she replied. "That's not a reason to refuse to set font on his boat," I said. "Did I tell you that it was previously owned by Adnan Khashoggi, the Middle Eastern wheeler-dealer? They say he used to smuggle his women on board by belicopter. I

just wanted to see how he did it. "According to Trump, the boat was used to make business deals. Khashoggi would get the ladies he had brought on board to serve tea, and do whatever else was necessary to make everyone more comfort-

"Does Trump know this for a fact?" a man asked. "Well, be didn't see it with his own eyes - but he did show us the staterooms, which still bave

scratches on the marble." "Anyone who would go on a Trump boat," said an old friend, has no self-respect. What else was

Church Gets Mystery Gift

The Associated Press MORTEHOE, England Mary Magdalene Church's 900year-old Norman tower, one of Britain's oldest, will be restored thanks to a mystery benefactor wbo gave £25,000 (\$42,000).

"Believe it or not he has a bulletproof sauna."

ART BUCHWALD

Trumping Sour Grapes

Why does Trump occd a bulletproof sauna? "It wasn't Trump's idea — it was Khashoggi's. Adnan had a fear that someone might try to blow him away while he was sweating. It was

a great coincidence, because as a kid Trump had always dreamed of losing weight in a bullet-proof sau-A woman said, "You'd never get me on that boat."

"Why oot?" "I always get sick when I am anywhere near the nouveau riche. Didn't you have a queasy feeling wben you were being sbown around?

We were anchored in the harbor and I was so busy inspecting the master suite that I didn't have time to get seasick."

By now I had everyone's attention. "What was that like?" I was asked

"There was a mirrored door to the hall that was 18 inches thick. Trump told me that it was installed by Khashoggi to hide his girlfriend in case his wife came by. Or it was used by Khashoggi to get away from them all. No one seems to have the story straight. What impressed me the most about the suite was that it had 18-karat-gold fix-

"What's so special about gold fixtures?" another man asked. They were Donald Trump's shoe trees."

"You certainly sold out," a lady declared. "Everybody knows that Trump bought his yacht just to suck in the likes of you who are only impressed by money.

"That's unfair," I told her. "I don't believe you should look down on individuals who have personal fortunes of slightly over a billion dollars. They also have a right to be part of the American dream. I've come to the conclusion that you are all jealous because I was invited and you were not. Mr. Trump told me that it happens all the time. People who have not had invitations from him are filled with envy, which then turns into disdain and loathing of all he possesses."

"What about the people who are invited on board? How do they feel?" a friend asked. I told her, "We can go either

Gordon Parks Focuses On the Years of Anger

By Elizabeth Kastor Washington Past Service

TEW YORK — Perhaps, New York - And Thinks, the dreams that now fracture his nights were born of all those letters and books and pictures. His papers, coveted by libraries in New York, Boston and Kansas, waited in piles around his apartment for days as be sorted through them, and somehow the past seeped out of them and keeps him from sleeping.
"Having all my life scattered

around this room, things I've forgotten, and suddenly someone says, 'Look at this paper! It's 1935. Do you remember a letter from your brother?" That's pushing me into my past, and as you know" -- he smiles -- "some of it was not so glowingly happy."

He might be remembering growing up, one of 15 kids, poor and black in the Kansas of the 20s. Or the violent, early deaths of friends. Insults, casual and deliberate, The Depression. Home-lessness in St. Paul, Minnesota, and New York. Hunger, the fear of starvation. The early days as a photographer chronieling the poor for the U.S. Farm Security Administration.

Those years were followed by success, but not unalloyed. Photographing Black Panthers, Malcolm X and Harlem's poor as a staff photographer for Life. Writing a novel. Becoming the first black director in Hollywood. Making the movie "Shaft," a buge success, then realizing that Hollywood was still no place for a black director. Three marriages have come and gone. Nine years ago his oldest son died in a plane

Parks bas spent much of his life presenting that past to the public. "The Learning Tree," published in 1966 and made into a movie in 1969, was a "novel from life." the story of Parks' childhood. He later wrote two autobiographies, and his pictures, too, seemed to speak of someone who had lived the events he documented.

He has reached the age -75 when honors accrue. Parks recently received the National Medal of Arts from President Ronald

Reagan, and a festival was held in his honor in Washington.

Despite all the pictures taken and words written, as he works on the third volume of his antobiography he sounds like a man beginning an examination of a new subject. "Before, I just told what happened and let the audience think what they wanted," be says of his earlier books. "I think this one is different. I'm talking more about what it means to me. It's more philosophical."

For decades, he repeated in conversation and books that "I don't think anyone's important enough to occupy me with anger," a lesson taught by the mother he memorialized in "The Learning Tree." His autobiography reads like a constant relearning of his

'I've got a lot of tool shops in my mind that need exploring. Gordon Parks

mother's teaching. But the fury is still there. "I did suppress a lot of anger," he says quietly, as if it is a recent discovery.

One of his most famous pictures is of a black cleaning woman he met soon after arriving in Washington to work for the Farm Security Administration, Her mother died young, her father was killed by a lynch mob, her busband shot to death two days before her daughter was born. When Parks first saw her, she was caring for her dead daughter's two illegitimate children, one of whom was paralyzed. He described that meeting in his autobiographical

"A Choice of Weapons." Parks spent nearly a month following the woman, taking pic-tures. He was just beginning his photographic career then, but the camera remained for many years his way of responding to the bumiliation of someone else's suffering and his own anger.

The living room walls of his apartment are covered with vibrant photographs rather than the

faces and dramas that made Parks famous. The earlier, starker photographs hide in books on three shelves holding his work. "See all those books - I've reached a lot of people," he says. "All these books have something of mine in them, and oot just me - Langston Hughes, Jimmy Baldwin, Ralph Ellison. I didn't have it when I was a kid, a lot of black role models. We didn't have it in the schools, ways to explore the things we particularly found ennobling. We couldn't open a book and see someone we could be

proud of. Everything Parks writes is fueled by the self-enforcing laith of a man determined to be a teacher, model for others. He describes his realizations in the sentences of someone who wants to make sure his point is clear. This disappointment taught me this. This struggle showed me that Life's experiences are not wasted. Suffering can be turned inside out to reveal triumph.

For people reading "The Learning Tree," and then seeing the movie, the portrait by a black man of a strong black family, of both blacks and whites doing wrong and being wronged, of a young boy attempting to light off racism, was new, "Shaft," too, was like nothing before it, creating a new kind of hero for a bungry audience. The action movie was about a black private

eye pitted against a mobster. Creating a credible hero had as much to do with seemingly insignificant details as any overriding theme. Ask Parks about what made "Shaft" different, and he says: "Richard Roundtree was the very first black bero to wear a mustache on screen - did you know that? I insisted on it.

We did as much as we could while we were writing the screenplay to make him a noble figure. but I didn't think he'd become such a hero to black kids." Eventually, "Shaft" and its se-

quel "Shaft's Big Score," which Parks also directed, would be seen by many as the models upon which the "blaxploitation" films of the '70s were based.

Everything he writes is fueled by a determination to be a model.

exploitation movie," is his response. It was a good movie. If James Cagney, Humphrey Bogart had been the star, it wouldn't have been a white exploitation movie, it would have just been a good film. But when Hollywood saw it was such a success, they came up with a lot of fast, bad screenplays. They didn't under-stand the real integrity of Shaft himself, his depth, what he stood for. He was a simple, sweet, goodlooking guy. We put some good words in his mouth, and we

thought about them.
"There's still a lot of prejudice out there. If it's a good project, a white director is going to go out and get it, and buddy knows buddy - so you really have to go out there on your own." Over the years, he's seen others make movies that seemed to be perfect for him, and when the subject comes up, the anger — as quiet but as powerful as thunder heard from

Now he works oo his autobiog-

raphy, his music, a ballet about Martin Luther King Jr., a novel about the British painter J.M.W. Turner. (He never wanted to write or photograph or film only black people, he says; his 1981 novel "Shannon" is about Irish immigrants.) He raises money for the King ballet production, a new and hated task, watches the East River and recognizes in its liquid steel water the subject of Turner's greatest works. Perhaps that book will bring him back to the movie screen — but this time, he will do it on his terms.

"I suppose I am restless," he says. "I have to always be doing something. I like a couple of things going at once, at least to keep me very involved. I suppose I feel I was a late starter, and I missed a lot of things in my early life, and I've got to make up for it. I've got a lot of tool shops in my mind that need exploring. I suppose everyone does, but they just don't bother. It makes life much

PEOPLE

Early Release Ordered For John Zaccaro Jr.

John Zaccaro Jr., 24, the son of the 1984 Democratic vice presiden-tial candidate, Geraldine Ferrance, has been released a month carrie from a house arrest program in Burlington, Vermont, He was convicted in April of selling cocaine. The sentence caused an uprogras Zaccaro spent it in a \$1,500-amonth apartment. Governor Made-leine Kumin has changed the program so that no person convicted of selling drugs may participate in it in the future. Zaccaro was released early for good behavior.

A Jane Austen manuscript containing two early novels has been purchased for \$224,000 at an auction in London by the British Library, ending speculation that would leave Britain. The third to be ume of "Juvenilia" was written by Austen when she was 17. It includes the novel "Catherine, or the Bower," described as Austen's first serious work of fiction.

Joan Collins says divorce is pain-ful, she isn't looking for husband No. 5 and torture for her would be standing every week in line in a supermarket. In the London weekly, Woman, the star of the "Dynasty" series, said writing her first nov-el "Prime Time," which is being published in Britain next week, helped her get through the agony of her divorce from Peter Holm.

Billy Carter was a down-home boy, and the country music singer, Tom T. Hall, decided that former President Jimmy Carter's younger, brother deserved the kind of sendoff he would have wanted. At the funeral in Plains, Georgia, Hall, a longtime friend of Billy, who died Sunday of cancer, wouldn't let the services begin until all the men had removed their ties. "Billy Carter isn't wearing a tie today, and the family has asked you gentlemen if you would remove your ties."

Yves Montand visited the Santiago bome of the Reverend Andre Jarlan, the French activist priest who was slain in 1984 during demonstrations against the military government in Chile. The French actor-singer left a bouquet of red carnations at the working-class chapel and residence where Jarlan
